Total Returns

Performance of the EQ Advisors Trust Portfolios (the "Portfolios") as shown on the following pages compares each Portfolio's performance to that of a broad-based securities index. Each of the Portfolio's annualized rates of return is net of investment management fees and expenses of the Portfolio. Rates of return are not representative of the actual return you would receive under your variable life insurance policy or annuity contract. No policyholder or contract holder can invest directly in the Portfolios. Changes in policy values depend not only on the investment performance of the Portfolios, but also on the insurance and administrative charges, applicable sales charges, and the mortality and expense risk charge applicable under a policy. These policy charges effectively reduce the dollar amount of any net gains and increase the dollar amount of any net losses. Each of the Portfolios has a separate investment objective it seeks to achieve by following a separate investment policy. There is no guarantee that these objectives will be attained. The objectives and policies of each Portfolio will affect its return and its risk. Keep in mind that past performance is not an indication of future results.

Growth of \$10,000 Investment

The charts shown on the following pages illustrate the total value of an assumed investment in Class IA, Class IB and/or Class K shares of each Portfolio of the EQ Advisors Trust. The periods illustrated are from the inception dates shown, or for a ten year period if the inception date is prior to December 31, 2013, through December 31, 2023. These results assume reinvestment of dividends and capital gains. The total value shown for each Portfolio reflects management fees and operating expenses of the Portfolios and 12b-1 fees which are applicable to Class IA and Class IB shares. 12b-1 fees are not applicable to Class K shares. The values have not been adjusted for insurance-related charges and expenses associated with life insurance policies or annuity contracts, which would lower the total values shown. Results should not be considered representative of future gains or losses.

The Benchmarks

Broad-based securities indices are unmanaged and are not subject to fees and expenses typically associated with actively managed funds. An investment cannot be made directly in a broad-based securities index. Comparisons with these benchmarks, therefore, are of limited use. They are included because they are widely known and may help you to understand the universe of securities from which each Portfolio is likely to select its holdings.

Bloomberg U.S. Aggregate Bond Index

An index which covers the U.S. dollar denominated investment-grade, fixed-rate, taxable bond market of

securities. The index includes bonds from the Treasury, government-related and corporate securities, agency fixed rate and hybrid adjustable mortgage pass through securities, asset-backed securities and commercial mortgage-backed securities.

Bloomberg U.S. Intermediate Government Bond Index

An unmanaged index of securities consisting of all U.S. Treasury and agency securities with remaining maturities of from one to ten years.

DJ EuroSTOXX 50[®] Index ("EuroSTOXX 50")

Europe's leading blue-chip index for the Eurozone, provides a blue-chip representation of supersector leaders in the Eurozone. The index covers 50 stocks from 12 Eurozone countries: Austria, Belgium, Finland, France, Germany, Greece, Ireland, Italy, Luxembourg, the Netherlands, Portugal and Spain.

FTSE 100 Index ("FTSE 100")

A market capitalization weighted index representing the performance of the 100 largest blue chip companies, listed on the London Stock Exchange, which meet the FTSE's size and liquidity screening.

ICE BofA 3-Month U.S. Treasury Bill Index

An index which measures the returns of negotiable debt obligations issued by the U.S. government and backed by its full faith and credit, having a maturity of three months.

International Proxy Index

An index that is a hypothetical combination of unmanaged indexes. The composite index combines the total return of the DJ EuroSTOXX 50[®] Index at a weighting of 40%, the FTSE 100 Index at a weighting of 25%, the TOPIX Index at a weighting of 25% and the S&P/ASX 200 Index at a weighting of 10%.

Morgan Stanley Capital International (MSCI) EAFE[®] Index ("MSCI EAFE[®] Index")

A free float-adjusted market capitalization index that is designed to measure the equity market performance of developed markets, excluding the U.S. and Canada. The index consists of the following 21 developed market country indices: Australia, Austria, Belgium, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, the Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, and the United Kingdom.

Russell 2000[®] Index

An unmanaged index which measures the performance of approximately 2,000 of the smallest companies in the Russell 3000[®] Index, which represents approximately 10% of the total market capitalization of the Russell 3000[®] Index. It is market-capitalization weighted.

Russell 3000® Index

An index which measures the performance of the 3,000 largest U.S. companies based on total market capitalization, which represents approximately 98% of the investable U.S. equity market. It is market-capitalization weighted.

Russell 3000[®] Growth Index

An index which measures the performance of those Russell 3000[®] Index companies with higher price-to-book ratios and higher forecasted growth values. It is market-capitalization weighted.

Standard & Poor's 500[®] Composite Stock Price Index ("S&P 500[®] Index")

A weighted index of common stocks of 500 leading companies in leading industries of the U.S. economy, capturing 75% coverage of U.S. equities. The index is market-capitalization weighted, thereby giving greater weight to companies with the largest market capitalizations.

Standard & Poor's Australian Security Exchange 200 Index (a.k.a. S&P/ASX 200 Index)

An index recognized as the primary investable benchmark in Australia. The index represents the 200 largest and most liquid publicly listed companies in Australia and represents approximately 78% of the Australian equity market capitalization.

Standard & Poor's MidCap 400[®] Index ("S&P MidCap 400[®] Index" or "S&P 400[®] Index")

A weighted index of 400 domestic stocks chosen for market size, liquidity, and industry group representation. The index captures approximately 7% of the U.S. equities market. The index returns reflect the reinvestment of dividends.

TOPIX Index ("TOPIX")

A free-float adjusted capitalization-weighted index that is calculated based on all the domestic common stocks listed on the Tokyo Stock Exchange First Section.

The below hypothetical composite benchmark was created by Equitable Investment Management Group, LLC, the Trust's investment manager, to show how the performance of certain Portfolios compares with the return of an index or indices. There is no guarantee that any Portfolio will outperform this or any benchmarks. Portions of a hypothetical composite index against which a Portfolio's performance is measured were created by Equitable Investment Management Group, LLC to show how a Portfolio's performance compares with the returns of an index.

EQ/Moderate Allocation Index is a hypothetical time-weighted combination of unmanaged indexes. The composite index combines the total return of the

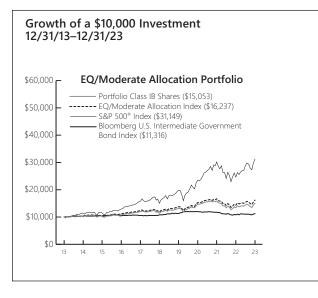

Bloomberg U.S. Intermediate Government Bond Index at a weighting of 35%, the MSCI EAFE® Index at weighting of 15%, the S&P MidCap 400® Index at weighting of 9%, the S&P 500® Index at a weighting of 20%, the Russell 2000® Index at a weighting of 6%, the ICE BofA 3-Month U.S. Treasury Bill Index at weighting of 4% and the Bloomberg U.S. Long Government/Credit Bond Index at a weighting of 11%. Prior to January 1, 2022, the weightings of the Bloomberg U.S. Intermediate Government Bond Index, ICE BofA 3-Month U.S. Treasury Bill Index, and Bloomberg U.S. Long Government/Credit Bond Index were 42%, 8% and 0%, respectively.

PERFORMANCE SUMMARY

The Portfolio's Class IB shares returned 12.31% for the year ended December 31, 2023. This compares to the returns of the following benchmarks over the same period: the EQ/Moderate Allocation Index, the S&P 500[®] Index and the Bloomberg U.S. Intermediate Government Bond Index, which returned 13.05%, 26.29% and 4.30%, respectively.

Portfolio Highlights

The EQ/Moderate Allocation Portfolio invests its assets in a combination of actively and passively managed mutual funds across global equity and bond markets. The Portfolio's return depends upon factors including how well the asset classes they represent performed, how the underlying funds performed on an absolute basis, and how the actively managed funds performed relative to their individual market benchmarks. In addition, the Portfolio includes several holdings with a volatility management component — which was not triggered in 2023. In line with its moderate orientation, the Portfolio saw gains from all its allocations to both stocks and bonds, and broad diversification prevented investors from seeing much of a drag on returns from the portfolios that underperformed their benchmarks.

What helped performance during the year:

- The Portfolio's 50% allocation to bond markets produced around 20% of its return, as government bonds suffered from volatility through much of the year while investors attempted to discern the future path of interest rates. Longer duration funds such as the EQ/Long-Term Bond Portfolio benefitted late in 2023 as the market's focus shifted from hedging inflation fears to the potential of an economic slowdown and Federal Reserve interest rate cuts.
- The Portfolio's 50% allocation to equity securities produced the rest of its total return — in line with generally buoyant stock markets as global economies avoided the recession so many investors had feared. Indexed holdings in ATM Large Cap Managed Volatility Portfolio and EQ/Large Cap Core Managed Volatility Portfolio provided the highest individual contributions to returns. Actively managed portfolios also added to returns. EQ/Morgan Stanley Small Cap Growth benefitted from strong stock selection and outperformed the Russell 2000 Growth Index by 16.1% over the one-year period.

What hurt performance during the year:

- Within Fixed Income, Intermediate Government bonds detracted as they did not benefit as much as longer duration assets during the bond rally that took place from October to December 2023. The Portfolio's actively managed positions, while producing positive returns, underperformed their benchmarks in 2023, namely Multimanager Core Bond Portfolio and 1290 Diversified Bond Fund.
- Within Equities, Large Cap Value exposure detracted relative to Large Cap Growth exposure with the Russell 1000 Value Index up only 11.5% in comparison to the 42.7% return of the Russell 1000 Growth Index. The Portfolio's actively managed positions of several equity funds also provided minimal returns, generally by underperforming their benchmarks. These include EQ/Janus Enterprise Portfolio, 1290 VT Equity Income Portfolio and EQ/American Century Mid Cap Value Portfolio.

UNDERSTANDING YOUR EXPENSES:

As a shareholder of the Portfolio, you incur two types of costs:

(1) transaction costs, including applicable sales charges and redemption fees; and (2) ongoing costs, including investment advisory fees, distribution and/or service (12b-1) fees (in the case of Class IA and Class IB shares of the Portfolio), and other Portfolio expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 invested at the beginning of the six-month period ended December 31, 2023 and held for the entire six-month period.

Actual Expenses

The first line of the following table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the following table provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual

expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. Also note that the table does not reflect any variable life insurance or variable annuity contract-related fees and expenses, which would increase overall fees and expenses.

FXAMPLE

	Beginning Account Value 7/1/23	Ending Account Value 12/31/23	Expenses Paid During Period* 7/1/23 - 12/31/23				
Class IA							
Actual	\$1,000.00	\$1,047.10	\$2.70				
Hypothetical (5% average annual return before							
expenses)	1,000.00	1,022.56	2.67				
Class IB							
Actual	1,000.00	1,046.70	2.70				
Hypothetical (5% average annual return before	1 000 00	1 000 50	2.67				
expenses)	1,000.00	1,022.56	2.67				
Class K Actual	1 000 00	1 049 60	1 42				
Hypothetical (5% average annual return before	1,000.00	1,048.60	1.42				
expenses)	1,000.00	1,023.82	1.40				
* Expenses are equal to the Portfolio's Class IA, Class IB and Class K shares annualized expense ratio of 0.52%, 0.52% and 0.27%, respectively, multiplied by the average account value over the period, and multiplied by 184/365 (to reflect the one-half year period).

(a) Formerly known as EQ/T. Rowe Price Growth Stock Portfolio.

The following is a summary of the inputs, summarized in three broad levels, used to value the Portfolio's assets and liabilities carried at fair value as of December 31, 2023:

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Investment Type	Level 1 Quoted Prices in Active Markets for Identical Securities	Level 2 Significant Other Observable Inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)	Level 3 Significant Unobservable Inputs (including the Portfolio's own assumptions in determining the fair value of investments)	Total
Assets: Investment Companies Investment Companies	\$ 144,050,563	\$ 5,422,754,869	s	\$ 5,566,805,432
Total Assets	\$ 144,050,563	\$ 5,422,754,869	\$	\$ 5,566,805,432
Total Liabilities	\$	\$	*	\$
Total	\$ 144,050,563	\$ 5,422,754,869	\$	\$ 5,566,805,432

The Portfolio held no derivatives contracts during the year ended December 31, 2023.

Investment security transactions for the year ended December 31, 2023 were as follows:

Cost of Purchases: Long-term investments other than U.S. government debt securities	\$ 486,363,352
Net Proceeds of Sales and Redemptions: Long-term investments other than U.S. government debt securities	\$ 902,202,499

As of December 31, 2023, the gross unrealized appreciation (depreciation) of investments based on the aggregate cost of investments in securities and derivative instruments, if applicable, for Federal income tax purposes was as follows:

Aggregate gross unrealized appreciation Aggregate gross unrealized depreciation	\$ 782,341,635 (422,101,340)
Net unrealized appreciation	\$ 360,240,295
Federal income tax cost of investments in securities and derivative instruments, if applicable	\$ 5,206,565,137

Total dividends and distributions		(0.52)		(1.16)	_	(1.33)		(1.08)		(0.92)
Net asset value, end of year	\$	11.97	\$	11.10	\$	14.49	\$	14.57	\$	14.07
Total return	_	12.61%	_	(15.24)%		8.68%	_	11.49%	_	15.85%
Ratios/Supplemental Data: Net assets, end of year (000's) Ratio of expenses to average net assets (f) Ratio of net investment income (loss) to average	\$	253,286 0.26%(j)	\$	247,941 0.24%(k)	\$	316,250 0.23%(o)	\$	312,558 0.24%(jj)	\$	304,750 0.24%(jj)
net assets (f)(x) Portfolio turnover rate^		1.94% 9%		1.38% 10%		0.95% 25%		1.13% 22%		1.61% 13%

^ Portfolio turnover rate excludes derivatives, if any.

(e) Net investment income (loss) per share is based on average shares outstanding.

(f) Expenses do not include the expenses of the underlying funds ("indirect expenses"), if applicable.

(j) Including direct and indirect expenses, the net expense ratio after waivers and reimbursements would be 1.10% for Class IA, 1.10% for Class IB and 0.85% for Class K.

(k) Including direct and indirect expenses, the net expense ratio after waivers and reimbursements would be 1.07% for Class IA, 1.07% for Class IB and 0.82% for Class K.

(o) Including direct and indirect expenses, the net expense ratio after waivers and reimbursements would be 1.06% for Class IA, 1.06% for Class IB and 0.81% for Class K.

(x) Recognition of net investment income is affected by the timing of dividend declarations by the underlying funds in which the Portfolio invests.

(jj) Including direct and indirect expenses, the net expense ratio after waivers and reimbursements would be 1.08% for Class IA, 1.08% for Class IB and 0.83% for Class K.

PERFORMANCE RESULTS

Annualized Total Returns as of	f 12/31/23		
	1 Year	5 Years	10 Years
Portfolio – Class IA Shares	25.12%	14.45%	10.80%
Portfolio – Class IB Shares	25.13	14.45	10.79
Russell 3000 [®] Index	25.96	15.16	11.48
Returns for periods greater than o	ne year are a	nnualized.	

Past performance is not indicative of future results.

PERFORMANCE SUMMARY

The Portfolio's Class IB shares returned 25.13% for the year ended December 31, 2023. This compares to the Portfolio's benchmark, the Russell 3000[®] Index, which returned 25.96% over the same period.

Portfolio Highlights

What helped performance during the year:

- The sectors that contributed the most to performance were Technology, Consumer Discretionary, Communication Services, Industrials and Financials.
- The stocks that contributed most to performance were Microsoft Corp., Apple, Inc., NVIDIA Corp., Amazon.com, Inc. and Meta Platforms, Inc.

What hurt performance during the year:

- The sectors that detracted the most from performance were Utilities, Energy, Consumer Staples, Health Care and Real Estate.
- The stocks that detracted most from performance were Pfizer, Inc., Chevron Corp., NextEra Energy, Inc., Johnson & Johnson and Bristol-Myers Squibb Co.

Sector Weightings as of December 31, 2023	% of Net Assets
Information Technology	27.0%
Financials	13.7
Health Care	12.5
Consumer Discretionary	10.9
Industrials	9.9
Communication Services	8.0
Consumer Staples	5.7
Energy	4.0
Real Estate	3.0
Materials	2.7
Utilities	2.3
Investment Companies	0.2
Cash and Other	0.1
	100.0%

UNDERSTANDING YOUR EXPENSES:

As a shareholder of the Portfolio, you incur two types of costs:

(1) transaction costs, including applicable sales charges and redemption fees; and (2) ongoing costs, including investment advisory fees, distribution and/or service (12b-1) fees (in the case of Class IA and Class IB shares of the Portfolio), and other Portfolio expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 invested at the beginning of the six-month period ended December 31, 2023 and held for the entire six-month period.

Actual Expenses

The first line of the following table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

EQ/COMMON STOCK INDEX PORTFOLIO (Unaudited)

Hypothetical Example for Comparison Purposes

The second line of the following table provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. Also note that the table does not reflect any variable life insurance or variable annuity contract-related fees and expenses, which would increase overall fees and expenses.

EXAMPLE

	Beginning Account Value 7/1/23	Ending Account Value 12/31/23	Expenses Paid During Period* 7/1/23 - 12/31/23					
Class IA								
Actual	\$1,000.00	\$1,080.70	\$3.56					
Hypothetical (5% average annual return before								
expenses)	1,000.00	1,021.79	3.46					
Class IB								
Actual	1,000.00	1,080.40	3.56					
Hypothetical (5% average annual return before								
expenses)	1,000.00	1,021.79	3.46					
 Expenses) 1,000.00 1,021.79 5.40 * Expenses are equal to the Portfolio's Class IA and Class IB shares annualized expense ratio of 0.68% and 0.68%, respectively, multiplied by the average account value over the period, and multiplied by 184/365 (to reflect the one-half year period).

Bloomberg U.S. Aggregate Bond							
Index	5.53	1.10	1.81				
Returns for periods greater than one	year are a	nnualized.					

Past performance is not indicative of future results.

PERFORMANCE SUMMARY

The Portfolio's Class IB shares returned 4.51% for the year ended December 31, 2023. This compares to the Portfolio's benchmark, the Bloomberg U.S. Aggregate Bond Index, which returned 5.53% over the same period.

Portfolio Highlights

What helped performance during the year:

• A large contributor to relative performance was an overweight to Colombian debt. The overall emerging market debt class performed well in 2023.

- Overweights to other select emerging market debt in Brazil, Mexico, and Poland also added to relative performance. There was a significant valuation opportunity in local currency emerging markets, driven by high nominal yields.
- An overweight in the higher yielding segment of the market relative to the benchmark helped performance.

What hurt performance during the year:

- An underweight to Japanese duration was a key detractor on a relative basis.
- An overweight to long-dated U.S. Treasuries also detracted from relative performance. Earlier in 2023, this overweight was a key detractor as rates rose in the United States, however, the positioning was additive in the fourth quarter.
- Among currencies, an overweight in the Japanese yen was a large detractor from relative performance. The Japanese yen rose in the fourth quarter, but was still down 7.0% in 2023.
- An underweight position in the Euro detracted from relative performance over the year. The Euro rose 3.1% against the U.S. dollar in 2023.

Portfolio Characteristics As of December 31, 2023

Weighted Average Life (Years)	9.60
Weighted Average Coupon (%)	4.48
Weighted Average Modified Duration (Years)*	6.49
Weighted Average Rating**	AA3

- * Modified duration is a measure of the price sensitivity of the Portfolio to interest rate movements, taking into account specific features of the securities in which it invests.
- ** Weighted Average Rating has been provided by the Investment Sub-Adviser. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice.

UNDERSTANDING YOUR EXPENSES:

As a shareholder of the Portfolio, you incur two types of costs:

(1) transaction costs, including applicable sales charges and redemption fees; and (2) ongoing costs, including investment advisory fees, distribution and/or service (12b-1) fees (in the case of Class IA and Class IB shares of the Portfolio), and other Portfolio expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 invested at the beginning of the six-month period ended December 31, 2023 and held for the entire six-month period.

Actual Expenses

The first line of the following table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the following table provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. Also note that the table does not reflect any variable life insurance or variable annuity contract-related fees and expenses, which would increase overall fees and expenses.

EXAMPLE

	Beginning Account Value 7/1/23	Ending Account Value 12/31/23	Expenses Paid During Period* 7/1/23 - 12/31/23			
Class IA						
Actual	\$1,000.00	\$1,032.90	\$4.77			
Hypothetical (5% average annual return before						
expenses)	1,000.00	1,020.52	4.74			
Class IB						
Actual	1,000.00	1,033.00	4.77			
Hypothetical (5% average annual return before expenses)	1,000.00	1.020.52	4.74			
Class K	1,000.00	1,020.52	7.77			
Actual	1,000.00	1,035.20	3.49			
Hypothetical (5% average annual return before	_,	_,				
expenses)	1,000.00	1,021.78	3.47			
* Expenses are equal to the Portfolio's Class IA, Class IB and Class K shares annualized expense ratio of 0.93%, 0.93% and 0.68%, respectively, multiplied by the average account value over the period, and multiplied by 184/365 (to reflect the one-half year period).

- § Securities exempt from registration under Rule 144A of the Securities Act of 1933. These securities may only be resold to qualified institutional buyers. At December 31, 2023, the market value of these securities amounted to \$143,882,882 or 18.9% of net assets.
- (e) Step Bond Coupon rate increases or decreases in increments to maturity. Rate disclosed is as of December 31, 2023. Maturity date disclosed is the ultimate maturity date.
- (h) Defaulted security. A security is classified as defaulted if the issuer files for bankruptcy or fails to make a scheduled interest or principal payment within the grace period set forth in the security's governing documents.
- (k) Variable or floating rate security, linked to the referenced benchmark. The interest rate shown was the current rate as of December 31, 2023.
- (I) Variable or floating rate security, the interest rate of which adjusts periodically based on changes in current interest rates and prepayments on the underlying pool of assets. The interest rate shown was the current rate as of December 31, 2023.
- (r) Fair value determined using significant unobservable inputs.

(a) It is the Portfolio's policy to recognize transfers of financial instruments between levels of hierarchy as of the end of the period. Transfers to Level 3 are the result of observable inputs relevant to the fair value measurement of a security becoming unavailable. A security with a market value of \$0 transferred from Level 2 to Level 3 at the end of the period due to unobservable market data.

(b) Value is zero.

EQ/CORE PLUS BOND PORTFOLIO PORTFOLIO OF INVESTMENTS (Continued) December 31, 2023

Fair Values of Derivative Instruments as of December 31, 2023:

	Statement of Assets and Liabilities

assets: After waivers (f) Before waivers (f) Portfolio turnover rate^		4.43% 4.27% 145%		2.90% 2.81% 187%		1.75% 1.67% 200%		1.78%(x) 1.53%(x) 237%(h)		2.22%(x) 2.16%(x) 5%

Per share amount is less than \$0.005.

^ Portfolio turnover rate excludes derivatives, if any.

(e) Net investment income (loss) per share is based on average shares outstanding.

(f) Expenses do not include the expenses of the underlying funds ("indirect expenses"), if applicable.

(h) Change in investment strategy resulted in higher portfolio turnover.

(j) Including direct and indirect expenses, the net expense ratio after waivers would be 0.93% for Class IA, 0.93% for Class IB and 0.68% for Class K.

(k) Including direct and indirect expenses, the net expense ratio after waivers would be 0.95% for Class IA, 0.95% for Class IB and 0.70% for Class K.

(m) Including direct and indirect expenses, the net expense ratio after waivers would be 1.01% for Class IA, 1.00% for Class IB and 0.73% for Class K.

(n) Including direct and indirect expenses, the net expense ratio after waivers would be 1.00% for Class IA, 1.00% for Class IB and 0.75% for Class K.

(o) Includes extraordinary expenses of 0.06%, 0.05% and 0.03% for Class IA, Class IB and Class K respectively.

(jj) Including direct and indirect expenses, the net expense ratio after waivers would be 1.10% for Class IA, 1.10% for Class IB and 0.85% for Class K.

(x) Recognition of net investment income is affected by the timing of dividend declarations by the underlying funds in which the Portfolio invests.

PERFORMANCE RESULTS

Annualized Total Returns as of 12/31/23							
	1 Year	5 Years	10 Years				
Portfolio – Class IA Shares	19.01%	8.09%	3.69%				
Portfolio – Class IB Shares	19.04	8.10	3.69				
Portfolio – Class K Shares	19.28	8.36	3.94				
International Proxy Index	20.60	8.81	4.40				
MSCI EAFE® Index	18.24	8.16	4.28				
Returns for periods greater than one year are annualized.							

Past performance is not indicative of future results.

PERFORMANCE SUMMARY

The Portfolio's Class IB shares returned 19.04% for the year ended December 31, 2023. This compares to the returns of the following benchmarks over the same period: the International Proxy Index and the MSCI EAFE® Index, which returned 20.60% and 18.24%, respectively.

Portfolio Highlights

What helped performance during the year:

• The sectors that contributed the most to performance were Industrials, Financials, Consumer Discretionary, Technology and Materials.

• The stocks that contributed the most to performance were ASML Holding NV, SAP SE, HSBC Holdings plc, Siemens AG and Schneider Electric SE.

What hurt performance during the year:

- The sectors that detracted the most from performance were funds and investment trusts, Health Care, Real Estate, Communication Services and Consumer Staples.
- The stocks that detracted the most from performance were British American Tobacco plc, Diageo plc, Anglo American plc, Bayer AG and Nokia OYJ.

Sector Weightings as of December 31, 2023	Market Value	% of Net Assets
Financials	\$297,257,869	18.0%
Industrials	275,395,308	16.6
Consumer Discretionary	234,961,811	14.2
Information Technology	162,879,866	9.8
Consumer Staples	155,753,392	9.4
Health Care	134,859,321	8.2
Materials	133,414,530	8.1
Energy	101,093,088	6.1
Communication Services	62,882,613	3.8
Utilities	49,820,137	3.0
Real Estate	22,968,476	1.4

Investment Companies	1,316,455	0.1
Cash and Other	17,222,497	1.0
		100.0%

UNDERSTANDING YOUR EXPENSES:

As a shareholder of the Portfolio, you incur two types of costs:

(1) transaction costs, including applicable sales charges and redemption fees; and (2) ongoing costs, including investment advisory fees, distribution and/or service (12b-1) fees (in the case of Class IA and Class IB shares of the Portfolio), and other Portfolio expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 invested at the beginning of the six-month period ended December 31, 2023 and held for the entire six-month period.

Actual Expenses

The first line of the following table provides information about actual account values and actual expenses. You may use the information in this line, together with the

EQ/INTERNATIONAL EQUITY INDEX PORTFOLIO (Unaudited)

amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the following table provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. Also note that the table does not reflect any variable life insurance or variable annuity contract-related fees and expenses, which would increase overall fees and expenses.

EXAMPLE

	Beginning Account Value 7/1/23	Ending Account Value 12/31/23	Expenses Paid During Period* 7/1/23 - 12/31/23					
Class IA								
Actual	\$1,000.00	\$1,050.70	\$3.79					
Hypothetical (5%								
average annual								
return before								
expenses)	1,000.00	1,021.51	3.73					
Class IB								
Actual	1,000.00	1,050.70	3.79					
Hypothetical (5%								
average annual return before								
expenses)	1,000.00	1,021.51	3.73					
Class K	1,000.00	1,021.31	5.75					
Actual	1,000.00	1,051.10	2.50					
Hypothetical (5%	1,000.00	1,051.10	2.50					
average annual								
return before								
expenses)	1,000.00	1,022.77	2.46					
* Expenses are equal to the Portfolio's Class IA, Class IB and Class K shares annualized expense ratio of 0.73%, 0.73% and 0.48%, respectively, multiplied by the average account value over the period, and multiplied by 184/365 (to reflect the one-half year period).

(m) Regulation S is an exemption for securities offerings that are made outside of the United States and do not involve direct selling efforts in the United States. Resale restrictions may apply for purposes of the Securities Act of 1933. At December 31, 2023, the market value or fair value, as applicable, of these securities amounted to \$9,950,288 or 0.6% of net assets.

(q) Preference Shares are a special type of equity investment that shares in the earnings of the company, has limited voting rights, and receives a greater dividend than applicable Common Shares.

- (r) Fair value determined using significant unobservable inputs.
- (x) All or a portion of security is on loan at December 31, 2023.
- (xx) At December 31, 2023, the Portfolio had loaned securities with a total value of \$7,072,034. This was collateralized by \$6,285,279 of various U.S. Government Treasury Securities, ranging from 0.000% - 5.375%, maturing 1/15/24 - 11/15/53 and by cash of \$1,316,455 which was subsequently invested in investment companies as detailed in the Notes to the Financial Statements.

EQ/INTERNATIONAL EQUITY INDEX PORTFOLIO PORTFOLIO OF INVESTMENTS (Continued) December 31, 2023

Investment Type	Level 1 Quoted Prices in Active Markets for Identical Securities	Level 2 Significant Other Observable Inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)	Level 3 Significant Unobservable Inputs (including the Portfolio's own assumptions in determining the fair value of investments) (a)	Total
Short-Term Investments Investment Companies Warrant	\$ 1,316,455	\$ —	\$ —	\$ 1,316,455
Australia		(b)		(b)
Total Assets	\$ 1,483,683	\$ 1,635,290,556	\$ 521,564	\$ 1,637,295,803
Liabilities: Futures	\$ (29,679)	\$	\$	\$ (29,679)
Total Liabilities	\$ (29,679)	\$	\$	\$ (29,679)
Total	\$ 1,454,004	\$ 1,635,290,556	\$ 521,564	\$ 1,637,266,124

(a) It is the Portfolio's policy to recognize transfers of financial instruments between levels of hierarchy as of the end of the period. Transfers to Level 3 are the result of observable inputs relevant to the fair value measurement of a security becoming unavailable. A security with a market value of \$437,362 transferred from Level 2 to Level 3 at the end of the period due to unobservable market data.

(b) Value is zero.

Fair Values of Derivative Instruments as of December 31, 2023:

Total return		19.28%	_	(11.68)%		11.29%	_	4.05%	_	22.48%	
Ratios/Supplemental Data: Net assets, end of year (000's) Ratio of expenses to average net assets:	\$	113,447	\$	106,947	\$	116,340	\$	112,847	\$	174,705	
After waivers (f) Before waivers (f) Ratio of net investment income (loss) to average		0.49%(j) 0.55%		0.52%(k) 0.54%		0.53%(o) 0.54%		0.54%(o) 0.55%		0.53%(k) 0.53%	
net assets: After waivers (f) Before waivers (f) Portfolio turnover rate^		2.68% 2.62% 8%		3.12% 3.10% 9%		2.62%(dd) 2.61%(dd) 10%		2.16%(bb) 2.15%(bb) 11%		2.99% 2.98% 5%	

^ Portfolio turnover rate excludes derivatives, if any.

(e) Net investment income (loss) per share is based on average shares outstanding.

(f) Expenses do not include the expenses of the underlying funds ("indirect expenses"), if applicable.

(j) Including direct and indirect expenses, the net expense ratio after waivers would be 0.74% for Class IA, 0.74% for Class IB and 0.49% for Class K.

(k) Including direct and indirect expenses, the net expense ratio after waivers would be 0.78% for Class IA, 0.78% for Class IB and 0.53% for Class K.

(o) Including direct and indirect expenses, the net expense ratio after waivers would be 0.79% for Class IA, 0.79% for Class IB and 0.54% for Class K.

(aa) Includes income resulting from a non-recurring non-cash dividend. Without this dividend, the per share income amounts would be \$0.15, \$0.14 and \$0.17 for Class IA, IB and Class K, respectively.

(bb) Includes income resulting from a non-recurring non-cash dividend. Without this dividend the ratios for each class would have been 0.23% lower.

(cc) Includes income resulting from a non-recurring non-cash dividend. Without this dividend, the per share income amounts would be \$0.20, \$0.20 and \$0.23 for Class IA, Class IB and Class K, respectively.

(dd) Includes income resulting from a non-recurring non-cash dividend. Without this dividend, the ratios for each class would have been 0.49% lower.

PERFORMANCE RESULTS

Annualized Total Returns as of 12/31/23									
	1 Year	5 Years	10 Years						
Portfolio – Class IA Shares	4.47%	1.48%	0.91%						
Portfolio – Class IB Shares	4.47	1.48	0.90						
ICE BofA 3-Month U.S. Treasury Bill									
Index	5.04	1.89	1.26						
Returns for periods greater than one year are annualized.									

Past performance is not indicative of future results.

PERFORMANCE SUMMARY

The Portfolio's Class IB shares returned 4.47% for the year ended December 31, 2023. This compares to the Portfolio's benchmark, the ICE BofA 3-Month U.S. Treasury Bill Index, which returned 5.04% over the same period.

Portfolio Highlights

What helped performance during the year:

Portfolio positioning contributed to Portfolio performance. During much of the year, the Portfolio was maintained with a short weighted average maturity (WAM) in anticipation of multiple interest rate hikes. These rate hikes lifted yields on money market securities the Portfolio invests in. Since suspending the debtceiling limit in June, the net increase in Treasury bills issued pushed yields higher on a relative basis. As the tightening cycle approached its peak in the second half of the year, we increased the Portfolio's allocation to Treasury bills to add incremental yield. U.S. governmentagency floating-rate notes (FRNs) that reset daily off the Secured Overnight Financing Rate (SOFR) and U.S. Treasury FRNs bolstered the Portfolio's yield due to their positive spread above their benchmark.

What hurt performance during the year:

In the first half of the year, considerable market-wide demand for short-dated U.S. government securities combined with a debt-ceiling-related reduced supply of Treasury bills drove yields on front-end Treasury bills lower than yields on overnight repurchase agreements and FRNs. Therefore, yields on some fixed-rate government securities the Portfolio purchased earlier in the period generally lagged. Certain long-dated government securities purchased earlier in the year when yields were generally lower lagged other Portfolio holdings. Due to the currently inverted yield curve from overnight out to one-year, yields on longer-dated fixed-rate securities are currently lower than yields on overnight repurchase agreements and other securities with shorter maturities.

Portfolio Positioning and Outlook — Dreyfus

Our expectation that the Federal Reserve is at the end of its tightening cycle warranted an increase to the Portfolio's WAM from 15 days at the beginning of the year to 36 days at the end of 2023. Similarly, the weighted average life (WAL) of the Portfolio was extended from 28 days to 57 days. Allocation of Portfolio assets to Treasury securities increased from 33% to 55%, with the goal of taking advantage of higher yields on Treasury bills and adding duration. Government-agency holdings fell from 14% to 10%. Allocation to triparty repurchase agreements fell from 53% to 34% over the year. Treasury and agency FRNs comprised 13% of the Portfolio, down from 14%. In 2024, inflation is expected to continue moderating, and we believe the Federal Reserve is likely to cut rates multiple times and yields on money market securities will fall. Expectations are for increased volatility in the front end as investors seek to determine the timing and extent of potential cuts to the federal funds rate.

This Portfolio is neither guaranteed nor insured by the U.S. Government, the Federal Deposit Insurance Corporation or any other government agency. There is no assurance that the Portfolio will be able to maintain a stable net asset value of \$1.00 per share. It is possible to lose money by investing in this Portfolio.

** Waighted Average Pating has been provided	hy the Investment

** Weighted Average Rating has been provided by the Investment Sub-Adviser. A credit rating is an assessment provided by a nationally recognized statistical rating organization (NRSRO) of the creditworthiness of an issuer with respect to debt obligations, including specific securities, money market instruments or other debts. Ratings are measured on a scale that generally ranges from AAA (highest) to D (lowest); ratings are subject to change without notice.

UNDERSTANDING YOUR EXPENSES:

As a shareholder of the Portfolio, you incur two types of costs:

(1) transaction costs, including applicable sales charges and redemption fees; and (2) ongoing costs, including investment advisory fees, distribution and/or service (12b-1) fees (in the case of Class IA and Class IB shares of the Portfolio), and other Portfolio expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 invested at the beginning of the six-month period ended December 31, 2023 and held for the entire six-month period.

Actual Expenses

The first line of the following table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the following table provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. Also note that the table does not reflect any variable life insurance or variable annuity contract-related fees and expenses, which would increase overall fees and expenses.

EXAMPLE

	Beginning Account Value 7/1/23	Ending Account Value 12/31/23	Expenses Paid During Period* 7/1/23 - 12/31/23				
Class IA							
Actual	\$1,000.00	\$1,023.70	\$3.52				
Hypothetical (5%							
average annual							
return before							
expenses)	1,000.00	1,021.73	3.51				
Class IB							
Actual	1,000.00	1,023.70	3.52				
Hypothetical (5%							
average annual							
return before							
expenses)	1,000.00	1,021.73	3.51				
* Expenses are equal to the Portfolio's Class IA and Class IB shares annualized expense ratio of 0.69% and 0.69%, respectively, multiplied by the average account value over the period, and multiplied by 184/365 (to reflect the one-half year period).

Portfolio – Class IB Shares	38.29	15.92	12.48			
Portfolio – Class K Shares	38.63	16.21	12.73			
Russell 3000 [®] Growth Index	41.21	18.85	14.33			
Returns for periods greater than one year are annualized.						

Past performance is not indicative of future results.

PERFORMANCE SUMMARY

The Portfolio's Class IB shares returned 38.29% for the year ended December 31, 2023. This compares to the Portfolio's benchmark, the Russell 3000[®] Growth Index, which returned 41.21% over the same period.

Portfolio Highlights

What helped performance during the year:

- Sector underweight and stock selection in Industrials
- Industrials was the top contributing sector over the period. Within the sector, ride-sharing tech platform Uber Technologies added to relative results. The

company's share price rose in the fourth quarter following strong third quarter results and inclusion within the S&P 500 Index.

- Top stock contributors to relative performance included relative overweight positions in Information Technology sector holdings in MongoDB Inc., CrowdStrike Holdings Inc., Servicenow Inc. and Salesforce Inc.
- A sector underweight and stock selection in the Consumer Staples sector were key contributors to relative performance.
- Communication stock selection was positive, led by an overweight position in Meta Platforms, Inc.

What hurt performance during the year:

- Overweight allocation and stock selection in Health Care both detracted from relative performance, including overweight positions in Inspire Medical Systems Inc. and The Cigna Group.
- Underweight allocation and stock selection in the Consumer Discretionary sector also detracted from relative performance. Here, an underweight in electric vehicle maker Tesla, Inc. was a notable individual detractor.
- Also among individual holdings, not holding chip designer and software maker Broadcom Inc. and holding cloud-based software provider Bill Holdings Inc., which was not in the benchmark, detracted from relative results.

MULTIMANAGER AGGRESSIVE EQUITY PORTFOLIO (Unaudited)

UNDERSTANDING YOUR EXPENSES:

As a shareholder of the Portfolio, you incur two types of costs:

(1) transaction costs, including applicable sales charges and redemption fees; and (2) ongoing costs, including investment advisory fees, distribution and/or service (12b-1) fees (in the case of Class IA and Class IB shares of the Portfolio), and other Portfolio expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Portfolio and to compare these costs with the ongoing costs of investing in other mutual funds.

The examples are based on an investment of \$1,000 invested at the beginning of the six-month period ended December 31, 2023 and held for the entire six-month period.

Actual Expenses

The first line of the following table provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical Example for Comparison Purposes

The second line of the following table provides information about hypothetical account values and hypothetical expenses based on the Portfolio's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Portfolio's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Portfolio and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds. Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs, such as sales charges (loads), redemption fees, or exchange fees. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher. Also note that the table does not reflect any variable life insurance or variable annuity contract-related fees and expenses, which would increase overall fees and expenses.

^ Portfolio turnover rate excludes derivatives, if any.

The amount shown for a share outstanding throughout the period does not accord with the aggregate net income and/or gain on investments for that period because of the timing of sales and repurchases of the Portfolio shares in relation to fluctuating market value of + the investments in the Portfolio.

(e) Net investment income (loss) per share is based on average shares outstanding.

(f) Expenses do not include the expenses of the underlying funds ("indirect expenses"), if applicable.

 (h) The portfolio turnover rate calculation includes purchases and sales made as a result of the replacement of the sub-adviser.
 (cc) Includes income resulting from a litigation payment. Without this income, the total return would have been 33.27% for Class IA, 33.27% for Class IB and 33.60% for Class K.

NOTES TO FINANCIAL STATEMENTS December 31, 2023

Note 1 Organization and Significant Accounting Policies

EQ Advisors Trust (the "Trust") was organized as a Delaware statutory trust on October 31, 1996, and is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as an open-end management investment company. As of December 31, 2023, the Trust offered one hundred ten portfolios (each a "Portfolio"). These financial statements present six of the Portfolios. The investment adviser to each Portfolio is Equitable Investment Management Group, LLC ("EIM" or the "Adviser"), a wholly-owned subsidiary of Equitable Financial Life Insurance Company ("Equitable Financial").

The financial statements of each of the Portfolios in the Trust are included in each Portfolio's annual report which is filed with the SEC on Form N-CSR and publicly available through the SEC's EDGAR database (https://www.sec.gov/edgar/searchedgar/companysearch.html).

Effective January 1, 2023, Equitable Investment Management, LLC ("EIM II"), an affiliate of EIM, became the administrator for the Trust and the Portfolios. The transfer of administration services to EIM II did not result in any change in the nature, scope or quality of the administration services being provided to the Trust and the Portfolios, or the personnel providing such services, and did not result in any change in the administration fees paid by the Portfolios.

The Adviser and each of the investment sub-advisers (each, a "Sub-Adviser"), subject to the supervision of the Adviser, independently chooses and maintains a portfolio of securities for the Portfolio(s).

The following Portfolio is a type of mutual fund often described as a "fund-of-funds".

The EQ/Moderate Allocation Portfolio (an "EQ Allocation Portfolio" and together with other Portfolios not included in these financial statements, the "EQ Allocation Portfolios") pursues its investment objective by investing exclusively in other affiliated mutual funds managed by EIM.

The underlying funds' financial statements are included in each underlying fund's annual report, which is filed with the SEC on Form N-CSR and publicly available through the SEC's EDGAR database (https://www.sec.gov/edgar/ searchedgar/companysearch.html).

The EQ/Core Plus Bond Portfolio and Multimanager Aggressive Equity Portfolio may utilize multiple Sub-Advisers (each, a "Multiadviser Portfolio", and together with other Portfolios not included in these financial statements, the "Multiadviser Portfolios"). Each of the Sub-Advisers independently chooses and maintains a portfolio of securities for the Multiadviser Portfolio and each is responsible for investing a specific allocated portion of the Multiadviser Portfolio's assets. Because each Sub-Adviser will invest its allocated portion of the Multiadviser Portfolio independently from the other Sub-Advisers, the same security may be held in different portions of the Multiadviser Portfolio, or may be acquired for one portion of the Multiadviser Portfolio at a time when the Sub-Adviser of another portion deems it appropriate to dispose of the security. Similarly, under some market conditions, one Sub-Adviser may believe that temporary defensive investments in short-term instruments or cash are appropriate when the other Sub-Adviser believes continued exposure to the equity or fixed income markets is appropriate for their allocated portions of the Multiadviser Portfolio. Because each Sub-Adviser is responsible for the trading for its own portion of the Multiadviser Portfolio, and does not aggregate its transactions with those of the other Sub-Adviser, the Multiadviser Portfolio may incur higher brokerage costs, and may have higher portfolio turnover, than would be the case if a single Sub-Adviser were managing the entire Multiadviser Portfolio.

The Trust issues three classes of shares, Class IA, Class IB and Class K, as shown in the respective Portfolio's Statement of Assets and Liabilities. The Class IA and Class IB shares are each subject to distribution fees imposed under distribution plans ("Distribution Plans") adopted pursuant to Rule 12b-1 under the 1940 Act. Under the Trust's multiple class distribution system, all three classes of shares have identical voting, dividend, liquidation and other rights, other than the payment of distribution fees under the applicable Distribution Plan. The Trust's shares are currently sold only to insurance company separate accounts in connection with variable life insurance contracts and variable annuity certificates and contracts issued by Equitable Financial, Equitable Financial Life and Annuity Company and other affiliated or unaffiliated insurance companies, and to the Equitable 401(k) Plan. Shares also may be sold to other tax-qualified retirement plans and to other series of the Trust.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

The investment objectives of each Portfolio are as follows:

EQ/Moderate Allocation Portfolio — Seeks to achieve long-term capital appreciation and current income.

EQ/Common Stock Index Portfolio (sub-advised by AllianceBernstein L.P. ("AB"), an affiliate of EIM) — Seeks to achieve a total return before expenses that approximates the total return performance of the Russell 3000[®] Index, including reinvestment of dividends, at a risk level consistent with that of the Russell 3000[®] Index.

EQ/Core Plus Bond Portfolio (sub-advised by AXA Investment Managers US Inc. ("AXA IM"), Brandywine Global Investment Management, LLC and Loomis, Sayles & Company, L.P.) — Seeks to achieve high total return through a combination of current income and capital appreciation.

EQ/International Equity Index Portfolio (sub-advised by AB) — Seeks to achieve a total return (before expenses) that approximates the total return performance of a composite index comprised of 40% DJ EuroSTOXX 50[®] Index, 25% FTSE 100 Index, 25% TOPIX Index, and 10% S&P/ASX 200 Index, including reinvestment of dividends, at a risk level consistent with that of the composite index.

EQ/Money Market Portfolio (sub-advised by Dreyfus, a division of Mellon Investments Corporation ("Dreyfus")) — Seeks to obtain a high level of current income, preserve its assets and maintain liquidity. Effective September 1, 2023, Dreyfus replaced BNY Mellon Investment Adviser, Inc. as the Sub-Adviser to the Portfolio.

Multimanager Aggressive Equity Portfolio (sub-advised by AB, 1832 Asset Management U.S. Inc., T. Rowe Price Associates, Inc. and Westfield Capital Management Company, L.P.) — Seeks to achieve long-term growth of capital.

The following is a summary of the significant accounting policies of the Trust:

The preparation of financial statements in accordance with United States of America generally accepted accounting principles ("U.S. GAAP") requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates. The Portfolios are investment companies and, accordingly, follow the Investment Company accounting and reporting guidance of the Financial Accounting Standards Board Accounting Standards Codification Topic 946 — Investment Companies, which is part of U.S. GAAP.

Valuation:

Equity securities (including securities issued by exchange-traded funds ("ETFs")) listed on national securities exchanges are generally valued at the last sale price or official closing price on the date of valuation or, if there is no sale or official closing price, at the latest available bid price. Securities listed on the NASDAQ stock market will be valued using the NASDAQ Official Closing Price ("NOCP"). Other unlisted stocks are generally valued at their last sale price or official closing price, or if there is no such price, at a bid price estimated by a broker.

Corporate bonds and notes are generally valued on the basis of prices provided by a pricing service. The pricing services may utilize many inputs that are observable in making evaluations which may include, but are not limited to, trading activity for similar securities, issuer details, yields, default rates, credit spreads, quoted prices and any developments related to the specific securities. However, when such prices are not available, such bonds and notes are generally fair valued at a bid price estimated by a broker.

Convertible bonds are generally valued using prices obtained from a pricing service for such investments or, if a pricing service price is not available, fair valued at bid prices obtained from one or more of the major dealers in such bonds. Convertible bonds may be matrix-priced based upon the conversion value to the underlying common stocks and market premiums.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Mortgage-backed and asset-backed securities are generally valued at evaluated prices obtained from a pricing service where available, or fair valued at a bid price obtained from one or more of the major dealers in such securities. The pricing service may utilize data such as issuer type, coupon, cash flows, collateral performance, mortgage prepayment projection tables and Adjustable Rate Mortgage evaluations that incorporate index data, periodic and life caps, the next coupon reset date and the convertibility of the bond in making evaluations. If a quoted price is unavailable, an equivalent yield or yield spread quotes may be obtained from a broker and converted to a price.

U.S. Treasury securities and other obligations issued or guaranteed by the U.S. Government, its agencies or instrumentalities, are generally valued at prices obtained from a bond pricing service where available. The pricing service may utilize data received from active market makers and broker-dealers, yield curves and the spread over comparable U.S. Treasury issues in making evaluations. Debt securities with original or remaining maturities of 60 days or less may be valued at amortized cost.

Foreign securities, including foreign government securities, not traded directly in the U.S., or traded in American Depositary Receipts ("ADR") or similar form, are generally valued at representative quoted prices from the primary exchange in the currency of the country of origin. Foreign currency is converted into U.S. dollar equivalent at current exchange rates.

Investments in shares of open-end investment companies (other than ETFs) held by a Portfolio are generally valued at the net asset value ("NAV") of the shares of such funds as described in the underlying funds' prospectuses.

Futures contracts are generally valued at their last settlement price or, if there is no sale, at the latest available bid price.

Forward foreign currency contracts are generally valued by interpolating between the forward and spot currency rates as quoted by a pricing service as of a designated hour on the valuation date. The pricing service may utilize data such as actual trading information and foreign currency rates gathered from leading market makers and foreign currency trading centers throughout the world in making evaluations. Forward foreign currency contracts may be settled with the counterparty in U.S. dollars without the delivery of foreign currency.

Swap agreements are two party contracts entered into primarily by institutional investors for periods ranging from a few weeks to more than one year. Swaps are marked-to-market daily based upon values from third party vendors, which may include a registered exchange, or quotations from market makers to the extent available. In the event that market quotes are not readily available and the swap cannot be valued pursuant to one of the valuation methods, the fair value of the swap will be determined in good faith by the Trust's Valuation Committee (as discussed below).

Securities for which market quotations are readily available are valued at their market value. All other securities are valued at their fair value, as determined in good faith by the Board of the Trust. In accordance with Rule 2a-5 under the Investment Company Act of 1940, as amended, the Board has designated EIM, the investment adviser to the Trust, as its valuation designee (the "Valuation Designee"). As Valuation Designee, EIM, subject to the oversight of the Board, is responsible for making fair valuation determinations in accordance with procedures (the "Pricing Procedures") approved by the Board. EIM's day-to-day responsibilities as Valuation Designee are performed by a valuation committee established by EIM (the "Committee").

EIM has appointed EIM II (the "Administrator") to oversee the calculation of the NAV of the Portfolios and their respective share classes. The Administrator has entered into a sub-administration agreement with JPMorgan Chase Bank, N.A. (the "Sub-Administrator") to assist in performing certain duties, including the calculation of the Portfolios' NAVs.

Due to the inherent uncertainty of the valuation of securities for which market quotations are not readily available, the fair value of such securities may differ significantly from the values that would have been used had a ready market for such securities existed.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Various inputs are used in determining the value of each Portfolio's assets or liabilities carried at fair value. These inputs are summarized in three broad levels below:

- Level 1 quoted prices in active markets for identical assets
- Level 2 other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3 significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments)

A summary of inputs used to value each Portfolio's assets and liabilities carried at fair value as of December 31, 2023, is included in the Portfolio of Investments for each Portfolio. Changes in valuation techniques may result in transfers in or out of an investment's assigned level.

Transfers into and transfers out of Level 3 are included in the Level 3 reconciliation following the Portfolio of Investments for each Portfolio, if any. Transfers between levels may be due to a decline, or an increase, in market activity (e.g., frequency of trades), which may result in a lack of, or increase in, available observable market inputs to determine price.

The inputs or methodology used to fair value securities are not necessarily an indication of the risk associated with investing in those securities. An investment's level within the fair value hierarchy is based on the lowest level of any input, both individually and in the aggregate, that is significant to the fair value measurement.

The Committee has the ability to meet and review reports based on the valuation techniques used to fair value Level 3 securities. As part of a review, the Committee would consider obtaining updates from its pricing vendors and Sub-Advisers for fair valued securities. For example, with respect to model driven prices, the Committee could receive reports regarding a review and recalculation of pricing models and related discounts. For those securities which are valued based on broker quotes, the Committee may evaluate variances between existing broker quotes and any alternative broker quotes provided by a Sub-Adviser or other pricing source.

To substantiate unobservable inputs used in a fair valuation, the Committee may perform an independent verification as well as additional research for fair value notifications received from the pricing agents. Among other factors, particular areas of focus may include: description of security, historical pricing, intra-day price movement, last trade information, corporate actions, related securities, any available company news and announcements, any available trade data or other information. The Committee also notes the materiality of holdings and price changes on a Portfolio's NAV.

The Committee reviews and considers changes in value for all fair valued securities that have occurred since the last review.

All securities held in the EQ/Money Market Portfolio are valued at amortized cost provided that certain conditions are met, including that the Board continues to believe that the amortized cost valuation method fairly reflects the market-based NAV per share of the Portfolio. The EQ/Money Market Portfolio seeks to maintain a constant NAV per share of \$1.00, but there can be no assurance that it will be able to do so.

Events or circumstances affecting the values of Portfolio securities that occur between the closing of their principal markets and the time the NAV is determined may be reflected in the Trust's calculation of a NAV for each applicable Portfolio when the Committee deems that the particular event or circumstance would materially affect such Portfolio's NAV.

Security Transactions and Investment Income:

Securities transactions are recorded on the trade date net of brokerage fees, commissions, and transfer fees. Dividend income (net of withholding taxes) and distributions to shareholders are recorded on the ex-dividend date, except that certain dividends from foreign securities, if any, are

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

recognized as soon as the Portfolio is informed of the ex-dividend date. Non-cash dividends, if any, are recorded at the market value or fair value, as applicable, of the asset received. Interest income (including amortization of premium and accretion of discount on long-term securities using the effective yield method) and interest expense are accrued daily. The Trust records paydown gains and losses realized on prepayments received on mortgage-backed securities as an adjustment to interest income.

The Portfolios record distributions received in excess of income from underlying investments as a reduction of cost of investments and/or realized gain. Those classified as short-term gain distributions are reflected as such for book but as ordinary income for tax. Such amounts are based on estimates if actual amounts are not available and actual amounts of income, realized gain and return of capital may differ from the estimated amounts. The Portfolios adjust the estimated amounts of components of distributions (and consequently its net investment income) as necessary once the issuers provide information about the actual composition of the distributions.

Realized gains and losses on the sale of investments are computed on the basis of the specific identified cost of the investments sold. Unrealized appreciation (depreciation) on investments and foreign currency denominated assets and liabilities, if any, is presented net of deferred taxes on unrealized appreciation in the Statements of Assets and Liabilities.

Foreign Taxes:

The Portfolio may be subject to foreign taxes on dividend and interest income, gains on investments or currency purchase/repatriation, all or a portion of which may be recoverable. Each Portfolio applies for refunds where available. The Portfolio will accrue such taxes and recoveries as applicable, based on their current interpretation of the tax rules and regulations that exist in the markets in which they invest.

As a result of several court rulings in certain European countries, the Portfolio may also file withholding tax reclaims in certain jurisdictions to recover all or a portion of amounts withheld in prior period that may now be reclaimable. Any payments received on such withholding tax reclaims are included in Other Income in the Statements of Operations and are recorded when the amount is known and there are no significant uncertainties on collectability.

Capital Gains Taxes:

Certain Portfolios may be subject to capital gains and repatriation taxes imposed by certain countries in which they invest. These Portfolios have recorded a deferred tax liability with respect to unrealized appreciation on foreign securities for potential capital gains and repatriation taxes at December 31, 2023. The accrual for capital gains and repatriation taxes is included in net unrealized appreciation (depreciation) on investments in the Statements of Assets and Liabilities for the Portfolios. The amounts related to capital gain taxes for securities that have been sold are included in the net realized gain (loss) on investments in the Statements of Operations for the Portfolios.

Allocation of Expenses and Income:

Expenses attributable to a single Portfolio or class are charged to that Portfolio or class. Expenses of the Trust not attributable to a single Portfolio or class are charged to each Portfolio or class in proportion to the average net assets of each Portfolio or other appropriate allocation methods.

All income earned and expenses incurred by each Portfolio are borne on a pro-rata basis by each outstanding class of shares, based on the proportionate interest in the Portfolio represented by the daily net assets of such class, except for distribution fees which are charged on a class specific basis.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Foreign Currency Valuation:

The books and records of the Trust are kept in U.S. dollars. Foreign currency amounts are translated into U.S. dollars at current exchange rates at the following dates:

(i) Market value or fair value, as applicable, of investment securities, other assets and liabilities — at the valuation date.

(ii) Purchases and sales of investment securities, income and expenses — at the date of such transactions.

The Portfolios do not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss on investments.

Reported realized foreign currency gains and losses arise from the disposition of foreign currency, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on each Portfolio's books on the transaction date and the U.S. dollar equivalent of the amounts actually received or paid. These reported realized foreign currency gains and losses are included in Net realized gain (loss) on foreign currency transactions on the Statements of Operations. Unrealized foreign currency gains and losses arise from changes (due to changes in exchange rates) in the value of foreign currency and other assets and liabilities denominated in foreign currencies, which are held at period end and are included in Change in net unrealized appreciation/depreciation on foreign currency translations on the Statements of Operations.

Taxes:

Each Portfolio intends to comply with the requirements of the Internal Revenue Code of 1986, as amended applicable to regulated investment companies ("RICs") and to distribute substantially all of its net investment income and net realized capital gains to shareholders of each Portfolio. Therefore, no federal, state and local income tax provisions are required.

The Portfolios are not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months. However, the Portfolios' conclusions may be subject to future review based on changes in, or the interpretation of, the accounting standards or tax laws and regulations. The Portfolios recognize interest and penalties, if any, related to uncertain tax positions as income tax expense in the Statements of Operations. During the year ended December 31, 2023, the Portfolios did not incur any interest or penalties. Each of the tax years in the four-year period ended December 31, 2023 remains subject to examination by the Internal Revenue Service, state and local taxing authorities.

Dividends from net investment income, if any, are declared and distributed at least annually for all Portfolios (EQ/Money Market declares and distributes daily). Dividends from net realized short-term and long-term capital gains are declared and distributed at least annually to the shareholders of a Portfolio to which such gains are attributable. All dividends are reinvested in additional full and fractional shares of the related Portfolios. All distributions are calculated on a tax basis and, as such, the amounts may differ from financial statement investment income and realized gains. For the Portfolios, the cumulative significant differences related to the tax composition of undistributed ordinary income and long term gains are primarily due to 1256 mark to market contracts (EQ/Core Plus Bond and Multimanager Aggressive Equity), capital loss carryforwards (EQ/Core Plus Bond and EQ/International Equity Index), deferral of losses on offsetting positions (EQ/Core Plus Bond and Multimanager Aggressive Equity), investments in passive foreign investment companies (EQ/ International Equity Index), and wash sale loss deferrals (Multimanager Aggressive Equity). In addition, short-term capital gains and foreign currency gains are treated as capital gains for U.S. GAAP purposes but are considered ordinary income for tax purposes. The tax character of

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

distributions for the years ended December 31, 2023 and December 31, 2022 and the tax composition of undistributed ordinary income and undistributed long-term gains at December 31, 2023 are presented in the following table:

	Year Ended Dec	cember 31, 2023 As of December 31, 2023 Year Ended December 3		As of December 31, 2023		ember 31, 2022
Portfolios:	Distributed Ordinary Income	Distributed Long Term Gains	Accumulated Undistributed Ordinary Income	Accumulated Undistributed Long Term Gains	Distributed Ordinary Income	Distributed Long Term Gains
EQ/Moderate Allocation	\$106,497,397	\$116,108,982	\$ 634,706	\$79,858,393	\$75,505,542	\$462,107,352
EQ/Common Stock Index	70,072,707	255,762,570	2,415,078	66,565,218	49,052,756	340,394,545
EQ/Core Plus Bond	18,521,956		6,720,528	—	20,126,587	574,709
EQ/International Equity Index	45,181,812	_	5,971,162	—	36,843,100	—
EQ/Money Market	88,923,225			—	18,666,234	
Multimanager Aggressive Equity	5,146,300	30,820,220	382,353	41,243,375	662,070	176,300,499

None of the Portfolios had a Return of Capital during the years ended December 31, 2023 or December 31, 2022.

Permanent book and tax differences resulted in reclassifications to undistributed net investment income (loss), accumulated net realized gain (loss) and paid-in-capital at December 31, 2023 as follows:

Portfolios:	Undistributed Net Investment Income (Loss) (a)	Accumulated Net Realized Gain (Loss) (a)	Paid In Capital
EQ/Moderate Allocation	\$ 7,718,036	\$ (7,718,036)	\$ —
EQ/Common Stock Index	(920,823)	890,618	30,205
EQ/Core Plus Bond	(15,681,807)	15,668,970	12,837
EQ/International Equity Index	427,579	(2,364,736)	1,937,157
EQ/Money Market	—	—	
Multimanager Aggressive Equity	8,869	12,752	(21,621)

(a) These components of net assets are included in Total Distributable Earnings (Loss) in the Statement of Assets and Liabilities.

To the extent book and tax differences in shareholder distributions are permanent in nature, such amounts are reclassified within the capital accounts based on their Federal tax basis treatment. Permanent book and tax differences resulted in reclassifications to undistributed net investment income (loss), accumulated net realized gain (loss) and paid-in-capital at December 31, 2023 as follows: reclassification of gain and losses from foreign currency transactions (EQ/Core Plus Bond).

Net capital and net specified gains/losses incurred after October 31, and within the taxable year are deemed to arise on the first business day of the Portfolio's next taxable year. For the year ended December 31, 2023, the following Portfolio deferred to January 1, 2024 post- October losses of:

Portfolio:	Specified Loss		Long-Term Capital Loss (gain)
EQ/International Equity Index	\$	\$ (533,223)	\$ 3,242,656

The following Portfolios utilized net capital loss carryforwards during 2023 and/or have losses incurred that will be carried forward indefinitely as follows:

	Util	ized	Losses carried forward		
Portfolios:	Short Term	Long Term	Short Term	Long Term	
EQ/Core Plus Bond	\$	\$	\$ 46,014,767	\$ 46,049,905	
EQ/International Equity Index	3,454,702	14,164,248	619,202	43,611,858	

A portion of EQ/Core Plus Bond capital loss carryforward is subject to an annual limitation under the Internal Revenue Code and related regulations.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Accounting for Derivative Instruments:

Following is a description of how and why the Portfolios use derivative instruments, the type of derivatives utilized by the Portfolios during the reporting period, as well as the primary underlying risk exposures related to each instrument type. Derivatives accounted for as hedging instruments must be disclosed separately from those that do not qualify for hedge accounting. Even though the Portfolios may use derivatives in an attempt to achieve an economic hedge, the Portfolio's derivatives are not accounted for as hedging instruments because the Portfolios account for their derivatives at fair value and record any changes in fair value in current period earnings in the Statement of Operations. All open derivative positions at period end are reflected on each respective Portfolio's Portfolio of Investments. The volume of derivative activity, based on month-end notional amounts during the period is also noted in each respective Portfolio's Portfolio securities are reserved and/or pledged with the custodian as collateral for current or potential derivative holdings as necessary throughout the year.

Futures Contracts and Foreign Currency Contracts:

The futures contracts used by the Portfolios are agreements to buy or sell a financial instrument for a set price in the future. Certain Portfolios buy or sell futures contracts for the purpose of protecting their Portfolio securities against future changes in interest rates and indices which might adversely affect the value of the Portfolios' securities or the price of securities that they intend to purchase at a later date. Initial margin deposits are made upon entering into futures contracts and can be in cash, certain money market instruments, treasury securities or other liquid, high grade debt securities. During the period the futures contracts are open, changes in the market price of the contracts are recognized as unrealized gains or losses by "marking-to-market" at the end of each trading day. Variation margin payments on futures contracts are received or made, depending upon whether unrealized gains or losses are incurred. When the contract is closed, the Portfolio records a realized gain or loss equal to the difference between the proceeds from or cost of the closing transactions and the Portfolio's basis in the contract. The Portfolios enter into futures contracts only on exchanges or boards of trade. The exchange or board of trade acts as the counterparty to each futures transaction; therefore, a Portfolio's credit risk is limited to failure of the exchange or board of trade.

During the year ended December 31, 2023, certain Portfolios held forward foreign currency contracts to either gain exposure to certain currencies or enter into an economic hedge against changes in the values of securities held in the Portfolio that do not qualify for hedge accounting under Accounting Standards Codification ("ASC") 815. The Statement of Operations for each Portfolio reflects realized gains or losses, if any, in forward currency transactions and change in unrealized gains or losses in forward foreign currency transactions. Further information on the impact of these positions on the Portfolios' financial statements can be found in the Statement of Operations and Portfolio of Investments for each Portfolio.

The Portfolios may be exposed to foreign currency risks associated with Portfolio investments. Certain Portfolios may purchase foreign currency on a spot (or cash) basis. In addition, certain Portfolios enter into contracts to purchase or sell foreign currencies at a future date ("forward contracts"). A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Daily fluctuations in the value of such contracts are recognized as unrealized appreciation or depreciation by "marking-to-market." The gain or loss arising from the difference between the original contracts and the closing of such contracts is included in realized gains or losses from forward foreign currency transactions in the Statements of Operations of the Portfolios. The Portfolios may engage in these forward contracts to protect against uncertainty in the level of future rates in connection with the purchase and sale of Portfolio securities ("transaction hedging") and to protect the value of specific portfolio positions ("position hedging"). The Portfolios also buy forward foreign currency contracts to gain exposure to currencies.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Swap Agreements:

Changes in market value or fair value, as applicable, if any, are reflected as a component of net changes in unrealized appreciation/(depreciation) on the Statements of Operations. Daily changes in valuation of centrally cleared swaps, if any, are recorded as a receivable or payable for the change in value as appropriate ("variation margin") on the Statements of Assets and Liabilities. Over-the-counter ("OTC") swap payments received or made at the beginning of the measurement period are reflected as such on the Statements of Assets and Liabilities and represent premiums paid or received upon entering into the swap agreement to compensate for differences between the stated terms of the swap agreement and prevailing market conditions (credit spreads, currency exchange rates, interest rates, and other relevant factors). These upfront premiums are recorded as realized gains or losses on the Statements of Operations upon termination or maturity of the swap. A liquidation payment received or made at the termination of the swap is recorded as realized gains or losses on the Statements of Operations. Net periodic payments received or paid by the Portfolio are included as part of realized gains or losses on the Statements of Operations.

Total return swap agreements involve commitments where cash flows are exchanged based on the price of an underlying reference and based on a fixed or variable rate. Total return swap agreements may involve commitments to pay interest in exchange for a market-linked return. One counterparty pays out the total return of a specific reference asset, which may include an underlying equity, index, or bond, and in return receives a fixed or variable rate. At the maturity date, a net cash flow is exchanged where the total return is equivalent to the return of the underlying reference less a financing rate, if any. As a receiver, the Portfolio would receive payments based on any positive total return and would owe payments in the event of a negative total return. As the payer, the Portfolio would owe payments on any net positive total return, and would receive payment in the event of a negative total return. In connection with total return swap agreements, securities or cash may be identified as collateral or margin in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Interest rate swaps involve the exchange between two parties of payments calculated by reference to specified interest rates (e.g., an exchange of floating rate payments for fixed rate payments). The purchase of an interest rate cap entitles the purchaser, to the extent that a specified index exceeds a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest rate cap. The purchase of an interest rate floor entitles the purchaser, to the extent that a specified index falls below a predetermined interest rate, to receive payments of interest on a notional principal amount from the party selling such interest nate floor floating floating such interest rate floor. Caps and floors may be less liquid than swaps. In addition, the value of interest rate transactions will fluctuate based on changes in interest rates.

Credit default swap agreements involve greater risks than if a Portfolio had invested in the reference obligation directly since, in addition to general market risks, credit default swaps are subject to illiquidity risk, counterparty risk and credit risk. A Portfolio will enter into credit default swap agreements only with counterparties that meet certain standards of creditworthiness. A buyer generally also will lose its investment and recover nothing should no credit event occur and the swap is held to its termination date. If a credit event were to occur, the value of any deliverable obligation received by the seller, coupled with the upfront or periodic payments previously received, may be less than the full notional value it pays to the buyer, resulting in a loss of value to the seller. A Portfolio's obligations under a credit default swap agreement will be accrued daily (offset against any amounts owing to the Portfolio). In connection with credit default swaps in which a Portfolio is the buyer, the Portfolio will segregate or "earmark" cash or assets determined to be liquid, or enter into certain offsetting positions, with a value at least equal to the Portfolio's exposure (any accrued but unpaid net amounts owed by the Portfolio to any counterparty), on a marked-to-market basis. In connection with credit default swaps in which a Portfolio is the seller, the Portfolio will segregate or "earmark" cash or assets determined to be liquid, or enter into offsetting positions, with a value at least equal to the full notional amount of the swap (minus any amounts owed to the Portfolio). Such segregation or "earmarking" is intended to ensure that the Portfolio has assets available to satisfy its

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

obligations with respect to the transaction and limit any potential leveraging of the Portfolio. Such segregation or "earmarking" will not limit the Portfolio's exposure to loss. To the extent that credit default swaps are entered into for hedging purposes or are covered as described above, the Adviser believes such obligations do not constitute "senior securities" under the 1940 Act and, accordingly, will not treat them as being subject to the Portfolio's senior security and borrowing restrictions.

An option on a swap agreement, also called a "swaption," is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market based "premium." A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. A purchaser of a swaption risks losing only the amount of the premium they have paid should they decide to let the option expire, whereas the seller of a swaption is subject to the risk that they will become obligated if the option is exercised. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

A Portfolio may use inflation-linked swaps to provide inflation protection within its portfolio. These are agreements between counterparties to exchange interest payments based on interest rates over the life of the swap. One cash flow stream will typically be a floating rate payment based upon the Consumer Price Index while the other is a pre-determined fixed interest rate. The use of swaps exposes the Portfolio to interest rate risk. Swaptions are marked-to-market daily based upon values from third party vendors.

Forward settling transactions:

Certain Portfolios may make contracts to purchase or sell securities for a fixed price at a future date beyond customary settlement time ("forward settling transactions"). Portfolios may designate the segregation, either on their records or with the Trust's custodian, of cash or other liquid securities in an amount sufficient to meet the purchase price, or may enter into offsetting contracts for the forward sale of other securities they own. These commitments are reported at market value or fair value, as applicable, in the financial statements. Forward settling transaction may be considered securities in themselves and involve a risk of loss if the value of the security to be purchased declines or if the value of the security to be sold increases prior to the settlement date, which is a risk in addition to the risk of decline in the value of the Portfolio's other assets. Where such purchases or sales are made through dealers, a Portfolio relies on the dealer to consummate the sale. The dealer's failure to do so may result in the loss to a Portfolio of an advantageous yield or price. Market risk exists on these commitments to the same extent as if the securities were owned on a settled basis and gains and losses are recorded and reported in the same manner. However, during the commitment period, these investments earn no interest or dividends.

Certain Portfolios may enter into to-be-announced purchase or sale commitments ("TBA transactions"), pursuant to which it agrees to purchase or sell, respectively, mortgage backed securities for a fixed unit price, with payment and delivery at a scheduled future date beyond the customary settlement period for such securities. With TBA transactions, the particular securities to be received or delivered by a Portfolio are not identified at the trade date; however, the securities must meet specified terms, including issuer, rate, and mortgage term, and be within industry-accepted "good delivery" standards. Portfolios may enter into TBA transactions with the intention of taking possession of or relinquishing the underlying securities, may elect to extend the settlement by "rolling" the transaction, and/or may use TBA transactions to gain or reduce interim exposure to underlying securities. Until settlement, the portfolio maintains liquid assets sufficient to settle its commitment to purchase a TBA or, in the case of a sale commitment, the portfolio maintains an entitlement to the security to be sold.

Master netting arrangements and collateral:

International Swaps and Derivatives Association, Inc. Master Agreements ("ISDA Master Agreements") govern bilateral OTC derivative transactions entered into by the Sub-Advisers on behalf of the Portfolios with select counterparties. ISDA Master Agreements maintain provisions for

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

general obligations, representations, agreements, collateral posting and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to terminate early could be material to the financial statements. In limited circumstances, the ISDA Master Agreement may contain additional provisions that add counterparty protection beyond coverage of existing daily exposure if the counterparty has a decline in credit quality below a predefined level. These amounts, if any, may be segregated with a third-party custodian. The market value of OTC financial derivative instruments, collateral received or pledged, and net exposure by counterparty as of period end are disclosed in the Portfolio of Investments.

Master Securities Forward Transaction Agreements ("Master Forward Agreements") govern certain forward settling transactions, such as TBA transactions, delayed-delivery or sale-buybacks by and between the Sub-Advisers on behalf of the Portfolios and select counterparties. The Master Forward Agreements maintain provisions for, among other things, transaction initiation and confirmation, payment and transfer, events of default, termination, and maintenance of collateral. The market value of forward settling transactions, collateral pledged and/or received, and the net exposure by counterparty as of period end is disclosed in the Portfolio of Investments.

ISDA Master Agreements and Master Forward Agreements are intended to reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that is intended to improve legal certainty. Under most ISDA Master Agreements and Master Forward Agreements, collateral is routinely pledged if the total net exposure to certain transactions (net of existing collateral already in place) governed under the relevant master agreement with a counterparty in a given account exceeds a specified threshold, which typically ranges from zero to \$250,000 (on a per counterparty basis) depending on the counterparty and the type of master agreement.

Collateral on OTC derivatives, forward settling transactions and centrally cleared derivatives may be in the form of cash or debt securities issued by the U.S. government or related agencies or foreign governments. Cash pledged as collateral by a Portfolio is reflected as cash held as collateral at the broker in the accompanying financial statements and generally is restricted from withdrawal by the Portfolio; securities pledged as collateral by a Portfolio are so noted in the accompanying Portfolio of Investments; both remain in the Portfolio's assets. Securities received as collateral by counterparties are not included in the Portfolio's assets because the Portfolio does not obtain effective control over those securities. The obligation to return cash collateral received from counterparties is included as a liability in the accompanying financial statements. Collateral posted or received by the Portfolio may be held in a segregated account at the respective counterparty or Portfolio's custodian.

Repurchase Agreements:

During the year ended December 31, 2023, the EQ/Money Market Portfolio entered into repurchase agreements through an account at JPMorgan Chase Bank, N.A. ("JPMorgan"), the Portfolio's custodian, the daily aggregate balance of which is invested in one or more joint repurchase agreements collateralized by U.S. Treasury or federal agency obligations. In a repurchase agreement, the seller of a security agrees to repurchase the security at a mutually agreed-upon time and price, which reflects the effective rate of return for the term of the agreement. For a repurchase agreement, JPMorgan takes possession of the collateral pledged for investments in such repurchase agreement. The underlying collateral is valued daily on a mark-to-market basis to ensure that the value is equal to or greater than the repurchase price, including accrued interest. In the event of default of the obligation to repurchase, the Portfolio has the right to liquidate the collateral and apply the proceeds in satisfaction of the obligation. If the seller defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Portfolio may be delayed or limited.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Repurchase agreements outstanding at period end, if any, including the underlying debt obligation (collateral) assigned to each agreement, are included within the Portfolio's Portfolio of Investments.

Securities Lending:

During the year ended December 31, 2023, certain Portfolios entered into securities lending transactions. To generate additional income, a Portfolio may lend its portfolio securities, up to 30% of the market value of the Portfolio's total assets, to brokers, dealers, and other financial institutions.

JPMorgan serves as securities lending agent for the securities lending program of the Trust. Securities lending transactions are considered to be overnight and continuous and can be terminated by a Portfolio or the borrower at any time.

The Portfolios' securities lending policies and procedures require that the borrower (i) deliver collateral consisting of cash or U.S. Government securities equal to at least 102% of the value of the portfolio securities loaned with respect to each new loan of U.S. securities, and equal to at least 105% of the value of the portfolio securities loaned with respect to each new loan of non-U.S. securities; and, for loans of U.S. Treasury securities, collateral equal to the lesser of 102% of the loaned securities' current market value or 100% of the loaned securities' par value; (ii) at all times thereafter mark-to-market the collateral on a daily basis so that the market value of such collateral is at least 100% of the value of securities loaned. Cash collateral received is permitted to be invested in short-term, highly liquid investments, such as government money market funds and repurchase agreements, and shown in the Portfolio of Investments and included in calculating the Portfolio's total assets. U.S. Government securities received as collateral, if any, are held in safekeeping by JPMorgan and cannot be sold or repledged by the Portfolio and accordingly are not reflected in the Portfolio's total assets. For additional information on the non-cash collateral received, please refer to note (xx) in the Portfolio of Investments. Certain of the securities on loan may have been sold prior to the close of the reporting period and are included in Receivables for Securities Sold on the Statements of Assets and Liabilities.

The Portfolios receive payments from the lending agent equivalent to any dividends and/or interest that would have been earned on the securities loaned while simultaneously seeking to earn income on the investment of cash collateral. Securities lending income includes any fees charged to borrowers less expenses associated with the loan. Income from the securities lending program is recorded when earned from the lending agent and reflected in the Statements of Operations under "Securities lending (net)." The Portfolios may invest cash collateral in government money market funds or repurchase agreements as indicated on the Portfolio of Investments, and record a liability in the Statements of Assets and Liabilities for the return of the collateral, during the period the securities are on loan. Such liabilities, if any, are reflected in the Statements of Assets and Liabilities under "Payable for return of collateral on securities loaned". There may be risks of delay or restrictions in recovery of the securities or disposal of collateral should the borrower of the securities fail financially. Loans are made, however, only to borrowers deemed by the lending agent to be of good standing and creditworthy and approved by EIM. Loans are subject to termination by a Portfolio or the borrower at any time, and, therefore, are not considered to be illiquid investments. The lending agent receives a fee based on a percentage of earnings derived from the investment of cash collateral. The Portfolios receive 90% of the net earnings from the securities lending program up to \$45 million of aggregate earnings across all Portfolios within a calendar year and 92% thereafter.

The Securities Lending Agreement between the Trust and JPMorgan provides that in the event of a default by a borrower with respect to any loan, a Portfolio may terminate the loan and JPMorgan will exercise any and all remedies provided under the applicable borrower agreement to make the Portfolio whole. These remedies include purchasing replacement securities by applying the collateral held from the defaulting borrower against the purchase cost of the replacement securities. If, despite such efforts by JPMorgan to exercise these remedies, the Portfolio sustains losses as a

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

result of a borrower's default, JPMorgan indemnifies the Portfolio by purchasing replacement securities at JPMorgan's expense, or paying the Portfolio an amount equal to the market value of the replacement securities, subject to certain limitations which are set forth in detail in the Securities Lending Agreement between the Portfolio and JPMorgan.

At December 31, 2023, the Securities Lending Agreement does not permit the Portfolio to enforce a netting arrangement.

Effective June 2, 2023, the EQ/Money Market Portfolio no longer participates in the Trust's securities lending program.

Market, Credit and Other Risks:

A Portfolio's investments in financial instruments expose the Portfolio to various risks such as, but not limited to, market, interest rate, foreign currency, foreign securities, forward settling transactions, equity, and credit risks.

The market values of a Portfolio's investments may decline due to factors that are specifically related to a particular company or issuer, as well as general market conditions, such as real or perceived adverse economic or political conditions, changes in the general outlook for corporate earnings, inflation rates and/or investor expectations concerning such rates, changes in interest rates or currency rates, recessions or adverse investor sentiment generally. The market values of a Portfolio's investments may also decline due to factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry. During a general downturn in the securities markets, multiple asset classes may decline in value simultaneously. Even when markets perform well, there is no assurance that the investments held by a Portfolio will increase in value along with the broader market. World markets, or those in a particular region, may all react in similar fashion to important economic, political or other developments. Events such as environmental and natural disasters or other catastrophes, public health crises (such as the COVID-19 pandemic, which has caused significant global market disruptions), social unrest, and cybersecurity incidents, and governments' reactions (or failure to react) to such events, could cause uncertainty in the markets and may adversely affect the performance of the global economy. Geopolitical and other events, including terrorism, tensions, war or other open conflicts between nations, or political or economic dysfunction within some nations that are global economic powers or major producers of oil, may lead to overall instability in world economies and markets generally and have led, and may in the future lead, to increased market volatility and may have adverse long-term effects. Impacts from climate change may include significant risks to global financial assets and economic growth.

Changes in government or central bank policies and political events within the United States and abroad may affect investor and consumer confidence and may adversely impact financial markets and the broader economy, perhaps suddenly and to a significant degree. High public debt in the United States and other countries creates ongoing systemic and market risks and policymaking uncertainty, and may negatively affect economic conditions and the value of market, sectors, or companies in which a Portfolio invests.

Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates. When nominal interest rates decline, the value of certain fixed-income securities held by a Portfolio generally rises. Conversely, when nominal interest rates rise, the value of certain fixed income securities held by a Portfolio generally decreases. A nominal interest rate can be described as the sum of a real interest rate and an expected inflation rate. Interest rate changes can be sudden and unpredictable, and a Portfolio may lose money if these changes are not anticipated by Portfolio management. A Portfolio may not be able to hedge against changes in interest rates or may choose not to do so for cost or other reasons. In addition, any hedges may not work as intended. Fixed income securities with longer durations tend to be more sensitive to changes in

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

interest rates, usually making them more volatile than securities with shorter durations. Duration is useful primarily as a measure of the sensitivity of a security's market price to interest rate (i.e., yield) movements.

Interest rates were unusually low in recent years in the United States and abroad, but the interest rate environment changed dramatically in 2022 as interest rates moved significantly higher. Aggressive stimulus measures in 2020 and 2021, rising demand for goods and services, tight labor markets, and supply chain disruptions contributed to a surge of inflation in many sectors of the U.S. and global economies. Due to concerns regarding high inflation, the U.S. Federal Reserve and many foreign governments and monetary authorities have raised interest rates and implemented other policy initiatives in an effort to control inflation, and they may continue to do so. It is difficult to predict accurately the timing, frequency, magnitude or direction of further interest rate changes, and the evaluation of macro-economic and other conditions could cause a change in approach in the future. Fixed-income and related markets may continue to experience heightened levels of interest rate volatility. Inflation risk is the uncertainty over the future real value (after inflation) of an investment. A Portfolio's investments may not keep pace with inflation, and the value of an investment in a Portfolio may be eroded over time by inflation. Changes in government or central bank policies could negatively affect the value and liquidity of a Portfolio's investments and cause it to lose money, and there can be no assurance that the initiatives undertaken by governments and central banks will be successful.

Prior to June 30, 2023, many debt securities, derivatives and other financial instruments, including some of the Portfolios' investments, utilized the London Interbank Offered Rate ("LIBOR") as the reference or benchmark rate for variable interest rate calculations; however, LIBOR settings for all maturities and currencies ceased to be published on a representative basis after June 30, 2023. The Secured Overnight Financing Rate ("SOFR") has been selected by a committee established by the Board of Governors of the Federal Reserve System and the Federal Reserve Bank of New York to replace LIBOR as a reference or benchmark rate in the United States. There may be risks associated with using a new reference or benchmark rate with respect to existing or new investments and transactions. The SOFR or other alternative reference or benchmark rate may be an ineffective substitute with respect to an existing or new investment or transaction, resulting in prolonged adverse market conditions for a Portfolio, which could negatively affect a Portfolio's performance and/or net asset value.

If a Portfolio invests directly in foreign currencies or in securities that trade in, and receive revenues in, foreign currencies, or in financial derivatives that provide exposure to foreign currencies, it will be subject to the risk that those currencies will decline in value relative to the base currency of the Portfolio, or, in the case of hedging positions, that the Portfolio's base currency will decline in value relative to the currency being hedged. Currency rates in foreign countries may fluctuate significantly over short periods of time for a number of reasons, including changes in interest rates, intervention (or the failure to intervene) by U.S. or foreign governments, central banks or supranational entities such as the International Monetary Fund, or by the imposition of currency controls or other political developments in the United States or abroad. As a result, a Portfolio's investments in foreign currency denominated securities may reduce the Portfolio's returns. The Portfolios are subject to off-balance sheet risk to the extent of the value of the contracts for purchase of foreign currency and in an unlimited amount for sales of foreign currency.

Foreign (non-U.S.) securities in this report are classified by the country of risk of a holding. Investments in foreign securities, including depositary receipts, involve risks not associated with investment in U.S. securities. Foreign markets may be less liquid, more volatile and subject to less government supervision and regulation than U.S. markets. Differences between U.S. and foreign legal, political and economic systems, regulatory regimes and market practices also may impact security values, and it may take more time to clear and settle trades involving foreign securities. In addition, foreign operations or holding can involve risks relating to conditions in foreign countries.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Russia's military invasion of Ukraine in February 2022, the resulting responses by the United States and other countries, and the potential for wider conflict have had, and could continue to have, severe adverse effects on regional and global economies and could further increase volatility and uncertainty in the financial markets. The United States and other countries have imposed broad-ranging economic sanctions on Russia and certain Russian individuals, banking entities and corporations as a response to its invasion of Ukraine and may impose sanctions on other countries that provide military or economic support to Russia. These events have resulted in, and could continue to result in, significant market disruptions, including in certain industries or sectors such as the oil and natural gas markets, and may further strain global supply chains and negatively affect inflation and global growth. These and any related events could significantly impact a Portfolio's performance and the value of an investment in a Portfolio beyond any direct exposure a Portfolio may have to Russian issuers or issuers in other countries affected by the invasion.

Forward settling transactions and forward foreign currency contracts involve elements of both market and credit risk in excess of the amounts reflected in the Statements of Assets and Liabilities. They are executed directly with the counterparty and not through an exchange and can be terminated only by agreement of both parties to such contracts. With respect to such transactions there is no daily margin settlement. There is also the risk that the security will not be issued or that the other party to the transaction will not meet its obligations. If this occurs, a Portfolio may lose both the investment opportunity for its assets if set aside to pay for the security and any gain in the security. The use of forward settling transaction may result in market risk to the Portfolios that is greater than if the Portfolios had engaged solely in transactions that settle in the customary time.

Should interest rates or indices move unexpectedly, the Portfolio may not achieve the anticipated benefits of the futures contracts and may incur a loss. The use of futures contracts involves the risk of imperfect correlation in movements in the price of futures contracts, interest rates and the underlying hedged assets. Use of long futures contracts subjects the Portfolios to risk of loss in excess of the amounts shown on the Statements of Assets and Liabilities, up to the notional value of the futures contracts. Use of short futures contracts subjects the Portfolios to unlimited risk of loss.

Equity securities and equity related investments generally have greater market price volatility than fixed income securities, although under certain market conditions fixed income securities may have comparable or greater price volatility. In addition, common stock prices may be particularly sensitive to rising interest rates, which increase borrowing costs and the costs of capital.

A Portfolio will be exposed to credit risk to parties with whom it trades and will also bear the risk of settlement default. A Portfolio is subject to the risk that the issuer or guarantor of a fixed income security, or the counterparty to a transaction, is unable or unwilling, or is perceived as unable or unwilling, to make timely interest or principal payments or otherwise honor its obligations, which may cause the Portfolio's holding to lose value. The downgrade of a security's credit rating may decrease its value. Lower credit quality also may lead to greater volatility in the price of a security and may negatively affect a security's liquidity. The credit quality of a security can deteriorate suddenly and rapidly.

Certain Portfolios may invest in below investment grade high-yield securities (commonly known as "junk bonds"). These securities are considered to be high risk investments. Securities rated below investment grade are speculative in nature, involve greater risk of default by the issuing entity and may be subject to greater market fluctuations than higher rated fixed income securities because such securities are generally unsecured and subordinated to other creditors' claims. The retail secondary market for these "junk bonds" may be less liquid than that of higher rated securities and adverse economic conditions could make it difficult to sell certain securities or could result in lower prices than those used in calculating the Portfolio's NAV.

Because certain Portfolios invest in affiliated mutual funds, unaffiliated mutual funds and ETFs, the Portfolios indirectly pay a portion of the expenses incurred by the underlying funds and ETFs. As a result, the cost of investing in the Portfolios may be higher than the cost of investing in a Portfolio

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

that invests directly in individual securities and financial instruments. The Portfolios are also subject to certain risks related to the underlying funds' and ETFs' investments in securities and financial instruments (such as fixed income securities, including high yield, asset-backed and mortgagerelated securities, equity securities, foreign and emerging markets securities, commodities and real estate securities) and the ability of the Portfolio to meet its investment objective will directly depend on the ability of the underlying fund or ETF to meet its investment objective. With respect to the Portfolio's investments in ETFs, there is also the risk that an ETF's performance may not match that of the relevant index. It is also possible that an active trading market for an ETF may not develop or be maintained, in which case the liquidity and value of the Portfolio's investments in the ETF could be substantially and adversely affected. The extent to which the investment performance and risks associated with the Portfolio correlate to those of a particular underlying fund or ETF will depend upon the extent to which the Portfolio's assets are allocated from time to time for investment in the underlying fund or ETF, which will vary.

Offsetting Assets and Liabilities:

The Portfolios may be subject to various netting arrangements with select counterparties ("Master Agreements"). Master Agreements govern the terms of certain transactions, and are intended to reduce the counterparty risk associated with relevant transactions by specifying credit protection mechanisms and providing standardization that is intended to improve legal certainty. As the Master Agreements are specific to unique operations of different asset types; they allow a Portfolio to close out and net its total exposure to counterparty in the event of a default with respect to all the transactions governed under a single Master Agreement with a counterparty. For financial reporting purposes the Statement of Assets and Liabilities generally show derivative assets and liabilities on a gross basis, which reflects the full risks and exposures prior to netting.

Note 2 Management of the Trust

The Trust, on behalf of each Portfolio, has entered into an investment advisory agreement (the "Advisory Agreement") with EIM which provides that the Adviser is responsible for (i) providing a continuous investment program for the Portfolios; (ii) monitoring the implementation of the investment program for each Portfolio; (iii) assessing the investment objectives and policies, composition, investment style and investment process for each Portfolio; (iv) effecting transactions for each Portfolio and selecting brokers or dealers to execute such transactions; (v) developing and evaluating strategic initiatives with respect to the Portfolios; (vi) making recommendations to the Board regarding the investment programs of the Portfolios, including any changes to the investment objectives and policies of a Portfolio; (vii) coordinating and/or implementing strategic initiatives approved by the Board; and (viii) preparing and providing reports to the Board on the impact of such strategic initiatives. For its services under the Advisory Agreement, the Adviser is entitled to receive an annual fee as a percentage of average daily net assets, for each of the following Portfolios, calculated daily and payable monthly as follows:

	(as a percentage of average daily net assets)						
Portfolios:	Firs \$750 M			Next Million	Next \$1 Billion	Next \$2.5 Billion	Thereafter
EQ/Core Plus Bond	0.60	00%	0	.580%	0.560%	0.540%	0.530%
EQ/Money Market	0.350		0	.325	0.280	0.270	0.250
Multimanager Aggressive Equity	0.58	30	0	.550	0.525	0.500	0.475
	(as a percentage of average daily net assets)						
	First Billion	Nex \$1 Bill	-	Next \$3 Billion	Next \$4 Billion	Next \$3 Billion	Thereafter
EQ/Moderate Allocation (0.100%	0.092	25%	0.09009	6 0.08759	6 0.0825%	0.0800%

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

	(as a percentage of average daily net assets)				
Portfolios:	First \$2 Billion	Next \$4 Billion	Next \$2 Billion	Thereafter	
EQ/Common Stock Index EQ/International Equity Index	0.350% 0.400	0.300%	0.275% 0.325	0.250% 0.300	

With the exception of the EQ/Moderate Allocation Portfolio, the Adviser has entered into an investment advisory agreement ("Sub-Advisory Agreements") with each of the Sub-Advisers with respect to the Trust's Portfolios. Each of the Sub-Advisory Agreements obligates the Sub-Advisers for the respective Portfolios to: (i) continuously furnish investment programs for the Portfolios; (ii) place all orders for the purchase and sale of investments for the Portfolios with brokers or dealers selected by the Adviser or the respective Sub-Advisers; and (iii) perform certain limited related administrative functions in connection therewith. The Adviser pays the expenses of investment sub-advisory services provided to the Portfolios, including the fees of the Sub-Advisers.

Indemnification of Trustees and Officers:

Under the Trust's organizational documents, the Trust's officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, in the normal course of business, the Trust enters into contracts with vendors and others that may provide for general indemnifications. A Portfolio's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Portfolio. However, based on experience, the Trust and management expect the risk of loss to be remote.

Compensation of Officers:

Each officer of the Trust is an employee of Equitable Financial, EIM and/or Equitable Distributors, LLC ("Equitable Distributors" or the "Distributor"). No officer of the Trust, other than the Chief Compliance Officer, receives compensation paid by the Trust. During the year ended December 31, 2023, the two trusts in the complex reimbursed EIM for \$290,000 of the Chief Compliance Officer's compensation, including \$287,700* reimbursed by the Trust.

* The total compensation relates to the entire Trust, which includes Portfolios not presented in these financial statements.

Note 3 Administrative Fees

Equitable Investment Management, LLC (the "Administrator"), an affiliate of EIM, serves as Administrator to the Trust. The Administrator provides the Trust with necessary administrative, fund accounting, and compliance services. In addition, the Administrator has access to the office space, equipment, personnel and facilities required to provide such services to the Trust. The Administrator may carry out its responsibilities either directly or through sub-contracting with third party providers. For these services, the Trust pays the Administrator monthly fees, as follows:

The Multiadviser Portfolios, the EQ Allocation Portfolio, and certain other Portfolios not presented in these financial statements, each pay a proportionate share of an asset-based administration fee based on aggregate average daily net assets of the above mentioned Portfolios ("Administration Group 1"), as follows:

0.140% on the first \$60 billion 0.110% on the next \$20 billion 0.0875% on the next \$20 billion 0.0775% on the next \$20 billion

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

0.0750% on the next \$20 billion 0.0725% on net assets thereafter

The asset-based administration fee is calculated and billed monthly, and each Portfolio in Administration Group 1 is subject to a minimum annual fee of \$32,500.

All other Portfolios, including Portfolios not included in these financial statements, ("Administration Group 2") pay a proportionate share of an asset-based administration fee based on aggregate average daily net assets of Administration Group 2 as follows:

0.100% on the first \$30 billion 0.0975% on the next \$10 billion 0.0950% on the next \$5 billion 0.0775% on the next \$10 billion 0.0750% on the next \$30 billion 0.0725% on net assets thereafter

The asset-based administration fee is calculated and billed monthly, and each Portfolio in Administration Group 2 is subject to a minimum annual fee of \$30,000.

Pursuant to a sub-administration arrangement with the Administrator and EIM, the Sub-Administrator assists the Administrator in providing the Trust with certain administrative services, including portfolio compliance and portfolio accounting support services, subject to the supervision of the Administrator.

Note 4 Custody Fees

The Trust has entered into a custody agreement (the "Custody Agreement") with JPMorgan Chase Bank, N.A. (in this capacity, the "Custodian"). The Custody Agreement provides for an annual fee based on the amount of assets under custody plus transaction charges. The Custodian serves as custodian of the Trust's Portfolio securities and other assets. Under the terms of the Custody Agreement between the Trust and the Custodian, the Custodian maintains and deposits in each Portfolio's account, cash, securities and other assets of the Portfolios. The Custodian is also required, upon the order of the Trust, to deliver securities held by the Custodian, and to make payments for securities purchased by the Trust. The Custodian has also entered into sub-custodian agreements with a number of foreign banks and clearing agencies, pursuant to which portfolio securities purchased outside the United States are maintained in the custody of these entities. As of December 31, 2023, certain of the Portfolios maintain significant cash balances with the Custodian or its affiliates. These balances are presented as cash on each Portfolio's Statement of Assets and Liabilities.

Note 5 Distribution Plans

The Trust, on behalf of each Portfolio, has entered into distribution agreements with Equitable Distributors, LLC, an indirect wholly-owned subsidiary of Equitable Financial and an affiliate of EIM, pursuant to which the Distributor serves as the principal underwriter of the Class IA, Class IB and Class K shares of the Trust. The Trust has adopted in the manner prescribed under Rule 12b-1 under the 1940 Act a plan of distribution pertaining to each of Class IA and Class IB shares of the Trust ("Distribution Plans"). The Distribution Plans provide that the Distributor will be entitled to receive a maximum distribution fee at the annual rate of 0.25% of the average daily net assets attributable to the Trust's Class IA and Class IB shares for which it provides service.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Note 6 Expense Limitation

EIM and the Administrator have contractually agreed to limit the expenses of certain Portfolios (exclusive of taxes, interest, brokerage commissions, capitalized expenses, acquired fund fees and expenses (with respect to certain Portfolios) and extraordinary expenses) through April 30, 2025 (unless the Board consents to an earlier revision or termination of this arrangement) ("Expense Limitation Agreement"). Pursuant to the Expense Limitation Agreement, EIM has agreed to waive or limit its and its affiliates' fees and to assume other expenses so that the total annual operating expenses do not exceed the following annual rates:

	Maximum Ann	ual Operating E	xpense Limit
Portfolios:	Class IA+	Class IB+	Class K
EQ/Moderate Allocation	1.15%*	1.15%*	0.90%*
EQ/Common Stock Index	0.67	0.67	0.42
EQ/Core Plus Bond	0.93*	0.93*	0.68*
EQ/International Equity Index	0.72*	0.72*	0.47*
Multimanager Aggressive Equity	1.00	1.00	0.75

* For purposes of calculating the Maximum Annual Operating Expense Limit, Acquired Fund Fees and Expenses are included in Portfolio Operating Expenses.

+ Includes amounts payable pursuant to Rule 12b-1 under the 1940 Act.

Prior to October 1, 2023, EIM had agreed to make payments or waive its management, administrative and other fees so that the annual operating expenses of the EQ/Common Stock Index and EQ/International Equity Index (other than interest, taxes, brokerage commissions, dividend and interest expenses on securities sold short, acquired fund fees and expenses (unless noted), other expenditures that are capitalized in accordance with generally accepted accounting principles and other extraordinary expenses not incurred in the ordinary course of the Portfolio's business), did not exceed the following annualized rates:

	Maximum Ann	ual Operating E	Expense Limit
Portfolios:	Class IA+	Class IB ⁺	Class K
EQ/Common Stock Index	0.68%	0.68%	0.43%
EQ/International Equity Index	0.75*	0.75*	0.50*

* For purposes of calculating the Maximum Annual Operating Expense Limit, Acquired Fund Fees and Expenses are included in Portfolio Operating Expenses.

+ Includes amounts payable pursuant to Rule 12b-1 under the 1940 Act.

Investment advisory fees are waived first, administration fees are waived next, and then EIM reimburses the Portfolio's expenses out of its own resources. Each Portfolio may at a later date reimburse EIM for fees waived (including fees waived by EIM's affiliates, including the Administrator) or other expenses assumed and paid for by EIM pursuant to the Expense Limitation Agreement within three years of payments or waivers being recorded, provided such Portfolio has reached a sufficient asset size to permit such reimbursement to be made without causing the total annual expense ratio of each Portfolio to exceed the percentage limits mentioned above for the respective period. Consequently, no reimbursement by a Portfolio will be made unless the Portfolio's total annual expense ratio is less than the respective percentages stated above for the respective period. Any reimbursement will be based on the earliest fees waived or assumed by EIM.

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

Reimbursements during the period are presented as Recoupment Fees in the Statement of Operations. During the year ended December 31, 2023, EIM received recoupment fees of \$344,830 from the Trust, including from Portfolios not presented in these financial statements, of which \$105,240 was received from the following Portfolio:

Portfolios:	Recoupment Fees
EQ/Common Stock Index	\$105,240

At December 31, 2023, under the Expense Limitation Agreement, the amount eligible for potential recoupment from each Portfolio, and its respective expiration year, is as follows:

Portfolios:	2024	2025	2026	Total Eligible For Recoupment
EQ/Common Stock Index	\$	\$ —	\$1,031,003	\$1,031,003
EQ/Core Plus Bond	454,052	650,219	1,168,418	2,272,689
EQ/International Equity Index	96,260	310,101	900,929	1,307,290

During the year ended December 31, 2023, EIM voluntarily waived fees for certain Portfolios. These amounts are included in voluntary waiver from investment adviser on the Statement of Operations for each Portfolio and are not eligible for recoupment.

Note 7 Percentage of Ownership by Affiliates

Shares of the Portfolios may be held as underlying investments by EQ/All Asset Growth Allocation Portfolio, EQ Allocation Portfolios, and Target Allocation Portfolios. The following tables show the percentage of ownership in net assets of the Portfolios listed held by EQ/All Asset Growth Allocation Portfolio, EQ Allocation Portfolios and Target Allocation Portfolios at December 31, 2023.

The Portfolios are permitted to purchase or sell securities from or to certain affiliated entities under specified conditions outlined in procedures adopted by the Board. The procedures have been designed to ensure that any such securities transactions comply with Rule 17a-7 under the 1940 Act. Further, as defined under the procedures, each transaction is effected at the independent current market price. The 17a-7 transactions which are material to the Portfolios are reflected in the Portfolio of Investments.

Note 8 Reorganization Transactions

The following transactions occurred during 2023:

Effective November 12, 2023, EQ/Moderate Allocation Portfolio acquired the net assets of the EQ/Moderate Allocation Portfolio ("VIP Moderate Allocation Portfolio"), a series of the EQ Premier

NOTES TO FINANCIAL STATEMENTS (Continued) December 31, 2023

VIP Trust, in a shell reorganization. This equated to \$1,521,820,165 net assets attributable to 134,392,316 Class IA shares, \$3,467,917,804 net assets attributable to 309,771,615 Class IB shares and \$236,431,962 net assets attributable to 20,822,346 Class K shares. The reorganization was structured to qualify as a tax-free reorganization under the Internal Revenue Code of 1986. As such, the basis of the assets of the EQ/Moderate Allocation Portfolio reflects the historical basis of the assets of the VIP Moderate Allocation Portfolio as of the date of the reorganization. The EQ/ Moderate Allocation Portfolio had no operating history prior to the reorganization and succeeded to the performance and accounting histories of the VIP Moderate Allocation Portfolio. Accordingly, the VIP Moderate Allocation Portfolio's operating history prior to the reorganization is presented in the EQ/Moderate Allocation Portfolio's financial statements and financial highlights. The VIP Moderate Allocation Portfolio had a substantially identical investment objective, policies and strategies as the EQ/Moderate Allocation Portfolio.

Effective November 12, 2023, EQ/Core Plus Bond Portfolio acquired the net assets of the EQ/ Core Plus Bond Portfolio ("VIP Core Plus Bond Portfolio"), a series of the EQ Premier VIP Trust, in a shell reorganization. This equated to \$131,276,742 net assets attributable to 39,910,984 Class IA shares, \$172,686,560 net assets attributable to 52,697,100 Class IB shares and \$405,778,028 net assets attributable to 122,627,303 Class K shares. The reorganization was structured to qualify as a tax-free reorganization under the Internal Revenue Code of 1986. As such, the basis of the assets of the EQ/Core Plus Bond Portfolio reflects the historical basis of the assets of the VIP Core Plus Bond Portfolio as of the date of the reorganization. The EQ/Core Plus Bond Portfolio had no operating history prior to the reorganization and succeeded to the performance and accounting histories of the VIP Core Plus Bond Portfolio. Accordingly, the VIP Core Plus Bond Portfolio's operating history prior to the reorganization is presented in the EQ/Core Plus Bond Portfolio's financial statements and financial highlights. The VIP Core Plus Bond Portfolio had a substantially identical investment objective, policies and strategies as the EQ/Core Plus Bond Portfolio.

The following transactions occurred during 2022:

After the close of business on November 11, 2022, EO/Common Stock Index Portfolio acquired the net assets of the 1290 VT Low Volatility Global Equity Portfolio, a series of the Trust, pursuant to a Plan of Reorganization and Termination as approved by contractholders on September 28, 2022. For U.S. GAAP purposes, this transaction was treated as a merger. The purpose of this merger was to combine funds managed by EIM with similar investment objectives. The reorganization was accomplished by a taxable exchange resulting in the EQ/Common Stock Index Portfolio issuing 118,063 Class IB shares (valued at \$4,680,495) in exchange for 955,437 Class IB shares of 1290 VT Low Volatility Global Equity Portfolio. Cash, in the amount of \$4,732,023 at November 11, 2022 was the principal asset acquired by EQ/Common Stock Index Portfolio. For U.S. GAAP purposes, assets received and shares issued by EQ/Common Stock Index Portfolio were recorded at fair value. 1290 VT Low Volatility Global Equity Portfolio's net assets at the merger date of \$4,680,495, were combined with those of EQ/Common Stock Index Portfolio. Assuming the acquisition had been completed January 1, 2022, the beginning of the annual reporting period of EQ/Common Stock Index Portfolio, pro forma results of operations for the year ended December 31, 2022 would have resulted in a net investment income of \$60,438,821 and net realized and unrealized loss of \$(1,540,937,327) resulting in a decrease in net assets from operations of \$(1,480,498,506). Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition date, it is not practicable to separate the amounts of revenue and earnings of the 1290 VT Low Volatility Global Equity Portfolio that have been included in EQ/Common Stock Index Portfolio's Statement of Operations since the merger date. Prior to the combination, the net assets of the EQ/Common Stock Index Portfolio totaled \$6,130,013,934. Immediately after the combination, the net assets of the EQ/Common Stock Index Portfolio totaled \$6,134,694,430.

After the close of business on November 11, 2022, EQ/Core Plus Bond Portfolio acquired the net assets of the EQ/Franklin Strategic Income Portfolio, a series of the Trust, pursuant to a Plan of Reorganization and Termination as approved by contractholders on September 28, 2022. For U.S.

NOTES TO FINANCIAL STATEMENTS (Concluded) December 31, 2023

GAAP purposes, this transaction was treated as a merger. The purpose of this merger was to combine funds managed by EIM with similar investment objectives. The reorganization was accomplished by a taxable exchange resulting in the EQ/Core Plus Bond Portfolio issuing 24,388,475 Class B shares (valued at \$83,049,176) in exchange for 9,520,210 Class IB shares EQ/Franklin Strategic Income Portfolio. Cash in the amount of \$83,118,685 in addition to securities held by EO/ Franklin Strategic Income Portfolio which had a fair value of \$1,753 at November 11, 2022, were the principal assets acquired by EQ/Core Plus Bond Portfolio. For U.S. GAAP purposes, assets received and shares issued by EQ/Core Plus Bond Portfolio were recorded at fair value. EQ/Franklin Strategic Income Portfolio's net assets at the merger date of \$83,049,176, were combined with those of EQ/ Core Plus Bond Portfolio. Assuming the acquisition had been completed January 1, 2022, the beginning of the annual reporting period of EO/Core Plus Bond Portfolio, pro forma results of operations for the year ended December 31, 2022 would have resulted in a net investment income of \$22,509,456 and net realized and unrealized loss of \$(130,559,058) resulting in a decrease in net assets from operations of \$(108,049,602). Because the combined investment portfolios have been managed as a single integrated portfolio since the acquisition date, it is not practicable to separate the amounts of revenue and earnings of the EQ/Franklin Strategic Income Portfolio that have been included in EQ/Core Plus Bond Portfolio's Statement of Operations since the merger date. Prior to the combination, the net assets of the EQ/Core Plus Bond Portfolio totaled \$628,158,576. Immediately after the combination, the net assets of the EQ/Core Plus Bond Portfolio totaled \$711,207,752.

Note 9 Subsequent Events

The Adviser evaluated subsequent events from December 31, 2023, the date of these financial statements, through the date these financial statements were issued. There are no subsequent events that require recognition or disclosure in the financial statements.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees of EQ Advisors Trust and Shareholders of each of the six funds listed in the table below

Opinions on the Financial Statements

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of each of the funds listed in the table below (six of the funds constituting EQ Advisors Trust, hereafter collectively referred to as the "Funds") as of December 31, 2023, the related statements of operations for the year ended December 31, 2023, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2023 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of each of the Funds as of December 31, 2023, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the financial highlights for each of the financial highlights for each of the financial highlights for each of the two years in the period ended December 31, 2023, the results of each of their operations for the year then ended, the changes in each of their net assets for each of the two years in the period ended December 31, 2023 and each of the financial highlights for each of the five years in the period ended December 31, 2023 in conformity with accounting principles generally accepted in the United States of America.

EQ/ Moderate Allocation Portfolio	EQ/International Equity Index Portfolio
EQ/Common Stock Index Portfolio	EQ/Money Market Portfolio
EQ/Core Plus Bond Portfolio	Multimanager Aggressive Equity Portfolio

Basis for Opinions

These financial statements are the responsibility of the Funds' management. Our responsibility is to express an opinion on the Funds' financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Funds in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2023 by correspondence with the custodian, transfer agents and brokers; when replies were not received from brokers, we performed other auditing procedures. We believe that our audits provide a reasonable basis for our opinions.

/s/ PricewaterhouseCoopers LLP New York, New York February 16, 2024

We have served as the auditor of one or more investment companies in the Equitable Investment Management advised mutual fund complex since 1997.

EQ ADVISORS TRUST DISCLOSURE REGARDING ADVISORY CONTRACT APPROVALS

APPROVALS OF INVESTMENT ADVISORY AND INVESTMENT SUB-ADVISORY AGREEMENTS DURING THE SIX-MONTH PERIOD ENDED DECEMBER 31, 2023 (UNAUDITED)

Existing Portfolios

At an in-person meeting held on July 18-19, 2023 (the "July 2023 Meeting"), the Board of Trustees (the "Board") of EQ Advisors Trust (the "Trust"), including those Trustees who are not parties to any Agreement (as defined below) or "interested persons" (as that term is defined in the Investment Company Act of 1940, as amended (the "1940 Act")) of such parties or the Trust (the "Independent Trustees"), considered and unanimously approved the renewal of the Investment Advisory Agreement (the "Advisory Agreement") between the Trust and Equitable Investment Management Group, LLC ("EIM" or the "Adviser") and, as applicable, the renewal of the Investment Sub-Advisory Agreement(s) (each, a "Sub-Advisory Agreement" and together with the Advisory Agreement, the "Agreements") between the Adviser and each investment sub-adviser (each, a "Sub-Adviser" and together, the "Sub-Advisers"), as shown in the table below with respect to the series of the Trust (each, a "Portfolio" and together, the "Portfolios") listed below, for an additional one-year term. As noted below, the Board considered, and made a decision with respect to, each Agreement for each Portfolio separately.

- 1 In connection with its consideration and approval of the renewal of the Sub-Advisory Agreement between the Adviser and FIAM with respect to the EQ/Fidelity Institutional AM[®] Large Cap Portfolio, the Board also considered and unanimously approved the renewal of an investment sub-advisory agreement between FIAM and its affiliate. FIAM retains an affiliate to provide certain services to this Portfolio.
- 2 In connection with its consideration and approval of the renewal of the Sub-Advisory Agreement between the Adviser and Morgan Stanley with respect to the EQ/Global Equity Managed Volatility Portfolio, the Board also considered and unanimously approved the renewal of an investment sub-sub-advisory agreement between Morgan Stanley and its affiliate. Morgan Stanley retains an affiliate to provide certain services to this Portfolio.
- 3 In connection with its consideration and approval of the renewal of the Sub-Advisory Agreement between the Adviser and Invesco with respect to the EQ/Invesco Global Real Assets Portfolio, the Board also considered and unanimously approved the renewal of an investment sub-sub-advisory agreement between Invesco and its affiliate. Invesco retains an affiliate to provide certain services to this Portfolio.
- 4 In connection with its consideration and approval of the renewal of the Sub-Advisory Agreement between the Adviser and BFM with respect to the Multimanager Bond Portfolio, the Board also considered and unanimously approved the renewal of investment sub-sub-advisory agreements between BFM and two of its affiliates. BFM retains two affiliates to provide certain services to this Portfolio.
- 5 In connection with its consideration and approval of the renewal of the Sub-Advisory Agreement, the Board also considered and unanimously approved amendments to the agreement to add certain provisions relating to the Sub-Adviser's delegation of advisory responsibilities to sub-sub-advisers.
- 6 Effective on or about July 31, 2023, JPMIM replaced T. Rowe Price as the Sub-Adviser to the EQ/T. Rowe Price Growth Stock Portfolio and an allocated portion of the EQ/Large Cap Growth Managed Volatility Portfolio. In connection with the sub-adviser change, the EQ/T. Rowe Price Growth Stock Portfolio's name was changed to "EQ/JPMorgan Growth Stock Portfolio." A discussion of the process followed by the Board in its approval of the new investment sub-advisory agreement between the Adviser and JPMIM with respect to the EQ/T. Rowe Price Growth Stock Portfolio and the EQ/Large Cap Growth Managed Volatility Portfolio, including the information reviewed, certain material factors considered, and certain related conclusions reached, is provided elsewhere in this shareholder report.
- 7 Sub-Advisory Agreement with T. Rowe Price to be effective only until JPMIM's replacement of T. Rowe Price as the Sub-Adviser to the EQ/ T. Rowe Price Growth Stock Portfolio and an allocated portion of the EQ/Large Cap Growth Managed Volatility Portfolio.
- 8 As discussed below, in connection with its consideration and approval of the renewal of the Sub-Advisory Agreement between the Adviser and BNY Mellon with respect to the EQ/Money Market Portfolio, the Board also considered and unanimously approved a novation agreement among the Adviser, BNY Mellon and BNY Mellon's affiliate Mellon Investments Corporation ("MIC," acting by and through its Dreyfus division), pursuant to which BNY Mellon's rights, liabilities and obligations under the Sub-Advisory Agreement would be transferred to MIC.
- 9 The Board noted that the investment sub-advisory agreement between the Adviser and FIAM with respect to the Multimanager Technology Portfolio, as well as the related investment sub-sub-advisory agreements, were in their initial two-year periods and, as such, the Adviser was not asking the Board to consider the renewal of these agreements with respect to the Portfolio at the meeting.

The Board's consideration of the Agreements for the existing Portfolios is discussed below.

New "Shell" Portfolios

At the July 2023 Meeting, the Board, including the Independent Trustees, also considered and unanimously approved an Investment Advisory Agreement (the "Advisory Agreement") between the Trust and EIM and, as applicable, the Investment Sub-Advisory Agreements (each, a "Sub-Advisory Agreement" and together with the Advisory Agreement, the "Agreements") between the Adviser and each investment sub-adviser (each, a "Sub-Adviser" and together, the "Sub-Advisers"), as shown in the table below with respect to the following new "shell" Portfolios of the Trust. As noted below, the Board considered, and made a decision with respect to, each Agreement for each new shell Portfolio separately.

New "Shell" Portfolios

Agreement(s) Approved by the Trust's Board with respect to the New "Shell" Portfolios

Advisory Agreement with EIM

EQ/Aggressive Allocation Portfolio EQ/Conservative Allocation Portfolio EQ/Conservative-Plus Allocation Portfolio EQ/Moderate Allocation Portfolio EQ/Moderate-Plus Allocation Portfolio (collectively, the "New EQ Allocation Portfolios")

Target 2015 Allocation Portfolio Target 2025 Allocation Portfolio Target 2035 Allocation Portfolio Target 2045 Allocation Portfolio Target 2055 Allocation Portfolio (collectively, the "New Target Allocation Portfolios")

EQ/Core Plus Bond Portfolio ("New Core Plus Bond Portfolio") Advisory Agreement with EIM Sub-Advisory Agreement with AXA IM Sub-Advisory Agreement with Brandywine Global Investment Management LLC ("Brandywine Global") Sub-Advisory Agreement with Loomis Sayles

At the time of the July 2023 Meeting, all of the Board members also served as the Board of Trustees of EQ Premier VIP Trust, an affiliated investment company of the Trust and part of the same fund complex as the Trust. The Board noted that each Portfolio was newly organized and had no assets, operating history, or performance information of its own as of the date of the meeting. The Board noted that each Portfolio had been created as a "shell" series of the Trust solely for the purposes of acquiring the assets and continuing the business investment operations of a corresponding series of EQ Premier VIP Trust (each, a "VIP Portfolio" and together, the "VIP Portfolios") (a "shell reorganization") and would not conduct any investment operations until after the closing of the shell reorganization with respect to that VIP Portfolio. The Board noted that each new shell Portfolio of the Trust has the same name, investment objective, policies (including fundamental policies), principal strategies and principal risks as its corresponding VIP Portfolio. The Board further noted that it had previously approved each shell reorganization and that each shell reorganization also was subject to the approval of the shareholders of the affected VIP Portfolio.¹ The Board noted that, if the shareholders of a VIP Portfolio approve its proposed shell reorganization, then the corresponding new shell Portfolio of the Trust would assume the operating history and performance record of that VIP Portfolio. The Board considered that the shell reorganizations were part of an EIM initiative designed to, among other things, streamline the fund complex and promote operating efficiencies.

The Board considered that EIM currently serves as the investment manager for each new shell Portfolio's corresponding VIP Portfolio pursuant to an investment advisory agreement between EIM and EQ Premier VIP Trust and would manage the assets of the new shell Portfolio in the same manner in which it currently manages assets for the corresponding VIP Portfolio. The Board also considered that each proposed Sub-Adviser for the New Core Plus Bond Portfolio currently serves as an investment sub-adviser for that new shell Portfolio's corresponding VIP

¹ As of the date of this shareholder report, the shareholders of the VIP Portfolios have since approved the proposed shell reorganizations at a special shareholder meeting held on October 23, 2023. The shell reorganizations closed on November 12, 2023.

Portfolio pursuant to an investment sub-advisory agreement between EIM and the Sub-Adviser and would manage the assets of the new shell Portfolio in the same manner in which it currently manages assets for the corresponding VIP Portfolio. The Board noted that the proposed Advisory Agreement and, as applicable, Sub-Advisory Agreements for the new shell Portfolios were the same as the agreements that were currently in place for the corresponding VIP Portfolios (except for the name of the Trust) and that no material changes to the terms of the agreements, including the applicable fee rates and schedules, were proposed.

Prior to its approval of the new shell Portfolios' Agreements, the Board reviewed, among other matters, the nature, quality and extent of the services currently being provided by EIM and the relevant Sub-Advisers to the VIP Portfolios and to be provided by EIM and the relevant Sub-Advisers to the corresponding new shell Portfolios. A substantial portion of this review was conducted as part of, and in conjunction with, the Board's annual review of the investment advisory and, as applicable, investment sub-advisory agreements for the VIP Portfolios at that same July 2023 Meeting. At the July 2023 Meeting, the Board, including the Independent Trustees, considered and unanimously approved the renewal of the investment advisory and, as applicable, investment sub-advisory agreements for the VIP Portfolios for an additional one-year term, noting that, if the shareholders of the VIP Portfolios approve the shell reorganizations, then the agreements would terminate with respect to the VIP Portfolios on the closing date of the shell reorganizations. In approving the renewal of the relevant agreement(s) with respect to each VIP Portfolio, each Trustee, including the Independent Trustees, after considering all factors they deemed relevant, reached a determination, with the assistance of Independent Trustees' counsel and fund counsel and through the exercise of their own business judgment, that the advisory fee and, where applicable, sub-advisory fees were fair and reasonable and that the renewal of the agreement(s) was in the best interests of the applicable VIP Portfolio and its investors. In this regard, the Board also considered that EIM and the Sub-Advisers each had provided extensive materials for purposes of the Board's consideration of the annual renewal of the investment advisory and, as applicable, investment sub-advisory agreements for the VIP Portfolios and that EIM and the Sub-Advisers believed that those materials were accurate and complete in all material respects for purposes of the Board's consideration of the proposed Advisory Agreement and, as applicable, Sub-Advisory Agreements for the corresponding new shell Portfolios. The extensive materials provided (as well as additional relevant materials provided by an independent provider of mutual fund industry data) are discussed below. In connection with its approval of the proposed Advisory Agreement and, as applicable, Sub-Advisory Agreements for the new shell Portfolios² at the July 2023 Meeting, the Board considered its conclusions in connection with its approval of the renewal of the corresponding VIP Portfolios' investment advisory and, as applicable, investment sub-advisory agreements, including the Board's general satisfaction with the nature and quality of services being provided. The Board noted that the Agreements would go into effect with respect to the new shell Portfolios in connection with the closing of the shell reorganizations.

The Board noted that each new shell Portfolio would be added, by amendment, to the existing Advisory Agreement between EIM and the Trust with respect to the other Portfolios of the Trust. The Board also noted that two of the proposed Sub-Advisers for the New Core Plus Bond Portfolio (i.e., AXA IM and Loomis Sayles) also currently serve as investment sub-advisers for one or more other Portfolios of the Trust and that the New Core Plus Bond Portfolio would be added, by amendment, to the existing Sub-Advisory Agreements between EIM and each of AXA IM and Loomis Sayles with respect to those other Portfolios of the Trust.

The Board's consideration of the Agreements for the new shell Portfolios is discussed further below. Throughout the discussion, unless the context indicates otherwise, references to "renew" and "renewal" can be read as references to "approve" and "approval" with respect to the new shell Portfolios. In addition, with respect to the approvals relating to the new shell Portfolios, references to fee, expense, investment performance, profitability and other information provided to and considered by the Board include fee, expense, investment performance, profitability and other information, respectively, with respect to the corresponding VIP Portfolios.

All Portfolios

In reaching its decision to renew the Agreement(s) with respect to each Portfolio, the Board considered the overall fairness of the Agreement and whether the Agreement was in the best interests of the Portfolio and its investors. The Board further considered all factors it deemed relevant with respect to each Portfolio, including: (1) the nature, quality and extent of the overall services to be provided to the Portfolio by the Adviser, the relevant Sub-Adviser(s) and, where applicable, their respective affiliates, including the investment performance of the Portfolio (and, where applicable, each allocated portion of the Portfolio advised by a different Sub-Adviser); (2) the

² The Board also noted that the Agreements would be submitted to the new shell Portfolios' initial sole shareholder for approval prior to the new shell Portfolios' conducting investment operations.

level of the Portfolio's advisory fee and, where applicable, sub-advisory fee(s), and the Portfolio's expense ratios relative to those of peer funds; (3) the costs of the services provided by, and the profits realized by, the Adviser and its affiliates from their relationships with the Portfolio; (4) the anticipated effect of growth and size on the Portfolio's performance and expenses, including any potential economies of scale and whether any such economies of scale are equitably shared with investors; and (5) "fall-out" benefits that may accrue to the Adviser, the relevant Sub-Adviser(s) and their respective affiliates (that is, indirect benefits that they would not receive but for their relationships with the Portfolio). The Board also considered other factors (including conditions and trends prevailing generally in the economy, the securities markets and the mutual fund industry). In considering each Agreement, the Board members did not identify any particular factor or information that was all-important or controlling, and each Trustee may have given different weights to different factors and, thus, each Trustee may have had a different basis for his or her decision.

In connection with its deliberations, the Board took into account a broad range of information (both written and oral) provided to the Board, including its various committees, throughout the year, as well as information provided specifically in connection with the annual renewal process. The Trustees also recognized that the contractual arrangements for the Portfolios have been reviewed by the Trustees and discussed with the Adviser in prior years and that the Trustees' conclusions may take into account conclusions reached during their consideration of these same arrangements in prior years. The Board is assisted by counsel for the Trust and the Independent Trustees are also separately assisted by independent legal counsel throughout the process.

Information provided and discussed throughout the year included investment performance reports and related financial and general market outlook information for each Portfolio, as well as periodic reports on, among other matters, brokerage allocation and execution; pricing and valuation; legal and compliance matters; shareholder and other services and support provided to the Portfolios by the Adviser, the relevant Sub-Adviser(s) and their respective affiliates, as well as third-party providers; actual and potential conflicts of interest that could impact the business operations and relationships of the Adviser and the Trust or affect the Adviser's recommendations about Sub-Adviser; sales and marketing activity; and risk management. In addition, the sub-groups of the Board's Investment Committee, composed of Independent Trustees, met individually with, and engaged in extensive discussions along with management representatives and outside legal counsel with, Sub-Advisers during presentations made at regularly scheduled Investment Committee meetings during the year.

Information provided and discussed specifically in connection with the annual renewal process included a report prepared by Broadridge Financial Solutions Inc. ("Broadridge"), an independent provider of mutual fund industry data, as well as additional substantial material prepared by management. Broadridge provided its report directly to the Independent Trustees and included in its report comparative fee, expense and investment performance information for each Portfolio. The Independent Trustees, in consultation with their independent legal counsel, annually review and assess and, as they deem appropriate, request revisions to, the materials provided by Broadridge to ensure that the Independent Trustees continue to receive comparative fee, expense, and investment performance information in a format that facilitates and enhances their review of the Portfolios' investment advisory arrangements. The additional material prepared by management generally included Portfolio-by-Portfolio information showing each Portfolio's average net assets; advisory fees and, where applicable, sub-advisory fees; expense ratios; expense limitation arrangements; investment performance (in addition to the performance information prepared by Broadridge); and profitability information, including information regarding the profitability of the Adviser's operations on an overall Trust basis, as well as on a Portfolio-by-Portfolio basis. In addition, for each Portfolio, the Adviser and, where applicable, the relevant Sub-Adviser(s) provided separate materials describing the Portfolio's investment performance over various time periods and the services provided and the fees charged with respect to the Portfolio, and discussing whether the Portfolio had performed as expected over time and other matters.

The annual renewal process extends over at least two regular meetings of the Board in June and July (although the Independent Trustees believe that, in fact, the process extends year-round, and the Independent Trustees receive information on an ongoing basis) to ensure that the Adviser and the Sub-Advisers have time to respond to any questions the Independent Trustees may have on their initial review of the materials and that the Independent Trustees have time to consider those responses. The Independent Trustees also held a conference call in advance of the meeting at which the Board approved the renewal of the Agreements to review the information provided and communicated follow-up questions for management to address at the renewal meeting. The Independent Trustees also met in executive sessions during the meeting to discuss the Agreements and the information provided. When invited, management representatives attended portions of the executive sessions to

review and discuss matters relating to the Agreements and to provide additional information requested by the Independent Trustees. At the meeting and during the portions of the executive sessions attended by management, the Independent Trustees and management engaged in extensive discussions and negotiations regarding the Agreements. As noted below, as a result of these extensive discussions and negotiations, the Adviser proposed to lower the contractual expense limitation arrangements for certain Portfolios. The Independent Trustees were assisted by independent legal counsel prior to and during the meeting and during their deliberations regarding the Agreements and also received from legal counsel materials addressing, among other things, the legal standards applicable to their consideration of the proposed renewal of the Agreements. In addition, the Independent Trustees requested and reviewed information and met during the year to discuss information relevant to their annual consideration of the Agreements.

The Board also noted that the Trust is an affiliated investment company of 1290 Funds, which is managed by Equitable Investment Management, LLC ("EIM II"), an affiliate of the Adviser, and that all of the Board members also currently serve on the Board of Trustees of 1290 Funds. The Board noted that the Adviser served as the investment adviser to 1290 Funds prior to January 1, 2023. The Board also noted that certain of the Sub-Advisers currently serve as investment sub-advisers for one or more series of 1290 Funds (such Sub-Advisers together, the "EQ Sub-Advisers").³ The Trustees took into account information relating to the Adviser, EIM II and the EQ Sub-Advisers provided to the Trustees, in their capacities as Trustees of 1290 Funds, at prior meetings of the Board of Trustees of 1290 Funds, and the Trustees noted their experience and familiarity with the Adviser, EIM II, the EQ Sub-Advisers, and the series of 1290 Funds gained from their service on the Boards of Trustees of 1290 Funds and the Trust.

Although the Board approved the renewal of the Agreements for all of the Portfolios at the same Board meeting, the Board considered each Portfolio and each relevant Agreement separately and, in doing so, noted the respective roles of the Adviser and, as applicable, the relevant Sub-Adviser(s) in providing services to the Portfolio. In approving the renewal of the relevant Agreement(s) with respect to each Portfolio, each Trustee, including the Independent Trustees, after considering all factors they deemed relevant, reached a determination, with the assistance of Independent Trustees' counsel and fund counsel and through the exercise of their own business judgment, that the advisory fee and, where applicable, sub-advisory fee(s) were fair and reasonable and that the renewal of the Agreement(s) was in the best interests of the applicable Portfolio and its investors. Although the Board gave attention to all information provided, the following discusses some of the primary factors it deemed relevant to its decision to renew the Agreements.

Nature, Quality and Extent of Services

The Board evaluated the nature, quality and extent of the overall services to be provided to each Portfolio and its investors by the Adviser, the relevant Sub-Adviser(s) and, where applicable, their respective affiliates. In addition to the investment performance and expense information discussed below, the Board considered the Adviser's and each relevant Sub-Adviser's responsibilities with respect to each Portfolio and the Adviser's and each relevant Sub-Adviser's experience in serving as an investment adviser for the Portfolio(s) and for funds and accounts similar to the Portfolio(s) each advises, including, as applicable, other series (or allocated portion(s) of other series) in the same fund complex with the Trust.

With respect to the Adviser, the Board considered that the Adviser is responsible for, among other things, developing investment strategies for the Portfolios (and the portions thereof); researching, selecting and hiring Sub-Advisers, conducting ongoing due diligence on and monitoring Sub-Advisers, and, when necessary or advisable, terminating or replacing Sub-Advisers; allocating and rebalancing Portfolio assets among Sub-Advisers; overseeing the selection of investments for the Portfolios (or the portions thereof) that the Sub-Advisers sub-advise; making investment decisions for the Portfolios (or the portions thereof) that it manages directly; managing the tactical volatility management strategy for certain of the Portfolios that employ such a strategy; monitoring and evaluating the performance of the Portfolios (or the portions thereof); monitoring the investment operations and composition of the Portfolios (or the portions thereof) and, in connection therewith, monitoring compliance with the Portfolios' investment objectives, policies and procedures; monitoring brokerage selection, commission and other trading costs, quality of execution, and other brokerage matters; coordinating and managing the flow of information and communications relating to the Portfolios among the Sub-Advisers and other applicable parties; coordinating responses to regulatory agency inquiries relating to the operations of the

³ The EQ Sub-Advisers are AXA IM, Brandywine Global, GAMCO, and Loomis Sayles.

Trust and coordinating litigation matters involving the Adviser and the Trust; and implementing Board directives as they relate to the Portfolios. The Board also considered information regarding the Adviser's process for selecting and monitoring the Sub-Advisers and the other service providers to the Portfolios and its process for making investment decisions for the Portfolios (or the portions thereof) that it manages directly, as well as information regarding the gualifications and experience of, and resources available to, the Adviser's personnel who perform those functions with respect to the Portfolios. In addition, the Board considered the quality of the Adviser's communications with the Board and the Adviser's responsiveness to Board inquiries and requests made from time to time with respect to the Portfolios. The Board further considered that the Adviser also provides the Trust with personnel, including Trust officers, in connection with carrying out its responsibilities and is responsible for coordinating the development of new initiatives and evaluating the impact of proposed products and services on the Trust and its assets. The Board also considered that the Adviser assumes significant entrepreneurial risk in sponsoring new Portfolios or recommending and implementing changes (e.g., investment objective, strategy or policy changes) to existing Portfolios and that the Adviser also bears and assumes significant ongoing risks, including investment, operational, cybersecurity, enterprise, litigation, regulatory and compliance risks, with respect to all Portfolios. The Board considered that the Adviser's responsibilities with respect to all Portfolios include daily monitoring of investment, operational, cybersecurity, enterprise, litigation, regulatory and compliance risks as they relate to the Portfolios. The Board also considered periodic reports provided to the Board regarding the Adviser's ongoing risk monitoring and management activities. The Board also noted increased regulatory risk.

With respect to the Sub-Advisers, the Board considered that each Sub-Adviser, subject to the oversight of the Adviser, is responsible for making investment decisions for the Portfolio(s) (or the portion(s) thereof) that it sub-advises; placing with brokers or dealers orders for the purchase and sale of investments for the Portfolio(s) (or the portion(s) thereof) that it sub-advises; and performing certain related administrative functions. The Board also reviewed information regarding each Sub-Adviser's process for selecting investments for the Portfolio(s) (or the portion(s) thereof) that it sub-advises, as well as information regarding the qualifications and experience of the Sub-Adviser's portfolio managers who provide services to the Portfolio(s) that it sub-advises, as well as information on staffing levels and succession planning. The Board also considered information regarding each Sub-Adviser's policies for executing portfolio transactions for the Portfolio(s) (or the portion(s) thereof) that it sub-advises and, where applicable, information regarding a Sub-Adviser's policies for obtaining research from brokers and dealers.

In addition, the Board considered the allocation of Portfolio brokerage, including allocations to broker-dealers affiliated with the Adviser or a Sub-Adviser. The Board also considered the use of "soft" commission dollars to pay for research services, as applicable. In this regard, the Board also considered the Adviser's and each Sub-Adviser's trading experience and received information regarding how the Adviser and each Sub-Adviser seek to achieve "best execution" on behalf of a Portfolio (or portion thereof), including a report by an independent portfolio trading analytical firm and reports from the Trust's Chief Compliance Officer regarding the monitoring of execution quality.

The Board also considered the Trust's Chief Compliance Officer's evaluation of the Adviser's and each Sub-Adviser's compliance programs, policies and procedures, including those relating to cybersecurity and business continuity, and any compliance matters involving the Adviser and any applicable Sub-Adviser that had been brought to the Board's attention during the year. In addition, the Board considered whether there were any pending lawsuits, enforcement proceedings or regulatory investigations involving the Adviser and the Sub-Advisers and received information regarding the Adviser's and each Sub-Adviser's financial condition and history of operations and potential conflicts of interest in managing the Portfolios. The Board also considered information as to the overall amount of assets sub-advised by each Sub-Adviser and noted the largest Sub-Adviser relationships, both in terms of aggregate net assets sub-advised and, for smaller Sub-Advisers, net assets sub-advised as a percentage of the Sub-Adviser's total assets under management. In addition to periodic reports throughout the year, the Independent Trustees received information about business relationships that the Adviser and/or its affiliates, including Equitable Financial Life Insurance Company, have with the Sub-Advisers and/or their affiliates in addition to the relationships involving the Portfolios. In this regard, the Board also received materials regarding the practices, policies and procedures (as well as periodic enhancements thereto) adopted by the Adviser and the Trust to identify and mitigate actual and potential conflicts of interest, including conflicts that may arise in connection with those additional business relationships.

The Board also considered periodic reports provided to the Board regarding the services provided by the Adviser, the Sub-Advisers and, where applicable, their affiliates. The Board also considered actions taken by the Adviser and the Sub-Advisers in response to market conditions over the past year and considered the overall

performance of the Adviser and the Sub-Advisers in this context. The Board also considered information about the Adviser's and each Sub-Adviser's plans with respect to its continued operation in an in-person, remote or hybrid work environment and the Adviser's and each Sub-Adviser's ability to continue to provide the same scope and quality of services to its respective Portfolio(s). The Board noted that, at the Independent Trustees' request, the Adviser had continued to provide the Board with regular updates on market volatility, the operation of the Trust and the Portfolios, developments related to the Adviser's business, and the Adviser's ongoing oversight of the Portfolios' Sub-Advisers, including enhanced supervisory measures taken, in light of market and business disruptions resulting from a variety of economic and other factors. The Board also noted that, at the Independent Trustees' request, the Adviser had continued to provide the Board other factors. The Board also noted that, at the Independent Trustees' nequest, the Adviser had continued to provide the Board with periodically updated EIM assets under management and Portfolio average net assets information, as well as updated investment performance information, including the impact of volatility management strategies on the performance of the Portfolios that pursue volatility management strategies.

The Board also considered strategic and other actions taken by the Adviser in response to recent events within the mutual fund industry, including actions taken in response to legal and regulatory developments, including new U.S. Securities and Exchange Commission rulemaking, affecting the mutual fund industry. The Board also requested and received throughout the past year information from the Adviser and various service providers on various topics impacting mutual funds generally, including pricing and valuation of portfolio securities; liquidity and derivatives risk management; cybersecurity; trustee independence; mutual fund board governance "best practices"; new reporting requirements for mutual funds; environmental, social and governance ("ESG") investing; and the transition away from London Interbank Offered Rate (LIBOR). The Board noted that certain of these topics may present significant ongoing challenges for mutual funds and result in an increase in the responsibilities and costs of mutual fund service providers, including the Adviser. The Board also noted the increasing complexity of the financial markets.

The Board also considered the benefits to investors from participation in a Portfolio sponsored by the Adviser, including the benefits of investing in a fund that is part of a large fund complex that offers a wide range of portfolios, sub-advisers and investment styles. The Board likewise considered that investors have chosen to invest in mutual funds sponsored by the Adviser. In addition, the Board considered the nature, quality and extent of the administrative, investor servicing and distribution services that the Adviser and its affiliates provide to the Portfolios and their shareholders. The Board also noted that, throughout the past year, the Adviser and its affiliates had continued or undertaken strategic and other actions and initiatives (including, among others, the proposed shell reorganizations) intended to enhance various aspects of the Trust's and the Board's operations and investors' experience with the mutual funds sponsored by the Adviser. In this regard, the Board also noted that the Adviser continually reviews the overall line-up of investment options and conducts in-depth analysis of its entire fund complex to provide recommendations to the Board to streamline and strengthen the fund complex's line-up. The Board recognized that certain of these strategic and other actions and initiatives may also have a positive impact on the profitability and financial position of the Adviser and its affiliates.

For purposes of evaluating the nature, quality and extent of the overall services provided to each Portfolio, the Board also took into account discussions with the Adviser and, where applicable, the relevant Sub-Adviser(s) about Portfolio investment performance that occur at Board and Investment Committee meetings throughout the year. In this regard, the Board noted that, as part of regularly scheduled Portfolio reviews and other detailed reports to the Board on Portfolio performance, the Board periodically considered information regarding each Portfolio's performance over various time periods on both an absolute basis and relative to an appropriate broad-based securities market index ("benchmark") and/or a custom blended index developed by the Adviser that comprises broad-based indexes ("blended benchmark"), and one or more peer groups of other mutual funds deemed by Broadridge to be comparable to the Portfolio (each, a "peer group"). The performance information generally included, among other information, annual total returns, average annual total returns, cumulative returns and/or rolling period total returns. The Board also reviewed information about performance attribution and reviewed performance in relation to certain measures of the degree of investment risk undertaken by the portfolio managers. The Board also considered the Adviser's effectiveness in monitoring the performance of the Sub-Advisers, and the Adviser's responses to performance issues when identified. The Board also considered certain information, reflected in Appendix A, provided to the Board regarding each Portfolio's performance relative to a benchmark and/or a blended benchmark and a peer group for the one-, three-, five- and ten-year periods, as applicable, and since inception periods ended March 31, 2023. The Board noted that this information

supplemented other performance information provided to the Board throughout the year and in connection with the annual renewal process. The Board also considered information, provided directly to the Board by Broadridge, regarding each Portfolio's performance over various time periods relative to a benchmark and/or a blended benchmark and Broadridge's "performance universe" consisting of a peer group of funds. Broadridge also provided, and the Board considered, comparisons to (i) managed volatility Broadridge peer groups for the Portfolios that pursue volatility management strategies either directly or through investments in underlying portfolios (as defined below) that pursue such strategies, and (ii) Broadridge peer groups for the active equity Portfolios that invest according to certain ESG criteria. The Board also noted that, at the Independent Trustees' request, the Adviser had provided the Board with updated performance information for all of the Portfolios for periods ended May 31, 2023, as well as market commentary, in connection with the annual renewal process.

The Board received a description of, and factored into its evaluation of each Portfolio's performance the limitations inherent in, Broadridge's methodology for developing and constructing peer groups and determining, from year to year, which mutual funds should be included in which peer groups, among other things. In this regard, the Board also noted that Broadridge's methodology may result in a Portfolio's being included in one peer group one year and in a different peer group the next, and in similar Portfolios being included in different peer groups. The Board also noted that the number of mutual funds included in a peer group may be relatively small and may differ significantly from peer group to peer group and from year to year and that the constituent mutual funds included in a peer group also may differ from year to year, which, among other factors, can limit the relevance of the comparisons. While recognizing these inherent limitations, the Board believed the independent analysis conducted by Broadridge provided a useful measure of comparative performance. The Board noted that the Board be provided certain supplemental peer group performance information, the Adviser did not participate in Broadridge's selection of peer funds, or identification of a peer group, for any Portfolio.

In evaluating the Portfolios' performance, the Board generally considered longer-term performance over a full market cycle (typically five years or longer, if applicable) to be more important than short-term performance. The Board also took into account factors including general market conditions (including the amount of volatility in the market over the past year); interest rate and inflation levels and credit conditions; the "style" in which the Portfolios are managed, as applicable, and whether that style is in or out of favor in the market; the relative sizes of the Portfolios; issuer-specific information; and fund cash flows. In this regard, the Board also noted how selecting different time periods for performance calculations (for example, whether a one-year period is from December to December or March to March) can produce significantly different results in terms of a Portfolio's returns and peer ranking on a relative basis. The Board further acknowledged that longer-term performance could be impacted by even one period of significant outperformance or underperformance. The Board also considered that variations in performance among a Portfolio's operating classes reflect variations in class expenses, which result in lower performance for higher expense classes.

Existing Portfolios

<u>Allocation Portfolios</u>. With respect to the performance of the Strategic Allocation Portfolios, the MF/ETF Portfolios, and the 1290 VT Moderate Growth Allocation and EQ/All Asset Growth Allocation Portfolios, the Board considered that each Portfolio operates as a fund-of-funds managed by EIM and invests in securities of other mutual funds and/or exchange traded securities of other investment companies or investment vehicles (referred to collectively as "underlying portfolios") and recognized, therefore, that each Portfolio's performance is based, in part, on the total returns of the underlying portfolios in which it invests. The Board also considered that each Portfolio allocates its assets between equity and fixed income investments (and, in the case of the EQ/All Asset Growth Allocation Portfolio, alternative investments) through its investments in underlying portfolios.

In evaluating the performance of the Equitable Conservative Growth MF/ETF Portfolio, the Board also noted that, in August 2022, the Portfolio had changed from a sub-advised fund to a fund-of-funds managed by EIM, and had changed its investment objective, policies and strategy, fee and expense structure, performance benchmark, and name. Therefore, the Board focused on the Portfolio's performance since that time.

The Board also noted that the Equitable Growth MF/ETF and Equitable Moderate Growth MF/ETF Portfolios had only a short operating history on which to evaluate performance.

With respect to the performance of the EQ/AB Dynamic Aggressive Growth, EQ/AB Dynamic Growth, EQ/AB Dynamic Moderate Growth, EQ/American Century Moderate Growth Allocation, EQ/Franklin Moderate Allocation,

EQ/Goldman Sachs Growth Allocation, EQ/Goldman Sachs Moderate Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation and EQ/JPMorgan Growth Allocation Portfolios, the Board considered that each Portfolio allocates its assets between equity and fixed income investments and is advised by a single Sub-Adviser.

The Board further considered that certain of the underlying portfolios in which each of the Strategic Allocation Portfolios invests may employ a tactical volatility management strategy that is intended to reduce the volatility associated with investing in equity securities in an effort to produce more favorable risk-adjusted returns over extended market cycles. The Board also noted that the funds in a Strategic Allocation Portfolio's peer group may employ volatility management strategies different from those employed by underlying portfolios in which the Portfolio invests.

The Board further considered that, in connection with its investment strategy, each of the 1290 VT Moderate Growth Allocation, EQ/AB Dynamic Aggressive Growth, EQ/AB Dynamic Growth, EQ/AB Dynamic Moderate Growth, EQ/American Century Moderate Growth Allocation, EQ/Franklin Moderate Allocation, EQ/Goldman Sachs Growth Allocation, EQ/Goldman Sachs Moderate Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation and EQ/JPMorgan Growth Allocation Portfolios may employ distinct volatility management techniques. The Board also noted that the funds in a Portfolio's peer group may employ volatility management strategies different from those employed by the Portfolio.

The Board also factored into its evaluation of a Portfolio's performance the limitations inherent in comparing the performance of asset allocation funds, such as the Portfolios, which may invest in equity and fixed income (and, as applicable, alternative) investments, to the performance of a peer group that includes funds that may allocate their assets between equity and fixed income investments in different percentages over time than the Portfolio and among other asset classes. In this respect, the Board noted that, for each Portfolio, the Adviser had developed and implemented a custom blended benchmark that comprises broad-based indexes and has weighted levels of exposure to equity and fixed income (and, as applicable, alternative) securities. The Board considered each Portfolio's blended benchmark in evaluating the Portfolio's performance.

The Board and the Adviser discussed the performance of each Portfolio, including whether each Portfolio had performed as expected over time. The Board and the Adviser also discussed, where applicable, the reasons for a Portfolio's underperformance for certain periods relative to its peer group and/or benchmark and/or blended benchmark, as applicable, and efforts to improve the Portfolio's performance. Where applicable, the Board also considered, with respect to each sub-advised Portfolio, steps that the Adviser and the Sub-Adviser had taken to address a Portfolio's performance, including any changes to the Sub-Adviser or portfolio managers advising a Portfolio and any changes to the investment strategies of a Portfolio, including, for certain Sub-Advisers, enhancements to their volatility management model, and the performance results of the Portfolio since the date of such changes. Where applicable, the Board also considered, with respect to each fund-of-funds Portfolio, steps that the Adviser had taken to address a Portfolio's performance, including portfolio's performance, including any changes to the investment strategies of a Portfolio invests, and the performance results of the Portfolio since the date of such changes. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of a Portfolio's Agreement(s) and that, after considering all relevant factors, it can reach a decision to renew an Agreement notwithstanding a Portfolio's relative underperformance.

Based on its review and the explanations provided by the Adviser and, where applicable, the relevant Sub-Adviser regarding the performance of each Portfolio, the Board determined, with respect to each Portfolio, that the Portfolio and its investors would benefit from the Adviser's and, where applicable, the relevant Sub-Adviser's continued management of the Portfolio.

<u>"Passive" with Managed Volatility Portfolios</u>. With respect to the performance of the ATM International Managed Volatility, ATM Large Cap Managed Volatility, ATM Mid Cap Managed Volatility, ATM Small Cap Managed Volatility, EQ/400 Managed Volatility, EQ/500 Managed Volatility, EQ/2000 Managed Volatility and EQ/ International Managed Volatility Portfolios, the Board considered that each Portfolio follows an investment strategy under which the Portfolio is normally divided into two portions, one of which uses a "passive" or indexing strategy to seek to track the performance (before fees and expenses) of the Portfolio's benchmark, and the other of which seeks to tactically manage equity exposure in the Portfolio based on the level of volatility in the market. The Board further considered that each Portfolio's tactical volatility management strategy is intended to reduce the volatility associated with investing in equity securities in an effort to produce more favorable risk-adjusted returns over

extended market cycles. The Board also noted that the funds in a Portfolio's peer group may employ volatility management strategies different from those employed by the Portfolio. The Board also noted that each Portfolio has the ability to invest in exchange traded securities of other investment companies or investment vehicles ("ETFs").

The Board and the Adviser discussed the performance of each Portfolio, including whether each Portfolio had performed as expected over time. The Board and the Adviser also discussed, where applicable, the reasons for a Portfolio's underperformance for certain periods relative to its peer group and/or benchmark, as applicable, and efforts to improve the Portfolio's performance. Where applicable, the Board also considered steps that the Adviser and the Sub-Advisers had taken to address a Portfolio's performance, including any changes to the investment strategies of a Portfolio, and the performance results of the Portfolio since the date of such changes. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of a Portfolio's Agreements and that, after considering all relevant factors, it can reach a decision to renew an Agreement notwithstanding a Portfolio's relative underperformance.

Based on its review and the explanations provided by the Adviser and the relevant Sub-Advisers regarding the performance of each Portfolio, the Board determined, with respect to each Portfolio, that the Portfolio and its investors would benefit from the Adviser's and each Sub-Adviser's continued management of the Portfolio.

<u>"Passive" without Managed Volatility Portfolios.</u> With respect to the performance of the 1290 VT Natural Resources and 1290 VT Real Estate Portfolios, the Board considered that each Portfolio seeks to track the performance (before fees and expenses) of its benchmark. With respect to the performance of the 1290 VT Socially Responsible Portfolio, the Board considered that the Portfolio seeks to track the investment results of a benchmark consisting of a universe of securities that have positive ESG characteristics. With respect to the performance of the 1290 VT Convertible Securities, EQ/Common Stock Index, EQ/Core Bond Index, EQ/Equity 500 Index, EQ/ Intermediate Government Bond, EQ/International Equity Index, EQ/Large Cap Growth Index, EQ/Large Cap Value Index, EQ/Long-Term Bond, EQ/Mid Cap Index and EQ/Small Company Index Portfolios, the Board considered that each Portfolio seeks to achieve a total return (before fees and expenses) that approximates the total return performance of its benchmark. The Board noted that each Portfolio uses a "passive" or indexing strategy. The Board also noted that each Portfolio's performance was expected to vary from (and generally was expected to be lower than) that of its benchmark due to fees, management of cash flows, transaction costs, valuation and other factors, which affect the Portfolio but not the benchmark.

The Board also took into account that peer groups in which Broadridge placed certain Portfolios for comparison purposes include only funds with passive management strategies, whereas peer groups in which Broadridge placed other Portfolios for comparison purposes include funds with active management strategies.

In evaluating the performance of the 1290 VT Convertible Securities Portfolio, the Board also noted that, in June 2021, the Portfolio had converted from an investment strategy under which the Portfolio's assets normally were allocated between two portions, one of which was actively managed and the other of which was invested in passively managed ETFs, to an entirely passive management strategy; the Portfolio had replaced its Sub-Adviser; and the Portfolio had changed its investment objective, performance benchmark, and fee and expense structure. Therefore, the Board focused on the Portfolio's performance since that time.

In evaluating the performance of the 1290 VT Socially Responsible Portfolio, the Board also took into account that the Portfolio is a specialty portfolio that offers a unique investment strategy and enhances the range of investment options available to investors.

In evaluating the performance of the EQ/Large Cap Value Index and EQ/Mid Cap Index Portfolios, the Board also noted that each Portfolio had replaced its Sub-Adviser in November 2018 and, therefore, the Board focused on the Portfolio's performance since that time.

The Board also noted that the EQ/Long-Term Bond Portfolio had only a short operating history on which to evaluate performance.

The Board and the Adviser discussed the performance of each Portfolio, including whether each Portfolio had performed as expected over time, and the extent to which each Portfolio had achieved its objective, as described above. In this connection, the Board also considered information on the correlation and tracking error between each Portfolio and its respective benchmark over various time periods, as well as the Adviser's and the relevant Sub-Adviser's views and explanations of this information.

Based on its review and the explanations provided by the Adviser and the relevant Sub-Adviser regarding the performance of each Portfolio, the Board determined, with respect to each Portfolio, that the Portfolio and its investors would benefit from the Adviser's and the Sub-Adviser's continued management of the Portfolio.

<u>"Pactive" with Managed Volatility Portfolios</u>. With respect to the performance of the EQ/ClearBridge Select Equity Managed Volatility, EQ/Franklin Small Cap Value Managed Volatility, EQ/Global Equity Managed Volatility, EQ/International Core Managed Volatility, EQ/International Value Managed Volatility, EQ/Large Cap Core Managed Volatility, EQ/Large Cap Growth Managed Volatility, EQ/Large Cap Value Managed Volatility and EQ/ Mid Cap Value Managed Volatility Portfolios, the Board considered that each Portfolio follows an investment strategy under which the Portfolio using a different but complementary investment strategy. The Board noted that each Portfolio uses a combination of active and passive (or "pactive") investment strategies. The Board also noted that each of the EQ/International Core Managed Volatility, EQ/Large Cap Growth Managed Volatility, EQ/International Value Managed Volatility, EQ/Large Cap Value Managed Volatility, EQ/Large Cap Core Managed Volatility, EQ/Large Cap Growth Managed Volatility, EQ/International Value Managed Volatility, EQ/International Core Managed Volatility, EQ/International Value Managed Volatility, EQ/Large Cap Core Managed Volatility, EQ/Large Cap Growth Managed Volatility, EQ/Large Cap Value Managed Volatili

The Board also considered that, in connection with the pactive investment strategy, each Portfolio may employ various volatility management techniques, including the use of futures and options to manage equity exposure. The Board further considered that each Portfolio's volatility management strategy is intended to reduce the volatility associated with investing in equity securities in an effort to produce more favorable risk-adjusted returns over extended market cycles. The Board also noted that the funds in a Portfolio's peer group may or may not employ an investment strategy similar to the Portfolio's that includes active, passive and (in the case of certain Portfolios) ETF components, and that the funds in a Portfolio's peer group may employ volatility management strategies different from those employed by the Portfolio.

In evaluating the performance of the EQ/ClearBridge Select Equity Managed Volatility Portfolio, the Board also noted that the Portfolio had replaced a Sub-Adviser and modified its active investment strategies in October 2018 and, therefore, the Board focused on the Portfolio's performance since that time.

In evaluating the performance of the EQ/International Value Managed Volatility Portfolio, the Board also noted that the Portfolio had replaced a Sub-Adviser and modified its investment strategy in December 2018 and, therefore, the Board focused on the Portfolio's performance since that time.

In evaluating the performance of the EQ/Large Cap Core Managed Volatility Portfolio, the Board also noted that the Portfolio had replaced a Sub-Adviser in July 2020 and, therefore, the Board focused on the Portfolio's performance since that time.

In evaluating the performance of the EQ/Large Cap Growth Managed Volatility Portfolio, the Board also noted that, at the July 2023 Meeting, the Adviser had proposed, and the Board had approved, replacing T. Rowe Price with JPMIM as the Sub-Adviser to an allocated portion of the Portfolio, effective on or about July 31, 2023.

In evaluating the performance of the EQ/Large Cap Value Managed Volatility Portfolio, the Board also noted that the Portfolio had replaced a Sub-Adviser in February 2021 and, therefore, the Board focused on the Portfolio's performance since that time.

In addition, the Board considered the performance of the allocated portions of each Portfolio managed by different Sub-Advisers and whether the performance of the portions allocated to each of the Sub-Advisers met the Board's expectations as to the compatibility of the Sub-Advisers' different investment strategies and styles and the contributions of each to the overall Portfolio strategy and performance. The Board noted that the Sub-Advisers that pursue active investment strategies on behalf of the "pactive" Portfolios may pursue more aggressive investment strategies that are designed to be complementary to the associated index strategies, and that these Sub-Advisers may invest in more concentrated positions in particular issuers and industries; as a result, these active investment strategies may also exhibit more performance volatility from year-to-year.

The Board and the Adviser discussed the performance of each Portfolio and each allocated portion thereof, including whether each Portfolio had performed as expected over time. The Board and the Adviser also discussed, where applicable, the reasons for a Portfolio's or an allocated portion's underperformance for certain periods relative to its peer group and/or benchmark, as applicable, and efforts to improve the Portfolio's or allocated portion's performance. Where applicable, the Board also considered steps that the Adviser and the Sub-Advisers had taken to address a Portfolio's or an allocated portion's performance, including any changes or additions to the

Sub-Advisers or portfolio managers advising a Portfolio and any changes to the investment strategies of a Portfolio, and the performance results of the Portfolio or allocated portion since the date of such changes. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of a Portfolio's Agreements and that, after considering all relevant factors, it can reach a decision to renew an Agreement notwithstanding a Portfolio's relative underperformance.

Based on its review and the explanations provided by the Adviser and the relevant Sub-Advisers regarding the performance of each Portfolio, the Board determined, with respect to each Portfolio, that the Portfolio and its investors would benefit from the Adviser's and each Sub-Adviser's continued management of the Portfolio.

"Pactive" without Managed Volatility Portfolios. With respect to the performance of the 1290 VT High Yield Bond Portfolio, the Board considered that the Portfolio follows an investment strategy under which the Portfolio's assets normally are allocated between two portions, one of which is actively managed and the other of which is invested in ETFs that are passively managed. With respect to the performance of the 1290 VT Micro Cap, 1290 VT Small Cap Value, EQ/Emerging Markets Equity PLUS, EQ/Morgan Stanley Small Cap Growth and EQ/Quality Bond PLUS Portfolios, the Board considered that each Portfolio follows an investment strategy under which the Portfolio's assets normally are allocated among multiple Sub-Advisers, each of which manages its portion of the Portfolio using a different but complementary investment strategy, whereby one portion is actively managed and the other portion seeks to track the performance of a particular index. With respect to the performance of the EQ/ AB Small Cap Growth Portfolio, the Board considered that the Portfolio follows an investment strategy under which the Portfolio's assets normally are allocated between two portions, one of which is actively managed and the other of which seeks to track the performance of a particular index. With respect to the performance of the Multimanager Aggressive Equity, Multimanager Core Bond, and Multimanager Technology Portfolios (the "Multimanager Portfolios"), the Board considered that each Portfolio follows an investment strategy under which the Portfolio's assets normally are allocated among multiple Sub-Advisers, each of which manages its portion of the Portfolio using a different but complementary investment strategy, whereby one portion of a Portfolio seeks to track the performance of a particular index, one portion of the Multimanager Technology Portfolio has the ability to invest in ETFs, and one or more other portions of a Portfolio are actively managed. The Board noted that each Portfolio uses a combination of active and passive (or "pactive") investment strategies. The Board also noted that the funds in a Portfolio's peer group may or may not employ an investment strategy similar to the Portfolio's that includes active, passive and (in the case of certain Portfolios) ETF components.

In evaluating the performance of the Multimanager Technology Portfolio, the Board also noted that the Portfolio had replaced a Sub-Adviser in November 2018 and added a Sub-Adviser in February 2023 and, therefore, the Board focused on the Portfolio's performance since those times.

In addition, the Board considered the performance of the allocated portions of each Portfolio managed by different Sub-Advisers and whether the performance of the portions allocated to each of the Sub-Advisers met the Board's expectations as to the compatibility of the Sub-Advisers' different investment strategies and styles and the contributions of each to the overall Portfolio strategy and performance. The Board noted that the Sub-Advisers that pursue active investment strategies on behalf of the "pactive" Portfolios may pursue more aggressive investment strategies that are designed to be complementary to the associated index strategies, and that these Sub-Advisers may invest in more concentrated positions in particular issuers and industries; as a result, these active investment strategies may also exhibit more performance volatility from year-to-year.

The Board and the Adviser discussed the performance of each Portfolio and each allocated portion thereof, including whether each Portfolio had performed as expected over time. The Board and the Adviser also discussed, where applicable, the reasons for a Portfolio's or an allocated portion's underperformance for certain periods relative to its peer group and/or benchmark, as applicable, and efforts to improve the Portfolio's or allocated portion's performance. Where applicable, the Board also considered steps that the Adviser and the Sub-Advisers had taken to address a Portfolio's or an allocated portion's performance, including any changes or additions to the Sub-Advisers or portfolio managers advising a Portfolio and any changes to the investment strategies of a Portfolio, and the performance results of the Portfolio or allocated portion since the date of such changes. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of a Portfolio's Agreements and that, after considering all relevant factors, it can reach a decision to renew an Agreement notwithstanding a Portfolio's relative underperformance.

Based on its review and the explanations provided by the Adviser and the relevant Sub-Advisers regarding the performance of each Portfolio, the Board determined, with respect to each Portfolio, that the Portfolio and its investors would benefit from the Adviser's and each Sub-Adviser's continued management of the Portfolio.

<u>Active Portfolios</u>. With respect to the performance of the 1290 VT DoubleLine Opportunistic Bond, 1290 VT Equity Income, 1290 VT GAMCO Mergers & Acquisitions, 1290 VT GAMCO Small Company Value, 1290 VT SmartBeta Equity ESG, EQ/AB Short Duration Government Bond, EQ/AB Sustainable U.S. Thematic, EQ/American Century Mid Cap Value, EQ/Capital Group Research, EQ/ClearBridge Large Cap Growth ESG, EQ/Fidelity Institutional AM[®] Large Cap, EQ/Franklin Rising Dividends, EQ/Goldman Sachs Mid Cap Value, EQ/Invesco Comstock, EQ/Invesco Global, EQ/Invesco Global Real Assets, EQ/Janus Enterprise, EQ/JPMorgan Value Opportunities, EQ/Lazard Emerging Markets Equity, EQ/Loomis Sayles Growth, EQ/MFS International Growth, EQ/MFS International Intrinsic Value, EQ/MFS Mid Cap Focused Growth, EQ/MFS Technology, EQ/MFS Utilities Series, EQ/Money Market, EQ/PIMCO Global Real Return, EQ/PIMCO Real Return, EQ/PIMCO Total Return ESG, EQ/ PIMCO Ultra Short Bond, EQ/T. Rowe Price Growth Stock, EQ/T. Rowe Price Health Sciences, EQ/Value Equity and EQ/Wellington Energy Portfolios, the Board considered that each Portfolio is actively managed and advised by a single Sub-Adviser.

With respect to the performance of the 1290 VT Multi-Alternative Strategies Portfolio, the Board considered that the Portfolio operates as a fund-of-funds and invests in ETFs (referred to as "underlying portfolios") and recognized, therefore, that the Portfolio's performance is based, in part, on the total returns of the underlying portfolios in which it invests.

In evaluating the performance of the 1290 VT GAMCO Mergers & Acquisitions Portfolio, the Board also took into account that the Portfolio is a specialty portfolio that offers a unique investment strategy and enhances the range of investment options available to investors and that the peer group in which the Portfolio was placed for comparison purposes includes a wider range of fund types.

The Board also noted that the EQ/AB Sustainable U.S. Thematic Portfolio integrates ESG considerations into its portfolio construction process and had only a short operating history on which to evaluate performance.

In evaluating the performance of the EQ/ClearBridge Large Cap Growth ESG Portfolio, the Board also noted that, prior to March 2022, the Portfolio did not integrate ESG considerations into its portfolio construction process to the same extent.

In evaluating the performance of the EQ/Invesco Global Portfolio, the Board also noted that the Portfolio had changed its benchmark in December 2022.

In evaluating the performance of the EQ/Invesco Global Real Assets Portfolio, the Board also noted that the Portfolio had modified its investment strategy in May 2021 and changed its benchmark in June 2021 and, therefore, the Board focused on the Portfolio's performance since that time.

In evaluating the performance of the EQ/MFS International Intrinsic Value Portfolio, the Board also noted that the Portfolio had changed its benchmark in December 2020.

In evaluating the performance of the EQ/MFS Mid Cap Focused Growth Portfolio, the Board also noted that the Portfolio had replaced its Sub-Adviser and modified its investment strategy in November 2019 and, therefore, the Board focused on the Portfolio's performance since that time.

In evaluating the performance of the EQ/MFS Utilities Series Portfolio, the Board also noted that the Portfolio had changed its benchmark in May 2020.

In evaluating the performance of the EQ/Money Market Portfolio, the Board also considered the interest rate environment.

In evaluating the performance of the EQ/PIMCO Total Return ESG Portfolio, the Board also noted that, prior to March 2022, the Portfolio did not integrate ESG considerations into its portfolio construction process.

In evaluating the performance of the EQ/T. Rowe Price Growth Stock Portfolio, the Board also noted that, at the July 2023 Meeting, the Adviser had proposed, and the Board had approved, replacing T. Rowe Price with JPMIM as the Sub-Adviser to the Portfolio, effective on or about July 31, 2023.

In evaluating the performance of the EQ/Value Equity Portfolio, the Board also noted that the Portfolio had replaced its Sub-Adviser, modified its investment strategy, and changed its fee structure in February 2021 and, therefore, the Board focused on the Portfolio's performance since that time.

In evaluating the performance of the EQ/Wellington Energy Portfolio, the Board also noted that the Portfolio had replaced its Sub-Adviser and modified its investment strategy in November 2019 and changed its benchmark in May 2020 and, therefore, the Board focused on the Portfolio's performance since the change in Sub-Adviser.

The Board and the Adviser discussed the performance of each Portfolio, including whether each Portfolio had performed as expected over time. The Board and the Adviser also discussed, where applicable, the reasons for a Portfolio's underperformance for certain periods relative to its peer group and/or benchmark, as applicable, and efforts to improve the Portfolio's performance. Where applicable, the Board also considered, with respect to each sub-advised Portfolio, steps that the Adviser and the Sub-Adviser had taken to address a Portfolio's performance, including any changes to the Sub-Adviser or portfolio managers advising a Portfolio and any changes to the investment strategies of a Portfolio, and the performance results of the Portfolio since the date of such changes. The Board also considered, with respect to the fund-of-funds Portfolio, steps that the Adviser had taken to address the Portfolio's performance, including any changes to the investment strategies of the Portfolio invests, and the performance results of the Portfolio since the date of such changes. The Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of a Portfolio's Agreement(s) and that, after considering all relevant factors, it can reach a decision to renew an Agreement notwithstanding a Portfolio's relative underperformance.

Based on its review and the explanations provided by the Adviser and, where applicable, the relevant Sub-Adviser regarding the performance of each Portfolio, the Board determined, with respect to each Portfolio, that the Portfolio and its investors would benefit from the Adviser's and, where applicable, the relevant Sub-Adviser's continued management of the Portfolio.

<u>All Existing Portfolios</u>. Based on its review, the Board determined, with respect to each Portfolio, that the nature, quality and extent of the overall services provided by the Adviser, the relevant Sub-Adviser(s) and, where applicable, their respective affiliates were appropriate for the Portfolio in light of its investment objective(s) and, thus, supported a decision to approve the renewal of the Agreement(s).

New "Shell" Portfolios

For purposes of the below discussion with respect to each new shell Portfolio, the Board considered the investment performance of the corresponding VIP Portfolio. In this regard, the Board noted that, if the shareholders of a new shell Portfolio's corresponding VIP Portfolio approve the proposed shell reorganization, then the new shell Portfolio would assume and publish the performance record of its corresponding VIP Portfolio. The Board also noted that the proposed shell reorganizations would not result in any material changes to the Portfolios' investment programs.

<u>New EQ Allocation Portfolios</u>. With respect to the performance of each Portfolio, the Board considered that each Portfolio operates as a fund-of-funds managed by EIM and invests in a combination of other mutual funds (underlying portfolios) and recognized, therefore, that each Portfolio's performance is based, in part, on the total returns of the underlying portfolios in which it invests. The Board noted that the underlying portfolios in which each Portfolio may invest include series of EQ Advisors Trust and 1290 Funds.

With respect to the benchmark performance comparisons, the Board took into account each Portfolio's current allocation target (that is, the approximate percentage of a Portfolio's assets allocated to equity and debt securities through its investments in underlying portfolios) and compared each Portfolio's performance to the performance of the S&P 500 Index and/or the Bloomberg U.S. Intermediate Government Bond Index, accordingly.

The Board factored into its evaluation of each Portfolio's performance the limitations inherent in comparing the performance of asset allocation funds, such as the Portfolios, which may invest in equity and debt securities, to the performance of a benchmark that consists entirely of equity or debt securities and to the performance of a peer group that includes funds that may allocate their assets between equity and debt securities in different percentages over time than the Portfolios and among other asset classes. In this respect, the Board noted that, for each Portfolio, the Adviser had developed and implemented a custom blended benchmark that comprises broadbased indexes and has weighted levels of exposure to both equity and debt securities. The Board considered each Portfolio's blended benchmark in evaluating the Portfolio's performance. The Board further considered that the underlying portfolios in which each Portfolio invests may employ a tactical volatility management strategy that is intended to reduce the volatility associated with investing in equity securities in an effort to produce more favorable risk-adjusted returns over extended market cycles. The Board noted that the funds in each Portfolio's peer group may employ volatility management strategies different from those employed by underlying portfolios in which the Portfolio invests.

<u>New Target Allocation Portfolios</u>. With respect to the performance of each Portfolio, the Board considered that each Portfolio operates as a fund-of-funds managed by EIM and invests in a combination of other mutual funds (underlying portfolios) and recognized, therefore, that each Portfolio's performance is based, in part, on the total returns of the underlying portfolios in which it invests. The Board noted that the underlying portfolios in which each Portfolio may invest include series of EQ Advisors Trust and 1290 Funds.

The Board factored into its evaluation of each Portfolio's performance the limitations inherent in comparing the performance of asset allocation funds, such as the Portfolios, which may invest in equity and debt securities, to the performance of a peer group that includes funds that may allocate their assets between equity and debt securities in different percentages over time than the Portfolios and among other asset classes. The Board also factored into its evaluation of each Portfolio's performance that, although the Portfolio's benchmark may correspond to a particular target retirement date, it may have levels of exposure to equity and debt securities that vary from the Portfolio's asset allocation over time.

<u>New Core Plus Bond Portfolio</u>. With respect to the performance of the Portfolio, the Board considered that the Portfolio is actively managed and advised by multiple Sub-Advisers. In evaluating the performance of the Portfolio, the Board also noted that AXA IM, Brandywine Global, and Loomis Sayles had been retained as the Portfolio's sub-advisers, and the Portfolio had implemented a new investment strategy and changed its investment objective, performance benchmark, and fee and expense structure, in May 2020 and, therefore, the Board focused on the Portfolio's performance since that time.

<u>All New "Shell" Portfolios</u>. The Board and the Adviser discussed the performance of each Portfolio, including whether each Portfolio had performed as expected over time. The Board and the Adviser also discussed, where applicable, the reasons for a Portfolio's underperformance for certain periods relative to its peer group and/or benchmark and/or blended benchmark, as applicable, as well as actions being taken to enhance that Portfolio's performance. In this regard, the Board noted that performance, especially short-term performance, is only one of the factors that it deems relevant to its consideration of a new shell Portfolio's Agreement(s) and that, after considering all relevant factors, it can reach a decision to approve an Agreement notwithstanding a Portfolio's relative underperformance.

Based on its review and the explanations provided by the Adviser and, where applicable, the relevant Sub-Advisers regarding the performance of each corresponding VIP Portfolio, the Board determined, with respect to each new shell Portfolio, that (i) the Portfolio and its investors would benefit from the Adviser's and, where applicable, each relevant Sub-Adviser's continued management of the Portfolio and (ii) the nature, quality and extent of the overall services provided by the Adviser, the relevant Sub-Advisers and, where applicable, their respective affiliates were appropriate for the Portfolio in light of its investment objective(s) and, thus, supported a decision to approve the Agreement(s).

Expenses

The Board considered each Portfolio's advisory fee and, where applicable, sub-advisory fee(s) in light of the nature, quality and extent of the overall services provided by the Adviser and, where applicable, the relevant Sub-Adviser(s). The Board also reviewed comparative fee and expense information for each Portfolio provided directly to the Board by Broadridge. The information provided by Broadridge included an analysis of how each Portfolio's contractual advisory fee, actual advisory fee, other expense components, and total expense ratio compared with those of peer groups of other mutual funds selected by Broadridge as constituting an appropriate expense comparison for the Portfolio (typically, both a smaller expense "group" of funds selected for similarity in terms of asset size as well as other factors, and a broader expense "universe" consisting of a larger group of funds more broadly comparable to the Portfolio's contractual advisory fee in comparison with the contractual advisory fee that would have been charged by other funds within a Broadridge category assuming the other funds were similar in size to the Portfolio, as well as information on the Portfolio's actual advisory fee and total expense ratio in comparison with those of other funds within a Broadridge category. The advisory fee analysis includes within such fee any separate administrative fee paid by a fund, including the administrative fee a Portfolio. The contractual advisory function for the Portfolio. The contractual advisory fee administrator for the Portfolio.

fee analysis does not take into account any fee reimbursements or waivers, whereas the actual advisory fee analysis does take into account any advisory (including any administrative) fee reimbursements or waivers that benefit a fund. The total expense ratio represents a fund's total net operating expenses and takes into account any expense reimbursements or fee waivers that benefit a fund. Broadridge provided, and the Board considered, total expense ratio comparisons including and excluding any 12b-1 or non 12b-1 service fees and, as applicable, including fees and expenses of any underlying funds in which a fund invests. Broadridge also provided, and the Board considered, comparisons to managed volatility Broadridge categories for the Portfolios that pursue volatility management strategies either directly or through investments in underlying portfolios that pursue such strategies.

The Broadridge expense data was based upon information taken from each Portfolio's audited annual report for the period ended December 31, 2022, which reflects historical asset levels that may be quite different from those currently existing, particularly in a period of market volatility. Broadridge provided expense data for Class IB shares of each Portfolio other than the ATM International Managed Volatility, ATM Large Cap Managed Volatility, ATM Mid Cap Managed Volatility and ATM Small Cap Managed Volatility Portfolios (the "ATM Portfolios"). The Board reviewed the expense data for Class IB shares as a proxy for all of a Portfolio's operational share classes. In this regard, the Board noted that the expenses for a Portfolio's Class IB shares are generally equal to the expenses for a Portfolio's Class IA shares (as applicable) and higher than the expenses for a Portfolio's Class K shares (as applicable) and that the expense comparisons may differ for different classes. For the ATM Portfolios, Broadridge provided expense data for Class K shares, the Portfolios' only operational share class. Portfolio-specific contractual advisory fee and total expense ratio comparisons are provided below. The total expense ratio comparisons exclude any 12b-1 or non 12b-1 service fees. For the funds-of-funds Portfolios and certain other Portfolios as noted below, the total expense ratio comparisons include fees and expenses of any underlying funds in which a fund invests.

The Board received a description of, and factored into its evaluation of each Portfolio's fees and expenses the limitations inherent in, Broadridge's methodology for developing and constructing Broadridge categories and for determining, from year to year, which mutual funds should be included in which Broadridge categories, among other things. In this regard, the Board also noted that Broadridge's methodology may result in a Portfolio's being included in one peer group one year and in a different peer group the next, and in similar Portfolios being included in different peer groups. The Board recognized these inherent limitations and, taking into account commentary and supporting data presented by management, also recognized that comparisons between a Portfolio and other mutual funds in a Broadridge category may not be as relevant in certain circumstances, given that in some cases a Portfolio may exhibit notable differences (for example, in its objective(s), management techniques, relative size, and operating structure) when compared to other mutual funds in a Broadridge category. The Board also noted that the number of mutual funds included in a Broadridge category may be relatively small and may differ significantly from category to category and from year to year and that the constituent mutual funds included in a Broadridge category (as well as their respective advisory/administrative fees and total expense ratios) also may differ from year to year, which can limit the relevance of the comparisons. The Board noted that it generally considered the more-narrow expense "group" comparisons to be more important in the first instance than the broader expense "universe" comparisons, but took into account the broader expense universe comparisons as well, including, among other circumstances, when the number of funds in the more-narrow expense group was small or other aspects of the Portfolio differed appreciably from those of the funds in the more-narrow expense group. For uniformity, the Portfolio-specific contractual advisory fee and total expense ratio comparisons provided below are relative to the broader expense universe. The Board also noted that there is no standard definition of advisory and administrative services, meaning that different mutual funds may receive different services, rendering fee and expense comparisons more difficult. Nonetheless, the Board believed that the independent analysis conducted by Broadridge assisted the Board in evaluating the reasonableness of each Portfolio's advisory fee and total expense ratio. The Board also considered that the full effects of certain fee and expense changes that the Adviser had agreed to implement during 2022 were not reflected in the Broadridge expense data, but that all current fees and expenses of each Portfolio are disclosed as required in Portfolio offering documents.

The Board noted that the Broadridge expense groups and universes for the Portfolios excluded ETFs because ETFs have a different structure from open-end funds like the Portfolios and shares of ETFs are accessed differently by investors. The Board also noted that the Broadridge expense groups and universes for the actively managed Portfolios excluded passive, or index, funds because passive funds pursue their investment strategies differently from the actively managed Portfolios. The Board noted that, in each case, the excluded funds could have lower advisory fees and total expenses, and that the inclusion of these funds in peer groups and universes would have

the effect of lowering the averages and medians of the expense measurements in the peer groups and universes. The Board also noted that, as with performance peer groups, the Adviser did not participate in Broadridge's selection of peer funds, or identification of a peer group, for any Portfolio for purposes of fee and expense comparisons.

In addition, with respect to each sub-advised Portfolio, the Board further considered the relative levels of the sub-advisory fee(s) paid to the relevant Sub-Adviser(s) and the advisory fee retained by the Adviser in light of, among other factors, the nature and extent of responsibilities retained and risks assumed by the Adviser and not delegated to or assumed by the relevant Sub-Adviser(s), and the information prepared by management regarding the level of profits realized by the Adviser and its affiliates in connection with the operation of the Portfolio. The Board also considered the sub-advisory fee paid to each Sub-Adviser in light of fees charged by the Sub-Adviser to similar funds, if any, advised or sub-advised by the Sub-Adviser, including explanations of differences among funds where relevant.

Existing Portfolios

<u>Allocation Portfolios</u>. The Board considered that the contractual advisory fee for each of the EQ/AB Dynamic Moderate Growth, EQ/Aggressive Growth Strategy, EQ/All Asset Growth Allocation, EQ/Balanced Strategy, EQ/ Conservative Growth Strategy, EQ/Conservative Strategy, EQ/Growth Strategy, EQ/Moderate Growth Strategy, EQ/ Ultra Conservative Strategy, Equitable Conservative Growth MF/ETF and Equitable Moderate Growth MF/ETF Portfolios was at or below the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of the EQ/AB Dynamic Moderate Growth, EQ/Aggressive Growth Strategy, EQ/Growth Strategy and EQ/Ultra Conservative Strategy Portfolios was at or below the median for the class IB shares of each of the EQ/AB Dynamic Moderate Growth, Strategy, EQ/Conservative Strategy, EQ/Growth Strategy and EQ/Ultra Conservative Strategy Portfolios was at or below the median for the Portfolio's respective Broadridge category, the total expense ratio for the Class IB shares of the EQ/Moderate Growth Strategy Portfolio was above (but within five basis points of) the median for the Portfolio's Broadridge category, and the total expense ratio for the Class IB shares of each of the Equitable Conservative Growth MF/ETF and Equitable Moderate Growth MF/ETF Portfolios was above the median for the Portfolio's respective Broadridge category. For each Portfolio, the total expense ratio included the fees and expenses of underlying portfolios in which the Portfolio may invest.

The Board considered that the contractual advisory fee for each of the EQ/AB Dynamic Aggressive Growth and EQ/AB Dynamic Growth Portfolios was above (but within five basis points of) the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of the EQ/AB Dynamic Growth Portfolio was above (but within five basis points of) the median for the Portfolio's Broadridge category, and the total expense ratio for the Class IB shares of the EQ/AB Dynamic Aggressive Growth Portfolio was above the median for the Portfolio's Broadridge category. For each Portfolio, the total expense ratio included the fees and expenses of the underlying portfolios in which the Portfolio may invest.

The Board considered that the contractual advisory fee for each of the 1290 VT Moderate Growth Allocation, EQ/American Century Moderate Growth Allocation, EQ/Franklin Moderate Allocation, EQ/Goldman Sachs Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of the EQ/American Century Moderate Growth Allocation, EQ/Franklin Moderate Allocation, EQ/Goldman Sachs Growth Allocation, EQ/Goldman Sachs Moderate Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation, EQ/Invesc

With respect to each of the Strategic Allocation Portfolios, the MF/ETF Portfolios, and the 1290 VT Moderate Growth Allocation and EQ/All Asset Growth Allocation Portfolios, the Board also considered each Portfolio's advisory fee rate relative to the advisory fee rates of other portfolios managed by the Adviser that, like the Portfolios, are structured as funds-of-funds, and noted that differences in the level of the fees reflected differences between a Portfolio and other funds-of-funds managed by the Adviser.

With respect to the 1290 VT Moderate Growth Allocation, EQ/AB Dynamic Aggressive Growth, EQ/AB Dynamic Growth, EQ/AB Dynamic Moderate Growth, EQ/American Century Moderate Growth Allocation, EQ/ Franklin Moderate Allocation, EQ/Goldman Sachs Growth Allocation, EQ/Goldman Sachs Moderate Growth Allocation, EQ/Invesco Moderate Allocation, EQ/Invesco Moderate Growth Allocation and EQ/JPMorgan Growth Allocation Portfolios, the Board also noted that the funds in a Portfolio's Broadridge category may employ volatility management strategies different from those employed by the Portfolio.

The Board further considered that the advisory fee rate schedule for each Portfolio other than the EQ/All Asset Growth Allocation Portfolio includes breakpoints that reduce the fee rate as a Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for each Portfolio (a) aggregates the assets managed by the Adviser in these Portfolios and several other portfolios in the fund complex, which is expected to reduce the likelihood that a Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate assets increase above certain levels. The Board noted that any such reduction in a Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that each Portfolio's total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. In this regard, the Board also noted that each Portfolio's expense limitation arrangement includes the fees and expenses of underlying portfolios in which the Portfolio invests and, thus, such fees and expenses would not cause the Portfolio's annual operating expenses to exceed its expense limitation. The Board also noted that, as a result of these expense limitation arrangements, the actual advisory fee for each Portfolio (except the Strategic Allocation Portfolios and the EQ/AB Dynamic Moderate Growth and EQ/All Asset Growth Allocation Portfolios) was lower than the Portfolio's contractual advisory fee.

The Board also considered that, as funds-of-funds that indirectly bear the expenses charged by the underlying portfolios in which they invest, the Strategic Allocation Portfolios, the MF/ETF Portfolios, and the 1290 VT Moderate Growth Allocation and EQ/All Asset Growth Allocation Portfolios would benefit from any breakpoints in the advisory and administrative fee rate schedules for the underlying portfolios, in particular the underlying portfolios managed by the Adviser or EIM II.

Based on its review, the Board determined, with respect to each Portfolio, that the Adviser's advisory fee and, where applicable, the Sub-Adviser's sub-advisory fee are fair and reasonable.

<u>Passive with Managed Volatility Portfolios</u>. The Board considered that the contractual advisory fee for each of the ATM International Managed Volatility, ATM Large Cap Managed Volatility, ATM Mid Cap Managed Volatility, ATM Small Cap Managed Volatility, EQ/400 Managed Volatility, EQ/500 Managed Volatility, EQ/2000 Managed Volatility and EQ/International Managed Volatility Portfolios was below the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class K or Class IB shares (as applicable) of each of the Portfolios was below the median for the Portfolio's respective Broadridge category. The Board also noted that the funds in a Portfolio's managed volatility Broadridge category may employ volatility management strategies different from those employed by the Portfolio.

The Board further considered that the advisory fee rate schedule for each Portfolio includes breakpoints that reduce the fee rate as a Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for each Portfolio (a) aggregates the assets managed by the Adviser in these Portfolio's and several other portfolios in the fund complex, which is expected to reduce the likelihood that a Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate assets increase above certain levels. The Board noted that any such reduction in a Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that each Portfolio's total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. The Board also noted that, as a result of these expense limitation arrangements, the actual advisory fee for the ATM Mid Cap Managed Volatility Portfolio was lower than the Portfolio's contractual advisory fee.

Based on its review, the Board determined, with respect to each Portfolio, that the Adviser's advisory fee and the Sub-Advisers' sub-advisory fees are fair and reasonable.

Passive without Managed Volatility Portfolios. The Board considered that the contractual advisory fee for each of the 1290 VT Convertible Securities, 1290 VT Natural Resources, 1290 VT Real Estate, 1290 VT Socially Responsible,

EQ/Common Stock Index, EQ/Large Cap Growth Index, EQ/Large Cap Value Index and EQ/Small Company Index Portfolios was at or below the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of the 1290 VT Convertible Securities, 1290 VT Natural Resources, 1290 VT Real Estate, 1290 VT Socially Responsible, EQ/Common Stock Index and EQ/Small Company Index Portfolios was at or below the median for the Portfolio's respective Broadridge category, the total expense ratio for the Class IB shares of the EQ/Large Cap Growth Index Portfolio was above (but within five basis points of) the median for the Portfolio's Broadridge category, and the total expense ratio for the Class IB shares of the EQ/Large Cap Value Index Portfolio was above the median for the Portfolio's Broadridge category.

The Board considered that the contractual advisory fee for each of the EQ/Core Bond Index, EQ/Equity 500 Index, EQ/Intermediate Government Bond, EQ/International Equity Index, EQ/Long-Term Bond and EQ/Mid Cap Index Portfolios was above the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of these Portfolios was above (but, in the case of the EQ/Equity 500 Index Portfolio, within five basis points of) the median for the Portfolio's respective Broadridge category.

The Board also took into account that peer groups in which certain Portfolios were placed for comparison purposes include only funds with passive management strategies, whereas peer groups in which other Portfolios were placed for comparison purposes include funds with active management strategies.

The Board further considered that the advisory fee rate schedule for each Portfolio includes breakpoints that reduce the fee rate as a Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for each Portfolio (a) aggregates the assets managed by the Adviser in these Portfolios and several other portfolios in the fund complex, which is expected to reduce the likelihood that a Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate assets increase above certain levels. The Board noted that any such reduction in a Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that each Portfolio's total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. In this regard, the Board also noted that the expense limitation arrangement for each of the 1290 VT Natural Resources and EQ/International Equity Index Portfolios includes the fees and expenses of underlying portfolios in which the Portfolio may invest and, thus, such fees and expenses, if any, would not cause the Portfolio's annual operating expenses to exceed its expense limitation. The Board also noted that, as a result of these expense limitation arrangements, the actual advisory fee for each of the 1290 VT Convertible Securities, 1290 VT Natural Resources, 1290 VT Real Estate, EQ/Core Bond Index, EQ/Equity 500 Index, EQ/Intermediate Government Bond, EQ/ International Equity Index, EQ/Long-Term Bond and EQ/Mid Cap Index Portfolios was lower than the Portfolio's contractual advisory fee.

The Board also considered that, after extensive discussions and negotiations with the Adviser, the Adviser had proposed to lower the existing contractual expense limitation arrangement for each of the EQ/Common Stock Index, EQ/Core Bond Index, EQ/Intermediate Government Bond, EQ/International Equity Index and EQ/Mid Cap Index Portfolios, effective October 1, 2023.

Based on its review, the Board determined, with respect to each Portfolio, that the Adviser's advisory fee and the Sub-Adviser's sub-advisory fee are fair and reasonable.

<u>Pactive with Managed Volatility Portfolios</u>. The Board considered that the contractual advisory fee for each of the EQ/Large Cap Core Managed Volatility, EQ/Large Cap Growth Managed Volatility, EQ/Large Cap Value Managed Volatility Portfolios was below the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of these Portfolios was below the median for the Portfolio's respective Broadridge category.

The Board considered that the contractual advisory fee for each of the EQ/ClearBridge Select Equity Managed Volatility, EQ/Franklin Small Cap Value Managed Volatility, EQ/Global Equity Managed Volatility, EQ/International Core Managed Volatility and EQ/International Value Managed Volatility Portfolios was above the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of these Portfolios was above (but, in the case of each of the EQ/International Core Managed Volatility and EQ/International Value Managed Volatility Portfolios, within five basis points of) the median for the Portfolio's respective Broadridge category.

The Board also noted that the funds in a Portfolio's Broadridge category may or may not employ an investment strategy similar to the Portfolio's that includes active, passive and (in the case of certain Portfolios) ETF components, and that the funds in a Portfolio's managed volatility Broadridge category may employ volatility management strategies different from those employed by the Portfolio.

The Board further considered that the advisory fee rate schedule for each Portfolio includes breakpoints that reduce the fee rate as a Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for each Portfolio (a) aggregates the assets managed by the Adviser in these Portfolio's and several other portfolios in the fund complex, which is expected to reduce the likelihood that a Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate assets increase above certain levels. The Board noted that any such reduction in a Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that each Portfolio's total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. The Board also noted that, as a result of these expense limitation arrangements, the actual advisory fee for each of the EQ/ClearBridge Select Equity Managed Volatility, EQ/Franklin Small Cap Value Managed Volatility and EQ/Global Equity Managed Volatility Portfolio's scontractual advisory fee.

Based on its review, the Board determined, with respect to each Portfolio, that the Adviser's advisory fee and the Sub-Advisers' sub-advisory fees are fair and reasonable.

<u>Pactive without Managed Volatility Portfolios</u>. The Board considered that the contractual advisory fee for each of the EQ/AB Small Cap Growth and EQ/Emerging Markets Equity PLUS Portfolios was below the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of these Portfolios was below the median for the Portfolio's respective Broadridge category.

The Board considered that the contractual advisory fee for each of the EQ/Quality Bond PLUS and Multimanager Aggressive Equity Portfolios was above (but within five basis points of) the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of these Portfolio was above (but within five basis points of) the median for the Portfolio's respective Broadridge category.

The Board considered that the contractual advisory fee for each of the 1290 VT High Yield Bond, 1290 VT Micro Cap, 1290 VT Small Cap Value, EQ/Morgan Stanley Small Cap Growth, Multimanager Core Bond and Multimanager Technology Portfolios was above the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of the Multimanager Technology Portfolio was at the median for the Portfolio's Broadridge category, the total expense ratio for the Class IB shares of each of the 1290 VT Micro Cap, 1290 VT Small Cap Value and EQ/Morgan Stanley Small Cap Growth Portfolios was above (but within five basis points of) the median for the Portfolio's respective Broadridge category, and the total expense ratio for the Class IB shares of each of the 1290 VT High Yield Bond and Multimanager Core Bond Portfolios was above the median for the Portfolio's respective Broadridge category.

The Board also noted that the funds in a Portfolio's Broadridge category may or may not employ an investment strategy similar to the Portfolio's that includes active, passive and (in the case of certain Portfolios) ETF components.

The Board further considered that the advisory fee rate schedule for each Portfolio includes breakpoints that reduce the fee rate as a Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for each Portfolio (a) aggregates the assets managed by the Adviser in these Portfolios and several other portfolios in the fund complex, which is expected to reduce the likelihood that a Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate assets increase above certain levels. The Board noted that any such reduction in a Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that each Portfolio's total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. The Board also noted that, as a result of these expense limitation arrangements, the actual advisory fee for each Portfolio (except the EQ/AB Small Cap Growth, EQ/Quality Bond PLUS and Multimanager Aggressive Equity Portfolios) was lower than the Portfolio's contractual advisory fee.

Based on its review, the Board determined, with respect to each Portfolio, that the Adviser's advisory fee and the Sub-Advisers' sub-advisory fees are fair and reasonable.

<u>Active Portfolios</u>. The Board considered that the contractual advisory fee for each of the 1290 VT GAMCO Mergers & Acquisitions, 1290 VT GAMCO Small Company Value, 1290 VT SmartBeta Equity ESG, EQ/Fidelity Institutional AM[®] Large Cap, EQ/MFS Technology and EQ/Value Equity Portfolios was at or below the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of these Portfolios was below the median for the Portfolio's respective Broadridge category.

The Board considered that the contractual advisory fee for each of the EQ/Franklin Rising Dividends, EQ/ Invesco Global Real Assets, EQ/JPMorgan Value Opportunities and EQ/Janus Enterprise Portfolios was above (but within five basis points of) the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of the EQ/Franklin Rising Dividends and EQ/ Janus Enterprise Portfolios was at or below the median for the Portfolio's respective Broadridge category, and the total expense ratio for the Class IB shares of each of the EQ/Invesco Global Real Assets and EQ/JPMorgan Value Opportunities Portfolios was above (but within five basis points of) the median for the Portfolio's respective Broadridge category.

The Board considered that the contractual advisory fee for each of the 1290 VT DoubleLine Opportunistic Bond, 1290 VT Equity Income, 1290 VT Multi-Alternative Strategies, EQ/AB Short Duration Government Bond, EQ/ AB Sustainable U.S. Thematic, EQ/American Century Mid Cap Value, EQ/Capital Group Research, EQ/ClearBridge Large Cap Growth ESG, EQ/Goldman Sachs Mid Cap Value, EQ/Invesco Comstock, EQ/Invesco Global, EQ/Lazard Emerging Markets Equity, EQ/Loomis Sayles Growth, EQ/MFS International Growth, EQ/MFS International Intrinsic Value, EQ/MFS Mid Cap Focused Growth, EQ/MFS Utilities Series, EQ/Money Market, EQ/PIMCO Global Real Return, EQ/PIMCO Real Return, EQ/PIMCO Total Return ESG, EQ/PIMCO Ultra Short Bond, EQ/T. Rowe Price Growth Stock, EQ/T. Rowe Price Health Sciences and EQ/Wellington Energy Portfolios was above the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each of the EQ/American Century Mid Cap Value, EQ/PIMCO Real Return, EQ/PIMCO Total Return ESG, EQ/T. Rowe Price Health Sciences and EQ/Wellington Energy Portfolios was at or below the median for the Portfolio's respective Broadridge category, the total expense ratio for the Class IB shares of each of the EQ/ AB Sustainable U.S. Thematic, EQ/ClearBridge Large Cap Growth ESG, EQ/Lazard Emerging Markets Equity, EQ/ MFS International Growth, EQ/MFS Mid Cap Focused Growth and EQ/MFS Utilities Series Portfolios was above (but within five basis points of) the median for the Portfolio's respective Broadridge category, and the total expense ratio for the Class IB shares of each of the 1290 VT DoubleLine Opportunistic Bond, 1290 VT Equity Income, 1290 VT Multi-Alternative Strategies, EQ/AB Short Duration Government Bond, EQ/Capital Group Research, EQ/ Goldman Sachs Mid Cap Value, EQ/Invesco Comstock, EQ/Invesco Global, EQ/Loomis Sayles Growth, EQ/MFS International Intrinsic Value, EQ/Money Market, EQ/PIMCO Global Real Return, EQ/PIMCO Ultra Short Bond and EQ/T. Rowe Price Growth Stock Portfolios was above the median for the Portfolio's respective Broadridge category.

With respect to the 1290 VT Multi-Alternative Strategies Portfolio, the Board also considered the Portfolio's advisory fee rate relative to the advisory fee rates of other portfolios managed by the Adviser that, like the Portfolio, are structured as funds-of-funds, and noted that differences in the level of the fees reflected differences between the Portfolio and other funds-of-funds managed by the Adviser.

The Board further considered that the advisory fee rate schedule for each Portfolio includes breakpoints that reduce the fee rate as a Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for each Portfolio (a) aggregates the assets managed by the Adviser in these Portfolios and several other portfolios in the fund complex, which is expected to reduce the likelihood that a Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate assets increase above certain levels. The Board noted that any such reduction in a Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that, for each Portfolio (except the EQ/ Money Market Portfolio), the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that each of these Portfolios' total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. In this regard, the Board also noted that the expense limitation arrangement for each of the EQ/American Century Mid Cap Value, EQ/Fidelity Institutional AM[®] Large Cap, EQ/Franklin Rising Dividends, EQ/Goldman Sachs Mid Cap Value, EQ/MFS Mid Cap Focused Growth, EQ/MFS

Technology, EQ/MFS Utilities Series, EQ/PIMCO Real Return, EQ/PIMCO Total Return ESG, EQ/T. Rowe Price Health Sciences and EQ/Wellington Energy Portfolios includes the fees and expenses of underlying portfolios in which the Portfolio may invest and, thus, such fees and expenses, if any, would not cause the Portfolio's annual operating expenses to exceed its expense limitation. The Board noted that, as a result of these expense limitation arrangements, the actual advisory fee for each Portfolio (except the 1290 VT GAMCO Small Company Value, EQ/ Invesco Global Real Assets, EQ/Janus Enterprise, EQ/JPMorgan Value Opportunities, EQ/MFS Technology and EQ/ Value Equity Portfolios) was lower than the Portfolio's contractual advisory fee. In addition, the Board considered that the Adviser had voluntarily agreed to make payments or waive a portion of its and its affiliates' advisory, administrative and other fees to enable the EQ/Money Market Portfolio to maintain a stable net asset value of \$1.00 per share and to prevent a negative yield.

The Board also considered that, after extensive discussions and negotiations with the Adviser, the Adviser had proposed to lower the existing contractual expense limitation arrangement for the EQ/Invesco Global Portfolio, effective October 1, 2023. The Board also considered that, as discussed elsewhere in this shareholder report, the Adviser had agreed to lower the existing contractual expense limitation arrangement for the EQ/T. Rowe Price Growth Stock Portfolio, effective on or about July 31, 2023, in connection with a change in Sub-Adviser for the Portfolio.

Based on its review, the Board determined, with respect to each Portfolio, that the Adviser's advisory fee and, where applicable, the Sub-Adviser's sub-advisory fee are fair and reasonable.

New "Shell" Portfolios

<u>New EQ Allocation Portfolios and New Target Allocation Portfolios</u>. The Board considered that the contractual advisory fee for each of the EQ/Aggressive Allocation, EQ/Conservative Allocation, EQ/Conservative-Plus Allocation, EQ/Moderate Allocation and EQ/Moderate-Plus Allocation Portfolios was at the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each Portfolio was above (but, in the case of the EQ/Conservative Allocation Portfolio, within five basis points of) the median for the Portfolio's respective Broadridge category.

The Board considered that the contractual advisory fee for the Target 2015 Allocation Portfolio was at the median for the Portfolio's Broadridge category, and the contractual advisory fee for each of the Target 2025 Allocation, Target 2035 Allocation, Target 2045 Allocation and Target 2055 Allocation Portfolios was above (but within five basis points of) the median for the Portfolio's respective Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of each Portfolio was above the median for the Portfolio's respective Broadridge category.

The Board also considered each Portfolio's advisory fee rate relative to the advisory fee rates of other portfolios managed by the Adviser that, like these Portfolios, are structured as funds-of-funds, and noted that differences in the level of the fees reflected differences between a Portfolio and other funds-of-funds managed by the Adviser.

The Board further considered that the advisory fee rate schedule for each of the New EQ Allocation Portfolios includes breakpoints that reduce the fee rate as a Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for all of the Portfolios (a) aggregates the assets managed by the Adviser in these Portfolios and in several other Portfolios of the Trust, which is expected to reduce the likelihood that a Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate Portfolio assets increase above certain levels. The Board noted that any such reduction in a Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that each Portfolio's total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. In this regard, the Board also noted that each Portfolio's expense limitation arrangement includes the fees and expenses of underlying portfolios in which the Portfolio invests and, thus, such fees and expenses would not cause a Portfolio's annual operating expenses to exceed its expense limitation. The Board noted that, as a result of these expense limitation arrangements, the actual advisory fee for each of the EQ/ Conservative Allocation, Target 2015 Allocation, Target 2025 Allocation and Target 2055 Allocation Portfolios was lower than the Portfolio's contractual advisory fee.

The Board also considered that, as funds-of-funds that indirectly bear the expenses charged by the underlying portfolios in which they invest, the Portfolios would benefit from any breakpoints in the advisory and/or administrative fee rate schedules for the underlying portfolios, all of which are managed by the Adviser or EIM II.

Based on its review, the Board determined, with respect to each Portfolio, that the Adviser's advisory fee is fair and reasonable.

<u>New Core Plus Bond Portfolio</u>. The Board considered that the contractual advisory fee for the New Core Plus Bond Portfolio was above the median for the Portfolio's Broadridge category. The Board also considered that the total expense ratio for the Class IB shares of the Portfolio was above the median for the Portfolio's Broadridge category.

The Board further considered that the advisory fee rate schedule for the New Core Plus Bond Portfolio includes breakpoints that reduce the fee rate as the Portfolio's assets increase above certain levels. The Board also considered that the administrative fee rate schedule for the Portfolio (a) aggregates the assets managed by the Adviser in the Portfolio and in several other Portfolios of the Trust, which is expected to reduce the likelihood that the Portfolio's administrative fee would increase in the future if the Portfolio's assets decline over time, and (b) includes breakpoints that reduce the fee rate as aggregate Portfolio assets increase above certain levels. The Board noted that any such reduction in the Portfolio's effective advisory and/or administrative fee would result in corresponding reductions in the Portfolio's total expense ratios. In addition, the Board considered that the Adviser had contractually agreed to make payments or waive all or a portion of its and its affiliates' advisory, administrative and other fees so that the Portfolio's total expense ratios do not exceed certain levels as set forth in the Portfolio's prospectus. In this regard, the Board also noted that the Portfolio may invest and, thus, such fees and expenses, if any, would not cause the Portfolio's annual operating expenses to exceed its expense limitation. The Board noted that, as a result of the expense limitation arrangement, the Portfolio's actual advisory fee was lower than the Portfolio's contractual advisory fee.

Based on its review, the Board determined, with respect to the Portfolio, that the Adviser's advisory fee and the Sub-Advisers' sub-advisory fees are fair and reasonable.

Profitability and Costs

The Board also considered the level of profits realized by the Adviser and its affiliates in connection with the operation of each Portfolio. In this respect, the Board reviewed profitability information setting forth the overall profitability of the Trust to the Adviser and its affiliates, as well as the Adviser's and its affiliates' profits (if any) in providing management and other services to each of the individual Portfolios during the 12-month period ended December 31, 2022, which was the most recent fiscal year for the Adviser. The Board also considered a year-over-year comparison of profitability information for the one-year periods ended December 31, 2022, 2021, and 2020.

In reviewing the Adviser's profitability analysis, attention was given to the methodology the Adviser followed in determining and allocating costs to each Portfolio. The Board recognized that there is no uniform methodology within the asset management industry regarding the allocation of firm-wide or complex-wide expenses for determining profitability for this purpose; cost allocation methodologies are inherently subjective; and various cost allocation methodologies may each be reasonable while producing different results. In this regard, the Board noted that the Adviser's cost allocation methodology was consistent with the cost allocation methodology followed in the profitability report presentations for the Portfolios beginning with the July 2018 annual renewal process. The Board also noted that, in consultation with and through independent legal counsel, the Board's Audit Committee has engaged an outside consultant to conduct periodic assessments of the cost allocation methodology, including adjustments to the methodology, as part of the Board's review of the Adviser's profitability analysis in connection with the annual renewal process. In addition to the annual profitability report presentation and extensive discussions with management, the Board took into account the series of assessments and noted that, following each such assessment, the consultant found that the Adviser's overall cost allocation methodology was reasonable in all material respects and generally consistent with observed industry practices. The Board also took into account management's ongoing costs and expenditures in providing and improving services for the Portfolios, as well as the need to meet additional regulatory and compliance requirements resulting from changes in rules and other regulations and to adapt to other challenges impacting the mutual fund industry. In addition, the Board considered information prepared by management and from third party sources comparing the profitability of the Adviser on an overall basis to the profitability of other publicly held asset managers (including asset managers similar to the Adviser) over various time periods.

In addition, with respect to the sub-advised Portfolios, the Board noted that the Board and the Adviser generally are aware of the fees charged by the Sub-Advisers to other clients (this information having been provided to the Board and the Adviser by the Sub-Advisers in conjunction with the proposed renewal of the Sub-Advisory Agreements) and that the Adviser believes that the fees agreed upon with the Sub-Advisers are reasonable in light of the nature, quality and extent of the investment sub-advisory services provided. The Board acknowledged that, because each Sub-Adviser's fee is paid by the Adviser, the Adviser is incentivized to negotiate a favorable fee. The Adviser advised the Board that it does not regard Sub-Adviser profitability as meaningful to its evaluation of the Sub-Advisory Agreements. The Board acknowledged the Adviser's view of Sub-Adviser profitability, noting the Board's findings as to the reasonableness of the sub-advisory fees and that the fees paid to the Sub-Advisers are the product of negotiations with the Adviser and reflect levels of profitability acceptable to the Adviser and the Sub-Advisers based on the particular circumstances for each of them. The Board further noted that each Sub-Adviser's fee is paid by the Adviser and not the sub-advised Portfolio and that many responsibilities related to the advisory function are retained by the Adviser. The Board also noted that, with respect to AllianceBernstein, which is an affiliate of the Adviser, the Adviser provides additional information regarding the entity's impact on the Adviser's profitability. The Board also noted that the sub-advisory fees paid by the Adviser to AllianceBernstein are considered as possible fall-out benefits.

Based on its consideration of the factors above, the Board determined that the level of profits realized by the Adviser and its affiliates from providing services to each Portfolio was not excessive in view of the nature, quality and extent of the services provided and the risks assumed.

Economies of Scale

The Board also considered whether economies of scale or efficiencies are realized by the Adviser as a Portfolio grows larger, the extent to which this is reflected in the level of advisory and administrative fees charged, and whether there is potential for realization of any further economies of scale or efficiencies. While recognizing that any precise determination is inherently subject to assumptions and subjective assessments, the Board considered that any realized economies of scale or efficiencies may be shared with portfolios and their shareholders in a variety of ways, including: (i) breakpoints in the advisory fee or other fees so that a portfolio's effective fee rate declines as the portfolio grows in size, (ii) subsidizing a portfolio's expenses by making payments or waiving all or a portion of the advisory fee or other fees so that the portfolio's total expense ratio does not exceed certain levels, (iii) setting the advisory fee or other fees so that a portfolio is priced to scale, which assumes that the portfolio has sufficient assets from inception to operate at a competitive fee rate without any fee waiver or expense reimbursement from the manager, and (iv) reinvestment in, and enhancements to, the services that the manager and its affiliates provide to a portfolio and its shareholders. The Board noted that the advisory fee rate schedules for all Portfolios other than the EQ/All Asset Growth Allocation Portfolio and the New Target Allocation Portfolios include breakpoints that reduce the fee rate as Portfolio assets increase above certain levels, and also considered whether such breakpoints are set at appropriate asset levels. The Board also noted that the administrative fee rate schedules for all of the Portfolios aggregate the assets managed by the Adviser in a Portfolio and in several other portfolios in the fund complex and include breakpoints that reduce the fee rate as aggregate assets increase above certain levels. The Board also noted that the Adviser was subsidizing certain Portfolios' expenses by making payments or waiving all or a portion of its and its affiliates' advisory, administrative and other fees so that the Portfolios' total expense ratios do not exceed certain contractual levels as set forth in their prospectuses. The Board recognized that expense limitation arrangements can have an effect similar to breakpoints in sharing economies of scale with shareholders and provide protection from an increase in expenses if a Portfolio's assets decline. In this connection, the Board also considered that, after extensive discussions and negotiations with the Adviser, the Adviser had proposed to lower the contractual expense limitation arrangements for certain of the Portfolios, as noted above, effective October 1, 2023. In addition, the Board considered that the Adviser shares any realized economies of scale with the Portfolios in other ways, which may include setting a Portfolio's fees so that they are priced to scale. The Board considered that the effect of this pricing strategy is that the Adviser could lose money in the early stages of a Portfolio's operation (and bears the risk that the Portfolio will never become profitable), while shareholders of the Portfolio receive the benefit of economies of scale that the Adviser expects the Portfolio will achieve as it grows. The Board further considered that the Adviser shares any realized economies of scale with the Portfolios through reinvestment in, and enhancements to, the services that the Adviser and its affiliates provide to the Portfolios and their shareholders, such as hiring additional personnel, providing additional resources in areas relating to management and administration of the Portfolios, and the ongoing development of the Adviser's infrastructure and information technology to support the Portfolios through, among other things, cybersecurity, business continuity planning, and risk management. In this regard, the Board

also considered information about the operation of the Trust's securities lending program. The Board also noted that the Adviser can share economies of scale with Portfolios by maintaining existing expense structures in the face of a rising cost environment.

In addition, the Board noted that the sub-advisory fee schedules for certain Sub-Advisers aggregate the assets managed by the Sub-Adviser in a Portfolio and in one or more other mutual funds for which the Sub-Adviser serves as investment sub-adviser and the Adviser or EIM II serves as investment adviser. The Board also noted that the sub-advisory fee schedules for certain Sub-Advisers include breakpoints that reduce the sub-advisory fee rate as applicable Portfolio assets under the Sub-Adviser's management increase above certain levels. In this regard, the Board acknowledged that, at some levels, the breakpoints in a sub-advisory fee schedule may result in savings to the Adviser and not to investors. The Board also noted that the aggregation of assets may result in the affected Portfolio(s) reaching a breakpoint sooner than if the sub-advisory fee schedule did not aggregate assets, which also has the potential to benefit the Adviser. With respect to sub-advisory fees that do not include breakpoints, the Board considered the Sub-Advisers' explanations that the sub-advisory fees are priced at a competitive level.

Based on its consideration of the factors above, the Board determined that there was a reasonable sharing of any realized economies of scale or efficiencies under the advisory, administrative and, as applicable, sub-advisory fee schedules at the present time.

Fall-Out and Other Benefits

The Board also considered the extent to which fall-out benefits may accrue to the Adviser and its affiliates. In this connection, the Board considered several possible fall-out benefits and other types of benefits, including the following. The Board noted that EIM II, an affiliate of the Adviser, serves as the administrator for the Portfolios and receives compensation for acting in this capacity. In addition, the Board recognized that AllianceBernstein, also an affiliate of the Adviser, serves as Sub-Adviser to certain of the Portfolios and receives sub-advisory fees that are paid by the Adviser out of the fees that it earns from those Portfolios. The Board also recognized that Equitable Distributors, LLC, also an affiliate of the Adviser, serves as the underwriter for the Trust and receives from the Portfolios payments pursuant to Rule 12b-1 plans with respect to their Class IA and Class IB shares to compensate it for providing shareholder services and selling activities, which could lead to growth in the Trust's assets and corresponding benefits from such growth, including economies of scale. Further, the Board considered that Sanford C. Bernstein & Co., LLC, a registered broker-dealer, is an affiliate of the Adviser and may, from time to time, receive brokerage commissions from the Portfolios in connection with the purchase and sale of portfolio securities; provided, however, that those transactions, among other things, are consistent with seeking best execution. The Board also recognized that the EQ/All Asset Growth Allocation Portfolio, the Strategic Allocation Portfolios, the MF/ETF Portfolios, the New EQ Allocation Portfolios, and the New Target Allocation Portfolios invest in other (underlying) portfolios managed by the Adviser or EIM II, and in certain cases advised by an affiliated Sub-Adviser, and that these underlying portfolios pay advisory fees to the Adviser or EIM II, who may in certain cases pay sub-advisory fees to an affiliated Sub-Adviser, and also pay administrative fees and distribution fees to the Adviser's administrative services and distribution affiliates. The Board also noted that the Adviser's affiliated insurance companies, as depositors of the insurance company separate accounts investing in the Portfolios, receive certain significant tax benefits associated with such investments, including a dividend received deduction (which is a tax deduction received by a corporation, such as an insurance company, on the dividends paid to it by companies in which it has an ownership stake, such as the Portfolios whose shares are held by insurance company separate accounts), a foreign tax credit (which is a tax credit received by a shareholder for foreign income taxes paid by a Portfolio to a foreign country) and tax benefits associated with Portfolios making elections pursuant to Section 382 of the Internal Revenue Code (which limits a corporation's use of its existing loss carryforwards following an ownership change of the corporation absent certain elections by entities that it is deemed to control, such as the Portfolios, to increase the limitations with respect to their use of their own loss carryforwards), as well as other potential benefits. The Board also considered that the Portfolios are offered as investment options through variable insurance contracts offered and sold by the Adviser's affiliated insurance companies and that the performance of each Portfolio may impact, positively or negatively, each insurance company's ability to hedge the risks associated with guarantees that each insurance company may provide as the issuer of such contracts. The Board also noted that the Adviser's affiliated insurance companies and Equitable Distributors, LLC receive compensation, which may include sales charges, separate account fees and charges, and other variable contract fees and charges, from the sale and administration of these variable insurance contracts. The Board also considered that certain Portfolios are subject to certain investment controls that are designed to reduce volatility for investors and that may benefit both investors and the Adviser and its affiliates (including by making it easier for the insurance companies to hedge their risks under the guarantees). Based on its review, the Board determined that any "fall-out" benefits and other types of benefits that may accrue to the Adviser are fair and reasonable.

The Board also considered possible fall-out benefits and other types of benefits that may accrue to a Sub-Adviser, including the following. The Board considered that a Sub-Adviser, through its position as a Sub-Adviser to its respective Portfolio(s), may engage in "soft dollar" transactions. In addition, the Board considered that a Sub-Adviser may be affiliated with registered broker-dealers who may, from time to time, receive brokerage commissions from a Portfolio in connection with the purchase and sale of portfolio securities; provided, however, that those transactions, among other things, are consistent with seeking best execution. In cases where a Sub-Adviser's affiliate executed a substantial portion of its respective Portfolio's trades, the Board also considered the Sub-Adviser's trading experience and discussed with the Adviser its monitoring of the Sub-Adviser's brokerage selection, commission and other trading costs, and quality of execution. The Board also noted that certain Sub-Advisers currently serve as investment sub-advisers for other funds advised by the Adviser or EIM II and receive sub-advisory fees with respect to those funds. The Board also recognized that a Sub-Adviser and its affiliates may sell, and earn sales commissions and/or other compensation with respect to, insurance products issued by the Adviser's affiliated insurance companies and that the proceeds of those sales may be invested in a Portfolio. The Board also recognized that a Sub-Adviser and its affiliates may sell, and earn sales commissions and/ or other compensation with respect to, other investment products issued by the Adviser or its affiliates. In addition, the Board noted that a Sub-Adviser may benefit from greater exposure in the marketplace with respect to the Sub-Adviser's investment process and from expanding its level of assets under management, and a Sub-Adviser may derive benefits from its association with the Adviser. Based on its review, the Board determined that any "fall-out" benefits and other types of benefits that may accrue to the Sub-Advisers are fair and reasonable.

Additional Approval related to EQ/Money Market Portfolio – Novation of Sub-Advisory Agreement

As discussed above, at the July 2023 Meeting, the Board, including the Independent Trustees, on the basis of their business judgment after review of the information provided, concluded that (i) the renewal of the Advisory Agreement between the Trust and the Adviser with respect to the EQ/Money Market Portfolio was in the best interests of the Portfolio and its investors and that the advisory fee rate set forth in the agreement was fair and reasonable; and (ii) the renewal of the Sub-Advisory Agreement") was in the best interests of the Portfolio (the "Original Agreement") was in the best interests of the Portfolio and its investors and that the agreement was fair and reasonable.

As noted above, at the July 2023 Meeting, in connection with its consideration and approval of the renewal of the Original Agreement, the Board, including the Independent Trustees, also considered and unanimously approved a novation agreement among the Adviser, BNY Mellon and BNY Mellon's affiliate Mellon Investments Corporation ("MIC," acting by and through its Dreyfus division) (the "Novation Agreement"). In connection with its approval of the Novation Agreement, the Board considered its conclusions in connection with its approval of the renewal of the Original Agreement, including the Board's satisfaction with the nature, quality and extent of services being provided to the EQ/Money Market Portfolio by BNY Mellon. In reaching its decision to approve the Novation Agreement, the Board also considered that: (i) BNY Mellon and MIC are wholly-owned subsidiaries of The Bank of New York Mellon Corporation ("BNY Mellon Corp"); (ii) Dreyfus is currently an unincorporated division of both BNY Mellon and MIC; (iii) pursuant to an internal BNY Mellon Corp reorganization, Dreyfus will become, as of September 1, 2023, solely a division of MIC; and (iv) as Dreyfus will no longer be a division of BNY Mellon, the parties to the Original Agreement and MIC desire to novate the Original Agreement, effective September 1, 2023, to transfer BNY Mellon's rights, liabilities and obligations under the Original Agreement to MIC. The Board further considered that BNY Mellon and MIC had represented that there would be no changes to the Dreyfus investment personnel who manage the EQ/Money Market Portfolio or to the underlying investment philosophy or process, operations or services rendered under, or the sub-advisory fee payable by the Adviser to the Sub-Adviser under, the Original Agreement as a result of the novation. The Board also noted that BNY Mellon and MIC had received an opinion of counsel stating that the internal reorganization would not result in a change of control of BNY Mellon through its Dreyfus division under the 1940 Act and, therefore, would not cause an "assignment" of the Original Agreement for purposes of the 1940 Act. The Board also noted that the terms and conditions of the Advisory Agreement between the Trust and the Adviser with respect to the EQ/Money Market Portfolio (including the advisory fee schedule) would remain unchanged, and the services provided by the Adviser to the EQ/Money Market Portfolio under the Advisory Agreement would remain unchanged.

In approving the Novation Agreement, each Trustee, including the Independent Trustees, after considering all factors they deemed relevant, reached a determination, with the assistance of Independent Trustees' counsel and fund counsel and through the exercise of their own business judgment, that the sub-advisory fee was fair and reasonable and that the approval of the Novation Agreement was in the best interests of the EQ/Money Market Portfolio and its investors.

Appendix A

The Board noted that the following information regarding each Portfolio's performance relative to a benchmark and/or a blended benchmark and a peer group for the one-, three-, five- and ten-year periods, as applicable, and since inception periods ended March 31, 2023, supplemented other performance information (including performance based on rolling time periods) provided to the Board throughout the year and in connection with the annual renewal process. The performance results may differ from the performance results for more recent periods, including those shown elsewhere in this shareholder report. The performance results do not reflect any fees and expenses associated with variable life insurance contracts and variable annuity certificates and contracts, which would reduce the performance results. See Notes on Performance (Unaudited) elsewhere in this report for descriptions of the benchmarks.

EQ ADVISORS TRUST DISCLOSURE REGARDING ADVISORY CONTRACT APPROVALS

APPROVAL OF INVESTMENT SUB-ADVISORY AGREEMENT DURING THE SIX-MONTH PERIOD ENDED DECEMBER 31, 2023 (UNAUDITED)

At an in-person meeting held on July 18-19, 2023 (the "July 2023 Meeting"), the Board of Trustees (the "Board") of EQ Advisors Trust (the "Trust"), including those Trustees who are not parties to the Sub-Advisory Agreement (as defined below) or "interested persons" (as that term is defined in the Investment Company Act of 1940, as amended) of such parties or the Trust (the "Independent Trustees"), considered and unanimously approved a new Investment Sub-Advisory Agreement (the "Sub-Advisory Agreement") between Equitable Investment Management Group, LLC (the "Adviser"), which serves as the Trust's investment adviser, and J.P. Morgan Investment Management Inc. ("JPMIM" or the "Sub-Adviser") with respect to the EQ/JPMorgan Growth Stock Portfolio (formerly known as the EQ/T. Rowe Price Growth Stock Portfolio) (the "Growth Stock Portfolio") and an allocated portion of the EQ/Large Cap Growth Managed Volatility Portfolio (the "Large Cap Growth Portfolio").

The Board considered that JPMIM would become the sub-adviser to (i) the Growth Stock Portfolio, in connection with the replacement of the current sub-adviser to the Portfolio, and (ii) a portion of the Large Cap Growth Portfolio that is actively managed, in connection with the replacement of the current sub-adviser to that active allocated portion of the Portfolio. The Board noted that, under the Sub-Advisory Agreement, JPMIM would implement its Large Cap Growth strategy in managing the Growth Stock Portfolio and its active allocated portion of the Large Cap Growth Portfolio. JPMIM became the sub-adviser to the Growth Stock Portfolio and an active allocated portion of the Large Cap Growth Portfolio effective on or about July 31, 2023.

The Board also considered that, in connection with the approval of JPMIM as the sub-adviser to the Growth Stock Portfolio, the Adviser would (i) change the Growth Stock Portfolio's name to "EQ/JPMorgan Growth Stock Portfolio", (ii) change the Growth Stock Portfolio's investment objective (i.e., seeks to achieve long-term capital appreciation and secondarily, income) to remove the secondary income objective, (iii) change the Growth Stock Portfolio's principal investment strategy to reflect JPMIM's proposed investment process, and (iv) amend its contractual expense limitation arrangement with the Trust with respect to the Growth Stock Portfolio from the maximum annual operating expense limits (or "expense caps") for each class of shares of the Portfolio from the current expense caps.

The Board also noted that JPMIM currently serves as investment sub-adviser for other portfolios of the Trust and that the Portfolios would be added, by amendment, to the existing investment sub-advisory agreement between the Adviser and JPMIM with respect to those other portfolios. In reaching its decision to approve the Sub-Advisory Agreement with respect to each Portfolio at its July 2023 Meeting, the Board also noted that it was conducting its annual review of, and considering the renewal of, the existing investment sub-advisory agreement between the Adviser and JPMIM with respect to those other portfolios at that same meeting.

In reaching its decision to approve the Sub-Advisory Agreement with respect to each Portfolio, the Board considered the overall fairness of the Sub-Advisory Agreement and whether the Sub-Advisory Agreement was in the best interests of the Portfolio and its investors. The Board further considered all factors it deemed relevant with respect to each Portfolio and the Sub-Advisory Agreement, including: (1) the nature, quality and extent of the overall services to be provided to the Portfolio by the proposed Sub-Adviser; (2) comparative performance information; (3) the level of the proposed sub-advisory fee relative to fees of comparable funds; (4) the estimated impact of the proposed change in Sub-Adviser on the profitability realized by the Adviser and its affiliates; (5) economies of scale that may be realized by the Portfolio; and (6) "fall out" benefits that may accrue to the proposed Sub-Adviser and its affiliates (that is, indirect benefits that the proposed Sub-Adviser or its affiliates would not receive but for the relationship with the Portfolio). The Board also considered other factors (including conditions and trends prevailing generally in the economy, the securities markets and the industry). In considering the Sub-Advisory Agreement, the Board members did not identify any particular factor or information that was all-important or controlling, and each Trustee may have given different weights to different factors and, thus, each Trustee may have had a different basis for his or her decision.

In connection with its deliberations, the Board took into account information requested by the Independent Trustees and prepared by the Adviser and the proposed Sub-Adviser, including memoranda and other materials addressing the factors set out above, which were provided to the Trustees prior to and during the meeting. The Board also took into account information, including information relating to the proposed Sub-Adviser, provided to the Trustees at prior Board meetings. The information provided to the Trustees described, among other things, the services to be provided by the proposed Sub-Adviser, as well as the proposed Sub-Adviser's investment personnel, proposed sub-advisory fee, performance information, and other matters. The Board considered that the Adviser had conducted extensive due diligence on the proposed Sub-Adviser from an investment management, operational and compliance perspective, and the Board had received materials including the Adviser's due diligence questionnaire indicating the proposed Sub-Adviser's responses to the Adviser's due diligence questions. The Board also noted the Adviser's familiarity with the proposed Sub-Adviser's operational and compliance structure as the proposed Sub-Adviser currently serves as an investment sub-adviser with respect to other portfolios of the Trust, as noted above. During the meeting, the Trustees met with senior representatives of the Adviser to discuss the Sub-Advisory Agreement and the information provided. The Independent Trustees also met in executive session during the meeting to discuss the Sub-Advisory Agreement and review the information provided. The Independent Trustees were assisted by independent legal counsel prior to and during the meeting and during their deliberations regarding the Sub-Advisory Agreement and also received from legal counsel materials addressing, among other things, the legal standards applicable to their consideration of the Sub-Advisory Agreement.

Although the Board approved the Sub-Advisory Agreement for both of the Portfolios at the same Board meeting, the Board considered each Portfolio separately. In approving the Sub-Advisory Agreement with respect to each Portfolio, each Trustee, including the Independent Trustees, after considering all factors they deemed relevant, reached a determination, with the assistance of Independent Trustees' counsel and fund counsel and through the exercise of their own business judgment, that the proposed sub-advisory fee was fair and reasonable and that the approval of the Sub-Advisory Agreement was in the best interests of the applicable Portfolio and its investors. Although the Board gave attention to all information provided, the following discusses some of the primary factors it deemed relevant to its decision to approve the Sub-Advisory Agreement with respect to each Portfolio.

Nature, Quality and Extent of Services

The Board evaluated the nature, quality and extent of the overall services to be provided to each Portfolio and its investors by the proposed Sub-Adviser. In addition to the investment performance and expense information discussed below, the Board considered the proposed Sub-Adviser's responsibilities with respect to each Portfolio (or the allocated portion thereof) pursuant to the Sub-Advisory Agreement, and the proposed Sub-Adviser's experience in serving as an investment adviser or sub-adviser for funds and accounts similar to each Portfolio (or the allocated portion thereof).

The Board considered that, subject to the oversight of the Adviser, the proposed Sub-Adviser would be responsible for making investment decisions with respect to each Portfolio (or the allocated portion thereof); placing with brokers or dealers orders for the purchase and sale of investments for each Portfolio (or the allocated portion thereof); and performing certain related administrative functions. The Board also considered information regarding the proposed Sub-Adviser's process for selecting investments for each Portfolio (or the allocated portion thereof), as well as information regarding the qualifications and experience of the proposed Sub-Adviser's portfolio managers who would provide services to each Portfolio (or the allocated portion thereof). The Board also considered the Adviser's familiarity with, and confidence in, the proposed Sub-Adviser, and the results of the Adviser's due diligence. The Board also considered information regarding the proposed Sub-Adviser's procedures for executing portfolio transactions for each Portfolio (or the allocated portion thereof) and the proposed Sub-Adviser's policies and procedures for selecting brokers and dealers. In addition, the Board considered information regarding the proposed Sub-Adviser's trading experience and how the proposed Sub-Adviser would seek to achieve "best execution" on behalf of each Portfolio (or the allocated portion thereof). The Board's conclusion regarding the nature, quality and extent of the overall services to be provided by the proposed Sub-Adviser also was based, in part, on the Board's experience and familiarity with the Sub-Adviser serving as an investment sub-adviser for other portfolios of the Trust and on periodic reports provided to the Board regarding the services provided by the Sub-Adviser to those other portfolios.

The Board also considered that the Trust's compliance team had performed due diligence on JPMIM from an operational and compliance perspective, noting the Adviser's familiarity with JPMIM's operational and compliance structure as JPMIM currently serves as a sub-adviser with respect to other portfolios of the Trust, as noted above. The Board also considered the Trust's Chief Compliance Officer's evaluation of JPMIM's compliance program,

policies and procedures, and certification that they were consistent with applicable legal standards, including in connection with the Board's renewal of the investment sub-advisory agreement between the Adviser and JPMIM with respect to other portfolios of the Trust at the July 2023 Meeting. The Board also considered whether there were any pending lawsuits, enforcement proceedings or regulatory investigations involving the proposed Sub-Adviser and reviewed information regarding the proposed Sub-Adviser's financial condition and history of operations and potential conflicts of interest in managing the Portfolios. In addition, the Independent Trustees received information about business relationships that the Adviser and/or its affiliates, including Equitable Financial Life Insurance Company, have with the proposed Sub-Adviser and its affiliates, in addition to the proposed relationship involving the Portfolios. Among other business relationships, the Board considered that JPMorgan Chase Bank, N.A. serves as custodian, provides foreign exchange trading and cash management, serves as securities lending agent, and is an approved repurchase agreement counterparty with respect to the Adviser and the Trust. In addition, J.P. Morgan Investor Services Co. serves as sub-administrator for the Trust, providing fund accounting, treasury, compliance, financial reporting, performance reporting and regulatory filings services with respect to the Portfolios. In this regard, the Board also took into account materials regarding the policies and procedures adopted by the Adviser and the Trust to identify and mitigate actual and potential conflicts of interest, including conflicts that may arise in connection with those additional business relationships.

The Board also received and reviewed performance data relating to the proposed Sub-Adviser's management of a Large Cap Growth composite and other funds with a similar investment strategy as that proposed for the Portfolios, as compared to an appropriate benchmark and peer group. The Board also received and reviewed information regarding the performance of the proposed Sub-Adviser's Large Cap Growth composite relative to the current sub-adviser's performance managing the Growth Stock Portfolio and an active allocated portion of the Large Cap Growth Portfolio. The Board generally considered long-term performance to be more important than short-term performance. With respect to the Large Cap Growth Portfolio, the Board also considered the Adviser's representation that the proposed Sub-Adviser's Large Cap Growth strategy would be a good complement to other strategies utilized in the Portfolio with respect to the construction of the overall Portfolio. The Board also considered the proposed Sub-Adviser's expertise, resources, proposed investment strategy, and personnel for advising each Portfolio (or the allocated portion thereof).

Based on its review, the Board determined, with respect to each Portfolio, that the nature, quality and extent of the overall services to be provided by the proposed Sub-Adviser were appropriate for the Portfolio in light of its investment objective and, thus, supported a decision to approve the Sub-Advisory Agreement.

Expenses

With respect to the Sub-Advisory Agreement relating to each Portfolio, the Board considered the proposed sub-advisory fee for the proposed Sub-Adviser in light of the nature, guality and extent of the overall services to be provided by the proposed Sub-Adviser. In this regard, the Board noted that the sub-advisory fee rate to be paid to JPMIM with respect to each Portfolio under the proposed Sub-Advisory Agreement is expected to be lower at current asset levels than the sub-advisory fee rate paid to the current sub-adviser. In addition, the Board considered the relative levels of the sub-advisory fee to be paid to the proposed Sub-Adviser with respect to each Portfolio and the advisory fee to be retained by the Adviser in light of, among other factors, the nature and extent of responsibilities retained and risks assumed by the Adviser and not delegated to or assumed by the proposed Sub-Adviser. In this regard, the Board noted that the appointment of JPMIM is expected to have a positive impact on the Adviser's profitability (as discussed below) at the Growth Stock Portfolio's current asset levels, but that the Adviser had proposed to amend its contractual expense limitation arrangement with the Trust with respect to the Growth Stock Portfolio to lower the expense limits for each class of shares of the Growth Stock Portfolio, which would partially offset the benefit to the Adviser and enable the investors in the Growth Stock Portfolio to benefit from the lower sub-advisory fee rate and to be subject to a lower overall net expense ratio. The Board also considered the proposed sub-advisory fee rate schedule in light of the fee rates that the proposed Sub-Adviser charges under advisory agreements with other comparable clients that utilize a Large Cap Growth investment strategy. The Board noted that the advisory fee paid by each Portfolio to the Adviser would not change as a result of the approval of the Sub-Advisory Agreement.

The Board further noted that the Adviser, and not a Portfolio, would pay the proposed Sub-Adviser and that the proposed sub-advisory fee was negotiated between the proposed Sub-Adviser and the Adviser. Moreover, the Board noted that the Adviser generally is aware of the fees charged by sub-advisers to other clients and that the Adviser believes that the fee agreed upon with the proposed Sub-Adviser is reasonable in light of the nature,

quality and extent of the investment sub-advisory services to be provided. Based on its review, the Board determined, with respect to each Portfolio, that the proposed sub-advisory fee for the proposed Sub-Adviser is fair and reasonable.

Profitability and Costs

The Board also considered, with respect to each Portfolio, the estimated impact of the proposed sub-advisory fee on the profitability of the Adviser. With respect to the Growth Stock Portfolio, the Board noted that the appointment of JPMIM is expected to have a positive impact on the Adviser's annual profitability, but that the benefit would be offset in part by the Adviser's proposed reduction of the Portfolio's expense limits, which would benefit investors by reducing the Portfolio's overall net expense ratio. With respect to the Large Cap Growth Portfolio, the Board noted that the appointment of JPMIM is expected to have a modest positive impact on the Adviser's annual profitability at the Portfolio's current asset levels. The Board acknowledged that, because the proposed Sub-Adviser's fee would be paid by the Adviser, the Adviser is incentivized to negotiate a favorable fee. The Adviser also advised the Board that it does not regard Sub-Adviser profitability as meaningful to its evaluation of the Sub-Advisory Agreement. The Board acknowledged the Adviser's view of Sub-Adviser profitability, noting the Board's findings as to the reasonableness of the sub-advisory fee and that the fee to be paid to the proposed Sub-Adviser is the product of negotiations with the Adviser and reflects levels of profitability acceptable to the Adviser and the proposed Sub-Adviser based on the particular circumstances for each of them. The Board noted again that the proposed Sub-Adviser's fee would be paid by the Adviser and not the Portfolios and that many responsibilities related to the advisory function are retained by the Adviser. In light of all the factors considered, the Board determined that the anticipated profitability to the Adviser remained within the reasonable range of profitability levels previously reported.

Economies of Scale

The Board also considered whether economies of scale would be realized as a Portfolio grows larger and the extent to which this is reflected in the proposed sub-advisory fee rate schedule with respect to the Portfolio. While recognizing that any precise determination is inherently subject to assumptions and subjective assessments, the Board noted that the proposed sub-advisory fee rate schedule for JPMIM aggregates the assets managed by JPMIM in the Growth Stock Portfolio and the Large Cap Growth Portfolio. The Board also noted that the proposed sub-advisory fee rate schedule for JPMIM with respect to both of the Portfolios includes breakpoints that would reduce the sub-advisory fee rate as aggregate Portfolio assets under the proposed Sub-Adviser's management increase above certain levels. In this regard, the Board acknowledged that, at some levels, breakpoints in a sub-advisory fee rate schedule may result in savings to the Adviser and not to investors. The Board also noted that the sub-advisory fee rate schedule did not aggregate assets, which also has the potential to benefit the Adviser. The Board considered these factors, and the relationship they bear to the fee structure charged to the Portfolios by the Adviser, and concluded that there would be a reasonable sharing of benefits from any economies of scale with the Portfolios. The Board also considered that the Adviser continues to share economies of scale with the Growth Stock Portfolio and its investors through the revised expense structure described above.

Fall-Out and Other Benefits

The Board also considered possible fall-out benefits and other types of benefits that may accrue to the proposed Sub-Adviser, including the following. The Board noted that the proposed Sub-Adviser currently serves as investment sub-adviser for other portfolios advised by the Adviser and receives sub-advisory fees with respect to those portfolios. In addition, the Board recognized that the proposed Sub-Adviser and its affiliates may sell, and earn sales commissions and/or other compensation with respect to, other investment products issued by the Adviser or its affiliates. The Board also noted that the proposed Sub-Adviser may benefit from greater exposure in the marketplace with respect to its investment process and from expanding its level of assets under management, and that the proposed Sub-Adviser may derive benefits from its association with the Adviser and other sub-advisers (as applicable) to a Portfolio. Based on its review, the Board determined that any "fall-out" benefits and other types of benefits that may accrue to the proposed Sub-Adviser are fair and reasonable.

Federal Income Tax Information (Unaudited)

For the year ended December 31, 2023, the percentage of dividends paid that qualify for the 70% dividends received deductions for corporate shareholders, foreign taxes which are expected to be passed through to shareholders for foreign tax credits, gross income derived from sources within foreign countries, and long-term capital gain dividends for the purpose of the dividend paid deduction on its Federal income tax return were as follows:

Portfolios:	70% Dividend Received Reduction	Foreign Taxes	Foreign Source Income	Long Term Capital Gain
EQ/Moderate Allocation	19.15%	\$1,520,988	\$15,655,655	\$116,108,982
EQ/Common Stock Index	100.00			255,762,570
EQ/Core Plus Bond	0.00			—
EQ/International Equity Index	0.00	3,114,199	52,020,011	_
EQ/Money Market	0.00

MANAGEMENT OF THE TRUST (UNAUDITED)

The Trust's Board is responsible for the overall management of the Trust and its Portfolios, including general supervision and review of the Portfolios' investment activities and their conformity with federal and state law as well as the stated policies of the Portfolios. The Board elects the officers of the Trust who are responsible for administering the Trust's day-to-day operations. The Trustees of the Trust are identified in the table below along with information as to their principal business occupations held during the last five years and certain other information are shown below. The address of each Trustee is 1345 Avenue of the Americas, New York, NY 10105.

The Board of Trustees

Name and Year of Birth	Position(s) Held With the Trust	Term of Office** and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee [†]	Other Directorships Held by Trustee
	•	Intere	sted Trustee		•
Steven M. Joenk* (1958)	Trustee, Chief Executive Officer, and President	Trustee from September 2004 to present; Chief Executive Officer from December 2002 to present; President from December 2002 to February 2023 and September 2023 to present	Chairman of the Board and Chief Executive Officer (May 2011 to present) and President (May 2011 to November 2021 and August 2023 to present) of EIM; Chairman of the Board and Chief Executive Officer (January 2023 to present) and President (August 2023 to present) of Equitable Investment Management, LLC; Senior Vice President and Chief Investment Officer of AXA Financial, Inc. (2017 to 2019); and Chief Investment Officer (April 2017 to present) and employee (September 1999 to present) of Equitable Financial.	126	None
		Indeper	ndent Trustees		
Mark A. Barnard (1949)	Trustee	April 2017 to present	Retired. Previously, Managing Director – Private Investments, Howard Hughes Medical Institute, 2001 to 2016 (and, prior thereto, Director of Private Investments from 1998 to 2001, and Manager of Private Investments from 1995 to 1998).	126	None.
Michael B. Clement (1957)	Trustee	January 2019 to present	Professor of Accounting, University of Texas, from 1997 to 2002 and from 2004 to present (Department of Accounting Chair from 2018 to 2022); Visiting Professor, Harvard Business School, 2023.	126	New York Mortgage Trust

Name and Year of Birth	Position(s) Held With the Trust	Term of Office** and Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Trustee [†]	Other Directorships Held by Trustee
		Independent	Trustees (Continued)		-
Donald E. Foley (1951)	Trustee	January 2014 to present	Retired. Previously, Chairman of the Board and Chief Executive Officer, Wilmington Trust Corporation, 2010 to 2011; Senior Vice President, Treasurer and Director of Tax, ITT Corporation, 1996 to 2010.	126	BioSig Technologies, Inc.; Wilmington Funds (12)

Kathleen Stephansen (1954)	Trustee	January 2019 to present	Senior Economist, Haver Analytics, 2019 to present; Senior Economic Advisor, Boston Consulting Group, 2018 to 2019 and in 2016, Chief Economist; Huawei Technologies USA Inc., 2016 to 2018; various positions at American International Group, including Chief Economist and Senior Managing Director and Senior Investment Strategies and Global Head of Sovereign Research – AIG Asset Management from 2010 to 2016.	126	None.

* Affiliated with the Adviser and/or the Distributor.

** Each Trustee serves during the lifetime of the Trust until he or she dies, resigns, is declared bankrupt or incompetent by a court of appropriate jurisdiction, or is removed, or, if sooner, until the next meeting of shareholders called for the purpose of electing Trustees and until the election and qualification of his or her successor. The Board has adopted a policy that currently provides that each Independent Trustee shall retire from the Board as of the last day of the calendar year in which he or she attains the age of 76 years. The Trust's retirement policy is subject to periodic review by the Trust's Governance Committee, which may recommend for Board approval any changes to the policy that it determines to be appropriate.

*** Ms. Haydel and Ms. Laughton each served as a consultant to the Board from September 1, 2023, to December 31, 2023. Ms. Haydel and Ms. Laughton each began serving as a Trustee of the Trust effective as of January 1, 2024.

+ The registered investment companies in the fund complex include the Trust and the 1290 Funds.

Additional information about the Trustees is available in the Portfolios' Statement of Additional Information, which can be obtained, without charge, by calling 1-877-222-2144.

The Trust's Officers

No officer of the Trust, other than the Chief Compliance Officer, receives any compensation paid by the Trust. Each officer of the Trust is an employee of Equitable Financial, EIM, Equitable Investment Management, LLC, and/ or Equitable Distributors, LLC ("Equitable Distributors"). The address of each officer is 1345 Avenue of the Americas, New York, NY 10105. The Trust's principal officers are:

Name and Year of Birth	Position(s) Held With the Trust*	Term of Office** and Length of Time Served	Principal Occupation(s) During Past 5 Years
Steven M. Joenk (1958)	Trustee, Chief Executive Officer and President	Trustee from September 2004 to present; Chief Executive Officer from December 2002 to present; and President from December 2002 to February 2023 and September 2023 to present	Chairman of the Board and Chief Executive Officer (May 2011 to present) and President (May 2011 to November 2021 and September 2023 to present) of EIM; Chairman of the Board and Chief Executive Officer (January 2023 to present) and President (September 2023 to present) of Equitable Investment Management, LLC; Senior Vice President and Chief Investment Officer of AXA Financial, Inc. (2017 to 2019); and Chief Investment Officer (April 2017 to present) and employee (September 1999 to present) of Equitable Financial.

CONTROL PERSON AND PRINCIPAL HOLDERS OF SECURITIES (UNAUDITED)

Shares of the Trust are offered to separate accounts of insurance companies in connection with the Contracts and may be offered to tax-qualified retirement plans and other qualified investors. Equitable Financial may be deemed to be a control person with respect to the Trust by virtue of its record ownership of the Trust's shares as of December 31, 2023. Shareholders owning more than 25% of the outstanding shares of a Portfolio may be able to determine the outcome of most issues that are submitted to shareholders for a vote.

PROXY VOTING POLICIES AND PROCEDURES (UNAUDITED)

A description of the policies and procedures that the Portfolios use to determine how to vote proxies relating to portfolio securities is available (i) without charge, upon request, by calling a toll-free number at 1-877-222-2144 and (ii) on the Securities and Exchange Commission's website at http://www.sec.gov. Information regarding how the Portfolios voted proxies relating to portfolio securities during the most recent 12-month period ended December 31 is available without charge (i) on the Trust's website at www.equitable-funds.com and (ii) on the Securities and Exchange Commission's website at http://www.sec.gov.

QUARTERLY PORTFOLIO HOLDINGS INFORMATION (UNAUDITED)

The Portfolios file their complete schedule of portfolio holdings with the Securities and Exchange Commission for the first and third quarters of each fiscal year as an exhibit to their reports on Form N-PORT. The Portfolios' Form N-PORT reports are available on the Securities and Exchange Commission's website at http://www.sec.gov.
